práctica proporciona una justificación plena a la inclusión del juego en el curriculum de los primeros años y a través de ejemplos de estudiantes jugando estimula a profesoras y profesores a revisar su propio pensamiento sobre tales cuestiones este libro es de lectura imprescindible para el profesorado de la escuela infantil y de primaria para quienes se proponen serio y para todos los interesados en la educación y en el desarrollo de niños y niñas pequeños this book provides family doctors with a wealth of evidence based indications and tips regarding geriatric medicine and approaches for the management of older patients to be applied in daily practice after discussing old and new features of healthy ageing and the approaches required in family medicine consultation the text introduces key elements of geriatric medicine such as frailty sarcopenia and the comprehensive geriatric assessment cga before describing a range of characteristics unique to older patients in different contexts with a dedicated section on palliative care the role of polypharmacy and the importance of quaternary prevention and deprescribing are also addressed finally the book emphasizes both the importance of a humanistic approach in caring and the approach of research and meta research in geriatrics though many texts explore the role of primary care professionals in geriatric medicine the role of family doctors in older people care has not yet been clearly addressed despite the growing burden of ageing which has been dubbed the silver tsunami family physicians care for individuals in the context of their family community and culture respecting the autonomy of their patients in negotiating management plans with their patients family doctors integrate physical psychological social cultural and existential factors utilizing the knowledge and trust engendered by repeated visits they do so by promoting health preventing disease providing cures care or palliation and promoting patient empowerment and self management this will likely become all the more important since we are witnessing a global demographic shift and family doctors will be responsible for and involved in caring for a growing population of older patients this book is intended for family medicine trainees and professionals but can also be a useful tool for geriatricians helping them to better understand some features of primary care and to more fruitfully interact with family doctors obra que proporciona pautas comunes para unificar objetivos contenidos y criterios de evaluación en los centros participantes the contributions to this book examine the two main asymmetries of the euro area as they have intensified during the second decade of economic and monetary union emu the first between monetary union more supranational governance versus economic union less centralised governance the second between those euro area member states of the so called core and those of the periphery emu stands as one of the european union s eu flagship integration achievements set up in 1999 with the large majority of eu member states at the time emu was described as asymmetrical even prior to its start from the outset it involved asymmetrical integration in monetary and economic union although a major element of the blueprint that paved the way for the final stage of emu the concept of economic union was insufficiently developed the second decade of the single currency gave rise to a second asymmetry namely one between those euro area member states of the core and those of the periphery the ten contributions to this volume speak to one or both of these asymmetries covering the major political political economy and policy dimensions of emu and the ongoing debates about necessary policy and institutional reforms to overcome these asymmetries and bolster euro area stability the outbreak of the coronavirus covid 19 crisis in 2020 created unprecedented socio economic challenges for euro area member states heightening the perceived urgency of reform the chapters in this book were originally published as a special issue of the journal of european integration tratado de medicina de família e comunidade chega à 2ª edição revisto e ampliado para refletir o que há de mais relevante sobre o assunto enfocando princípios formação e prática differing contexts or alters to reflect developments in a given discipline this book presents the authors theories on using conceptual profiles to make the teaching of context dependent meanings more effective developed over two decades their theory begins with a recognition of the coexistence in the students discourse of those alternative meanings even in the case of scientific concepts such as molecule where the dissonance between the classical and modern views of the same phenomenon is an accepted norm what began as an alternative model of conceptual change has evolved to incorporate a sociocultural approach by drawing on ideas such as situated cognition and vygotsky s influential concept of culturally located learning also informed by pragmatist philosophy the approach has grown into a well rounded theory of teaching and learning scientific concepts the authors have taken the opportunity in this book to develop their ideas further anticipate and respond to criticisms that of relativism for example and explain how their theory can be applied to analyze the teaching of core concepts in science such as heat and temperature life and biological adaptation they also report on the implementation of a research program that correlates the responsiveness of their methodology to all the main developments in the field of science education this additional material will inform Researching and Applying Metaphor in the Real World

2010-10-13

it has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used especially where the aim is to address real world problems the notion of real world metaphor research has been developed to describe this important area of investigation this book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description methods include corpus analysis experimentation discourse analysis cross cultural analysis and genre analysis in each case the empirical studies refer back to gibbs s opening overview of real world research the result is an invaluable and cross referenced collection of papers addressing real world problems
