Apr 28 2024

quantum cosmology is the attempt in theoretical physics to develop a quantum theory of the universe this approach attempts to answer open questions of classical physical cosmology particularly those related to the first phases of the universe

essay 19 december 2023 does quantum theory imply the entire universe is preordained the popular idea that quantum physics implies everything is random and nothing is certain might be as far

***quantum cosmology directions in general relativity***

Jan 25 2024

the presumed breakdown of the general theory of relativity gtr at the planck scale without as yet a complete quantum theory of gravity qg to replace it is used to motivate consideration of a simpler problem the quantum mechanics of cosmological models

**quantum to cosmos why scale is vital to our understanding of**

Dec 24 2023

the vastness of the cosmos defies comprehension and yet at the fundamental level it is made of tiny particles it is a bit of a foreign country both the small and the very big says

Nov 23 2023

the application of quantum theory to cosmology raises a number of conceptual questions such as the role of the quantum mechanical notion of observer or the absence of a time variable in the wheeler dewitt equation

Oct 22 2023

cosmology has been transformed by dramatic progress in high precision observations and theoretical modelling this book surveys key developments and open issues for graduate students and researchers using a relativistic geometric approach it focuses on the general concepts and relations that underpin the standard model of the universe

***quantum cosmology and the beginning of the universe***

Sep 21 2023

abstract in this note a recently developed quantum oscillating finite space cosmological model is described the principle novelty of the model is that there is a quantum blurring of the classical singularity

between cycles instead of a singularity free bounce

## loop quantum cosmology and singularities scientific reports

Aug 20 2023

11 citations 19 altmetric metrics loop quantum gravity is believed to eliminate singularities such as the big bang and big crunch singularity this belief is based on studies of so called loop

## quantum mechanics in the light of quantum cosmology

Jul 19 2023

abstract we sketch a quantum mechanical framework for the universe as a whole within that framework we propose a program for describing the ultimate origin in quantum cosmology of the quasiclassical domain of familiar experience and for characterizing the process of measurement

quantum cosmology page id at laboratory scales quantum gravity is unlikely to be important gravity is such a weak force that quantum corrections to general relativity will probably be too small to measure

## phys rev lett 132 221003 2024 constraining primordial

May 17 2023

the most widely studied formation mechanism of a primordial black hole is collapse of large amplitude perturbation on small scales generated in single field inflation in this letter we calculate one loop correction to the large scale power spectrum in a model with sharp transition of the second slow roll parameter we find that models producing an appreciable amount of primordial black holes

## quantum origin of cosmological structure and dynamical

Jan 13 2023

the existing data support this prediction however its biggest success is claimed to be the natural account

for the emergence of the seeds of cosmic structure in terms of primordial quantum fluctuations and the correct estimate of the corresponding microwave spectrum

**a new theory of quantum gravity could explain the biggest**

Dec 12 2022

a variation on the theory of quantum gravity the unification of quantum mechanics and einstein s general relativity could help solve one of the biggest puzzles in cosmology new research

**constraining regularization ambiguities in loop quantum**

Nov 11 2022

in order to investigate the potential observational signals of different regularization ambiguities in loop quantum cosmological models we systematically compute and compare the primordial scalar power spectra and the resulting angular power spectra in the standard loop quantum cosmology lqc and its thiemann regularized versions modified lqc i ii mlqc i ii using both the dressed
