are we driving off a digital cliff and heading for disaster unable to focus maintain concentration or form the human bonds that make life worth living are media and business doomed and about to be replaced by amateur hour the world as nick bilton with tongue in cheek shows has been going to hell for a long long time and what we are experiencing is the twenty first century version of the fear that always takes hold as new technology replaces the old in fact as bilton shows the digital era we are part of is in all its creative and disruptive forms the foundation for exciting and engaging experiences not only for business but society as well both visionary and practical i live in the future here s how it

works captures the zeitgeist of an emerging age providing the understanding of how a radically changed media world is influencing human behavior with a walk on the wild side through the porn industry we see how this business model is leading the way adapting product to consumer needs and preferences and beating piracy by understanding how the internet is creating a new type of consumer the consumnivre living in a world where immediacy trumps quality and quantity we see who is dictating the type of content being created through exploring the way our brains are adapting we gain a new understanding of the positive effect of new media narratives on thinking and action one fascinating study for example shows that surgeons who play video games are more skillful than their nonplaying counterparts why social networks the openness of the internet and handy new gadgets are not just vehicles for telling the world what you had for breakfast but are becoming the foundation for anchoring communities that tame information overload and help determine what news and information to trust and consume and what to ignore why the map of tomorrow is centered on me and why that simple fact means a totally new approach to the way media companies shape content why people pay for experiences not content and why great storytelling and extended relationships will

prevail and enable businesses to engage with customers in new ways that go beyond merely selling information instead creating unique and meaningful experiences i live in the future here s how it works walks its own talk by creating a unique reader experience semacodes embedded in both print and ebook versions will take readers directly to bilton s website nickbilton com where they can access videos of the author further developing his point of view and also delve into the research that was key to shaping the central ideas of the book the website will also offer links to related content and the ability to comment on a chapter allowing the reader to join the conversation

become commonplace a new problem has emerged to confront the software development community significant numbers of poorly designed programs have been created by less experienced developers resulting in applications that are inefficient and hard to maintain and extend increasingly software system professionals are discovering just how difficult it is to work with these inherited non optimal applications for several years expert level object programmers have employed a growing collection of techniques to improve the structural integrity and performance of such existing software programs referred to as refactoring these practices have remained in the domain of experts because no attempt has been made to transcribe the lore into a form that all developers could use until now in refactoring improving the design of existing code renowned object technology mentor martin fowler breaks new ground demystifying these master practices and demonstrating how software practitioners can realize the significant benefits of this new process with proper training a skilled system designer can take a bad design and rework it into well designed robust code in this book martin fowler shows you where opportunities for refactoring typically can be found and how to go about reworking a bad design into a good one each refactoring step is simple seemingly too simple to be worth

doing refactoring may involve moving a field from one class to another or pulling some code out of a method to turn it into its own method or even pushing some code up or down a hierarchy while these individual steps may seem elementary the cumulative effect of such small changes can radically improve the design refactoring is a proven way to prevent software decay in addition to discussing the various techniques of refactoring the author provides a detailed catalog of more than seventy proven refactorings with helpful pointers that teach you when to apply them step by step instructions for applying each refactoring and an example illustrating how the refactoring works the illustrative examples are written in java but the ideas are applicable to any object oriented programming language

blade runner 2049 is a 2017 sequel to the 1982 movie blade runner about a world in which some human looking replicants have become dangerous so that other human looking replicants as well as humans have the job of hunting down the dangerous models and retiring destroying them both films have been widely hailed as among the greatest science fiction movies of all time and ridley scott director of the original blade runner has announced that there will be a third blade runner movie blade runner 2049 and philosophy is a collection of entertaining articles on both blade runner movies and on the spin off short films and blade runner novels by twenty philosophers representing diverse backgrounds and philosophical perspectives among the issues addressed in the book what does blade runner 2049 tell us about the interactions of state power and corporate power can machines ever become truly conscious or will they always lack some essential human qualities the most popular theory of personhood says that a person is defined by their memories so what happens when memories can be manufactured and inserted at will we already interact with non human decision makers via the internet when embodied ai becomes reality how can we know what is human and what is simulation does it matter do ai endowed human looking replicants have civil and political rights or can they be destroyed

whenever real humans decide they are inconvenient the blade runner deckard harrison ford appears in both movies and is generally assumed to be human but some claim he may be a replicant what s the evidence on both sides is niander wallace the mad scientist cum evil corporate ceo in blade runner 2049 himself a replicant what motivates him what are the impacts of decision making ai entities on the world of business both blade runner and blade runner 2049 have been praised for their hauntingly beautiful depictions of a bleak future but the two futures are very different and the 2019 future imagined in the original blade runner is considerably different from the actual world of 2019 how have our expectations and visions of the future changed between the two movies the dream maker character ana stelline in blade runner 2049 has a small but pivotal role what are the implications of a person whose dedicated mission and task is to invent and install false memories what are the social and psychological implications of human ai sexual relations
