british literature and the life of institutions charts a literary prehistory of the welfare state in britain around 1900 but it also marks a major intervention in current theoretical debates about critique and the dialectical imagination by placing literary studies in dialogue with political theory philosophy and the history of ideas the book reclaims a substantive reformist language that we have ignored to our own loss this reformist idiom made it possible to imagine the state as a speculative and aspirational idea as a fully realized form of life rather than as an uninspiring ensemble of administrative procedures and bureaucratic processes this volume traces the resonances of this idiom from the victorian period to modernism ranging from mary augusta ward george gissing and h g wells to edward carpenter and e m forster compared to this reformist language the economism that dominates current debates about the welfare state signals an impoverishment that is at once intellectual cultural and political critiquing the shortcomings of the welfare state comes naturally to us but we often struggle to offer up convincing defences of its principles and aims this book intervenes in these debates by urging a richer understanding of critique speculation this provocative new study suggests does not signify the cancellation of critique but an aspirational moment inherent in critique itself if we want to defend the state kohlmann argues we need to learn to think about it again

values have always been a central topic in both philosophy and the social sciences statements about what is good or bad fair or unfair legitimate or illegitimate express axiomatic beliefs about human existence the fact that values differ from culture to culture and century to century opens many questions for the student of values how can differences be explained can some values be accepted as true and others false can the

question of validity be ignored in favor of identification of the causes of belief thinkers from adam smith nietzsche durkheim and weber to john rawls and jrgen habermas have developed theories rooted in economics psychology or biology to explain why people endorse or reject certain value statements in the origin of values raymond boudon offers empirical data based analysis of existing theories about values while developing his own general perspective as to why people accept or reject value statements boudon classifies the main theories of value including those based on firm belief social or biological factors and rational or utilitarian attitudes he discusses the popular and widely influential rational choice model critiques the postmodernist approach which sees all values as the emanation of singular cultures boudon investigates why relativism has become so powerful and contrasts it with the naturalism represented by the work of james q wilson on moral sensibility he follows with a constructive attempt to develop a new theory beginning with weber s idea of non instrumental rationality as the basis for a more complex idea of rationality applying boudon s own and existing theories of value to recent and current political issues and social ideas the end of apartheid the death penalty multiculturalism communitarianism the origin of values is a significant work boudon fulfills a major task of social science explanation of collective belief his book will be of interest to sociologists philosophers psychologists and political scientists raymond boudon is professor at the university of paris sorbonne paris iv he is the author of the art of self persuasion etudes sur les sociologues classiques and the classical tradition in sociology the european tradition he is the editor of annee sociologique and of the series sociologies at the presses universitaires de france he is a foreign member of the british academy and of the american academy of arts and sciences
