## ***Importing EU Norms 2015-03-20***

this interdisciplinary work presents a conceptual framework and brings together constructivist and rationalist accounts of how eu norms are adopted adapted resisted or rejected these chapters provide empirical cases and critical analysis of a rich variety of norm takers from eu member states european and non european states including the rejection of eu norms in russia and africa as well as adaptation of eu practices in australia and new zealand chapters on china asean and the czech republic demonstrate resistance to eu norm export this volume probes differences in willingness to adopt or adapt norms between various actors in the recipient state and explores such questions as how do norm takers perceive of the eu and its norms is there a normative fit between eu norms and the local normative context similarly how do eu norms impact recipients interests and institutional arrangements first the authors map eu norm export strategies and approaches as they affect norm takers second the chapters recognize that norm adoption adaption resistance or rejection is a product of interaction and a relationship in which interdependence asymmetry and power play a role third we see that domestic circumstances within norm

takers condition the reception of norms this book's focus on norm  
takers highlights the reflexive nature of norm diffusion and that  
nature has implications for the eu itself as a norm exporter anyone  
with an interest in the research agenda on norm diffusion  
normative power and the eu's normative dialogue with the world

## ***Towards Semantically Enabled Complex***

### ***Event Processing 2017-10-30***

the semantic provides a framework for semantically annotating data  
on the web and the resource description framework rdf supports  
the integration of structured data represented in heterogeneous  
formats traditionally the semantic has focused primarily on more or  
less static data but information on the web today is becoming  
increasingly dynamic rdf stream processing rsp systems address  
this issue by adding support for streaming data and continuous  
query processing to some extent rsp systems can be used to  
perform complex event processing cep where meaningful high level

events are generated based on low level events from multiple sources however there are several challenges with respect to using rsp in this context event models designed to represent static event information lack several features required for cep and are typically not well suited for stream reasoning the dynamic nature of streaming data also greatly complicates the development and validation of rsp queries therefore reusing queries that have been prepared ahead of time is important to be able to support real time decision making additionally there are limitations in existing rsp implementations in terms of both scalability and expressiveness where some features required in cep are not supported by any of the current systems the goal of this thesis work has been to address some of these challenges and the main contributions of the thesis are 1 an event model ontology targeted at supporting cep 2 a model for representing parameterized rsp queries as reusable templates and 3 an architecture that allows rsp systems to be integrated for use in cep the proposed event model tackles issues specifically related to event modeling in cep that have not been sufficiently covered by other event models includes support for event encapsulation and event payloads and can easily be extended to fit specific use cases the model for representing rsp

query templates was designed as an extension to spin a vocabulary that supports modeling of sparql queries as rdf the extended model supports the current version of the rsp query language rsp ql developed by the rdf stream processing community group along with some of the most popular rsp query languages finally the proposed architecture views rsp queries as individual event processing agents in a more general cep framework additional event processing components can be integrated to provide support for operations that are not supported in rsp or to provide more efficient processing for specific tasks we demonstrate the architecture in implementations for scenarios related to traffic incident monitoring criminal activity monitoring and electronic healthcare monitoring

# Protection of Information and the Right to Privacy – A New Equilibrium? *2014-05-19*

this book presents the latest research on the challenges and solutions affecting the equilibrium between freedom of speech freedom of information information security and the right to informational privacy given the complexity of the topics addressed the book shows how old legal and ethical frameworks may need to be not only updated but also supplemented and complemented by new conceptual solutions neither a conservative attitude more of the same nor a revolutionary zeal never seen before is likely to lead to satisfactory solutions instead more reflection and better conceptual design are needed not least to harmonise different perspectives and legal frameworks internationally the focus of the book is on how we may reconcile high levels of information security with robust degrees of informational privacy also in connection with recent challenges presented by phenomena such as big data and security scandals as well as new legislation initiatives such as those concerning the right to be forgotten and the use of personal data in biomedical research the book seeks to offer analyses and

solutions of the new tensions in order to build a fair shareable and sustainable balance in this vital area of human interactions

## The Big Stall *2018-10-02*

in fall 2015 the newly elected trudeau government endorsed the paris agreement and promised to tackle global warming in 2016 it released a major report which set out a national energy strategy embracing clean growth technological innovation and carbon pricing rather than putting in place tough measures to achieve the paris targets however the government reframed global warming as a market opportunity for canada s clean technology sector the big stall traces the origins of the government s climate change plan back to the energy sector itself in particular big oil it shows how in the last fifteen years big oil has infiltrated provincial and federal governments academia media and the non profit sector to sway government and public opinion on the realities of climate change and what needs to be done about it working both behind the scenes and in high profile networks canada s energy companies moved the debate away from discussion of the measures required to create a zero carbon world and towards market based solutions

that will cut carbon dioxide emissions but not enough to prevent severe climate impacts this is how big oil and think tanks unraveled the kyoto protocol and how rachel notley came to deliver the business council of canada s energy plan donald gutstein explains how and why the door has been left wide open for oil companies to determine their own futures in canada and to go on drilling new wells building new oil sands plants and constructing new pipelines this book offers the background information readers need to challenge politicians claiming they are taking meaningful action on global warming

## **Lawfare *2022-04-18***

international military interventions endanger soldier and civilian lives can be financially costly and risk spiraling out of control one incident which exemplified the risks involved a us and uk wish to stop a russian ship from delivering helicopter gunships to the assad regime in syria in 2012 forcibly intercepting a russian ship in transit could have risked world war iii so they developed an alternative non confrontational maneuver instead of military intervention the uk persuaded the ship s insurer london s standard club to withdraw the ship s insurance this loss of insurance caused the ship to return to russia thus avoiding an international clash as well as the delivery of deadly weapons to syria this use of legal maneuvering in lieu of armed force is known as lawfare and is becoming a critical tool in the foreign policy arena in lawfare author orde kittrie draws on his experiences as a lawfare practitioner us state department attorney and international law scholar in analyzing the

theory and practice of lawfare kittrie explains how factors including the increased reach of international laws and tribunals and the rise of economic globalization and information technology have fueled lawfare s increasing power and prevalence the book includes case studies of recent offensive and defensive lawfare by the united states china all sides of the israeli palestinian conflict and several non governmental organizations and individuals kittrie asserts that much of the united states most effective and creative lawfare today is being waged by private sector or other non governmental attorneys he analyzes why this is the case and describes how such attorneys expertise and experience can contribute even more to u s national security kittrie also explains that lawfare deployed more systematically and adeptly by the u s government could likely reduce u s and foreign casualties and save u s taxpayer dollars by supplementing or replacing the use of armed force as a tool for achieving some significant u s national security objectives understanding this alternative to armed force has never been more important

## High-Speed Networks 2015-04-01
