is great teaching a gift that only a few of us are born with or is it a skill that can be learned in never work harder than your students robyn jackson makes a radical assertion any teacher can become a master teacher by developing a master teacher mindset the master teacher mindset can be achieved by rigorously applying seven principles to your teaching until they become your automatic response to students in the classroom the more you practice these principles the more you begin to think like a master teacher the seven principles are 1 start where your students are 2 know where your students are going 3 expect to get your students to their goal 4 support your students along the way 5 use feedback to help you and your students get better 6 focus on quality rather than quantity 7 never work harder than your students using these seven principles jackson shows you how to become a master teacher no matter where you are in your practices each chapter provides a detailed explanation of one of the mastery principles the steps you need to take to apply them to your own practice and suggestions for how you can begin practicing the principle in your classroom right away jackson offers stories from her own teaching practice as well as from other teachers she has helped to show you how each principle works teaching is a hard job but using jackson's principles will help you and your students reap the rich rewards of that hard work book jacket

setting forth an innovative new model for what it means to be a writing teacher in the era of writing across the curriculum the end of composition studies urges a reconceptualization of graduate work in rhetoric and composition systematically critiques the limitations of current pedagogical practices at the postsecondary level and proposes a reorganization of all academic units david w smit calls into question two major assumptions of the field that writing is a universal ability and that college level writing is foundational to advanced learning instead smit holds writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings the end of composition studies provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and demands of students instructors administrators and our democratic society
