studying the crucial but sometimes difficult range of

medieval mystical material this volume seeks to explore the

origins context and content of the anchoritic and mystical

texts produced in england during the middle ages and to

examine the ways in which these texts may be studied and

taught today it foregrounds issues of context and interaction

seeking both to position medieval spiritual writings against

a surprisingly wide range of contemporary contexts and to

face the challenge of making these texts accessible to a

wider readership the contributions by leading scholars in

the field incorporate historical literary and theological

material which will inform both research and teaching the

approaches to middle english anchoritic and mystical texts

suggested in this volume are many and varied in this they

reflect the richness and complexity of the contexts from

which these writings emerged these essays are offered

aspart of an ongoing exploration of aspects of medieval

spirituality which while posing a considerable challenge to

modern readers also offer invaluable insights into the
