1. (a) (i) The diagram shows the distribution of the population of the world in 1988. The population of the world was 5 billion in 1988. The population of the world is expected to reach 9 billion by 2050. The population of the world is expected to reach 12 billion by 2100. The population of the world is expected to reach 15 billion by 2150. The population of the world is expected to reach 18 billion by 2200. The population of the world is expected to reach 21 billion by 2250. The population of the world is expected to reach 24 billion by 2300. The population of the world is expected to reach 27 billion by 2350. The population of the world is expected to reach 30 billion by 2400. The population of the world is expected to reach 33 billion by 2450. The population of the world is expected to reach 36 billion by 2500. The population of the world is expected to reach 39 billion by 2550. The population of the world is expected to reach 42 billion by 2600. The population of the world is expected to reach 45 billion by 2650. The population of the world is expected to reach 48 billion by 2700. The population of the world is expected to reach 51 billion by 2750. The population of the world is expected to reach 54 billion by 2800. The population of the world is expected to reach 57 billion by 2850. The population of the world is expected to reach 60 billion by 2900. The population of the world is expected to reach 63 billion by 2950. The population of the world is expected to reach 66 billion by 3000.

Choice 1988 The diagram shows the distribution of the population of the world in 1988. The population of the world was 5 billion in 1988. The population of the world is expected to reach 9 billion by 2050. The population of the world is expected to reach 12 billion by 2100. The population of the world is expected to reach 15 billion by 2150. The population of the world is expected to reach 18 billion by 2200. The population of the world is expected to reach 21 billion by 2250. The population of the world is expected to reach 24 billion by 2300. The population of the world is expected to reach 27 billion by 2350. The population of the world is expected to reach 30 billion by 2400. The population of the world is expected to reach 33 billion by 2450. The population of the world is expected to reach 36 billion by 2500. The population of the world is expected to reach 39 billion by 2550. The population of the world is expected to reach 42 billion by 2600. The population of the world is expected to reach 45 billion by 2650. The population of the world is expected to reach 48 billion by 2700. The population of the world is expected to reach 51 billion by 2750. The population of the world is expected to reach 54 billion by 2800. The population of the world is expected to reach 57 billion by 2850. The population of the world is expected to reach 60 billion by 2900. The population of the world is expected to reach 63 billion by 2950. The population of the world is expected to reach 66 billion by 3000.
