god is like a drug a high i can t wait for the next hit this direct quote from a megachurch member speaking about his experience of god might be dismissed as some sort of spiritually induced drug riff however according to the research in this book it was not only sincere but a deeply felt and sought after sensibility megachurch attendees desire this first hand experience of god and many report finding it in their congregations the book focuses on the emotional social and religious dynamics that pull thousands of people into megachurches and how those churches make some feel like they are high on god and can t wait to get their next spiritual hit high on god gives the first robust and plausible explanation for why megachurches have conquered the churchgoing market of america without condescension or exaggeration the authors show the genius of megachurches the power of charisma the design of facilities the training of leaders the emotional dynamics and the strategies that bring people together and lead them to serve and help others using emile durkheim s concept of homo duplex the authors plot the strategies that megachurches employ to satisfy the core human craving for personal meaning and social integration as well as personal identity and communal solidarity the authors also show how these churches can go wrong sometimes tragically so but they argue that for the most part megachurches help their attendees find themselves through bonding with and serving others

if you are studying for the family nurse practitioner certification exam the highly acclaimed family nurse practitioner certification intensive review is a must have resource lauded for its concise well organized format this fourth edition has been significantly revised and updated to feature key information about the new aanpcb

and ancc certification exams all new end of chapter review questions and new full color images the fourth edition also features four practice tests with hundreds of new questions and rationales 800 questions in total extensive test taking techniques and question dissection and analysis chapters help you identify the best clues during the problem solving process so that you can strategically master the certification exam designed to help fnp candidates boost their confidence through intensive review and high quality questions the fourth edition continues to provide succinct precisely targeted need to know details of diseases and classic presentations you can expect to see in practice in patients across the life span organized by body system chapters are consistently formatted to include danger signals normal findings lab findings benign variants and disease review topics each chapter features valuable exam tips and clinical pearls that highlight key considerations and information likely to be encountered on the exam ideal for a last minute refresher before test day ensure success by making this essential resource praised by thousands for helping them pass their certification a key part of your exam prep study regimen key features includes updated information reflecting the new aanpcb and ancc certification exams introduces new end of chapter review questions to help you assess knowledge application and retention features four practice tests with hundreds of new questions and rationales provides a succinct and highly targeted review of diseases commonly seen in primary care updated clinical information all new color photos and exam tips and clinical pearls to highlight key exam content outlines danger signals normal findings lab findings and benign variants in physical assessment of each body system delineates strategic question dissection techniques to simplify the problem solving process offers an intensive pharmacology review and review of professional issues ethical guidelines professional roles reimbursement research evidence based medicine and epidemiology and cultural considerations

Aviation Unit and Intermediate Maintenance for Army UH-60A and EH-60A Helicopters

2019-10-14

although still true to its original focus on the person machine interface the field of human factors psychology ergonomics has expanded to include stress research accident analysis and prevention and nonlinear dynamical systems theory how systems change over time human group dynamics and environmental psychology reflecting new developments in the field human factors engineering and ergonomics a systems approach second edition addresses a wide range of human factors and ergonomics principles found in conventional and twenty first century technologies and environments based on the author s thirty years of experience the text emphasizes fundamental concepts systems thinking the changing nature of the person machine interface and the dynamics of systems as they change over time see what s new in the second edition developments in working memory degrees of freedom in cognitive processes subjective workload decision making and situation awareness updated information on cognitive workload and fatigue additional principles for hfe networks multiple person machine systems and human robot swarms accident analysis and prevention includes resilience new developments in safety climate and an update to the inventory of accident prevention techniques and their relative effectiveness problems in big data mining psychomotor control and its relevance to human robot systems navigation in real world environment trust in automation and augmented cognition computer technology permeates every aspect of the human machine system and has only become more ubiquitous since the previous edition the systems are becoming more complex so it should stand to reason that theories need to evolve to cope with the new sources of complexity while many books cover traditional topics and theory they to not focus on the practical problems students will face in the future with

broad coverage that ranges from physical ergonomics to cognitive aspects of human machine interaction and includes dynamic approaches to system failure this book increases the number of methods and analytical tools that are available for the human factors researcher

Elementary Information Security
