Challenges and Channels

2016-06-22

this book deals with the challenges of teaching the english language and literature in the middle east and north africa region with a special focus on the gulf countries it consists of different articles by an international group of educators and scholars who have first hand experience in teaching the english language and its literatures in this region the contributors not only investigate student attitudes cultural political and administrative obstacles and challenges but they also embark upon soul searching journeys in which they examine their own

attitudes teaching strategies cultural prejudices and preconceptions and personal responses to their teaching environments they also explore from their own personal experiences the crisis in the humanities cultural hegemony ethics in translation cross cultural encounters pedagogical challenges textuality and second language acquisition among other issues and concerns as such the book represents both a scholarly investigation and a colorful palette of personal experience and response to human encounters in the classroom

Lithium-Ion Battery Chemistries

2019-05-10

lithium ion battery chemistries a primer offers a simple description on how different lithium ion battery chemistries work along with their differences it includes a refresher on the basics of electrochemistry and thermodynamics and an understanding of the fundamental processes that occur in the lithium ion battery furthermore it reviews each of the major chemistries that are in use today including lithium

iron phosphate lfp lithium cobalt oxide lco lithium manganese oxide lmo lithium nickel manganese cobalt nmc lithium nickel cobalt aluminium nca and lithium titanate oxide lto and outlines the different types of anodes including carbon graphite hard carbon soft carbon graphene silicon and tin in addition the book offers performance comparisons of different chemistries to help users select the right battery for the right application and provides explanations on why different chemistries have different performances and capabilities finally it offers a brief look at emerging and beyond lithium chemistries including lithium air zinc air aluminum air solid state lithium sulfur lithium glass and lithium metal presents a refresher on the basics of electrochemistry and thermodynamics along with simple graphics and images of complex concepts provides a clear and concise description of lithium ion chemistries and how they operate covers the fundamental processes that occur in lithium ion batteries includes a detailed review of current and future chemistries

Handbook of Individual Differences in Reading

2015-08-11

the central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge operate interact and change the scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed an important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ the handbook of individual differences in reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area

Parliamentary Debates (Hansard).

2022-06-22

this book plant breeding has it bases in an earlier text entitled an introduction to plant breeding by jack brown and peter caligari first published in 2008 the challenges facing today s plant breeders have never been more overwhelming yet the prospects to contribute significantly to global food security and farmers quality of life have never been more exciting and fulfilling despite this there has been a worrying decline in public funding for plant breeding related research and support for international centers of germplasm development and crop improvement in part this has resulted in a serious reduction in the number of young people interested in devoting their professional careers to plant breeding as well as the number of universities offering plant breeding courses or conducting relevant research in plant breeding the authors aim in writing this book is to provide an integrated and updated view of the current scientific progress related to diverse plant breeding disciplines within the context of applied breeding programs this excellent new book will encourage a new generation of students to pursue careers related to plant breeding and will assist a wider audience of agricultural students agronomists policy makers and those with an interest in agriculture in gaining insight about the issues affecting plant breeding and its key role in improving the

quality of life of people and in securing sufficient food at the quality required and at an affordable price with comprehensive coverage including questions designed for students and an accompanying website containing additional material to help in the study of the subject plant breeding is an ideal text for all those studying plant and crop sciences and a convenient reference source for professionals working in the area all libraries within universities and research establishments where biological and agricultural sciences are studied and taught should have multiple copies of this book
