rods old cars collectors vehicles and many more types of collectible vehicles this book presents a refreshingly new method for coaching the individual on accumulating one million dollars or more in the public markets this uniqueness takes several forms the first of these is the structure of the book itself it is divided into four components these components are tools parts assembly and warranty in other words it is set up as an owners manual for the individual by analogy to other owners manuals which we have all seen and attempted to read the tools are generally things that are not included with a new item that we purchase and are required to assemble we must either already have them or purchase them before we can begin the assembly process the tools section of this book is completely unlike other investment books a reader can gain more from reading this section of the book than from most full texts on the subject the parts and assembly sections of the book are in reality the how to of making money in the market although admittedly of little value without the first section these areas combine academic theories with practical experience art and science are merged with real life examples of how you can make your money work for you as a reader goes through these pages his or her mind is transformed into new modes of thought it is as if a light comes on and it all begins to make sense the delivery is powerful and enlightening the book concludes with a warranty section it is of little value to accumulate assets if you are going to lose them insights are given on protecting not only your investment portfolio but other assets as well there are full chapters on how to protect the home and auto as well as methods of getting maximum income while reducing taxes the other area of uniqueness is the detail regarding how an investor must react to bull and bear markets and why they must act in a certain way making millions in the market is as much about being able to refrain from certain innate problems that we all possess as investors and converting our natures and subconscious minds in a way that allows us to be successful of particular interest are the stories which relate to everything from astro physics to world history in teaching the reader about the investment world this moves a rather bland subject from the area of boredom to very interesting reading a reader will want to read this book again and again and keep it where it can be referred back to it will be one owners manual that will not be locked away in a drawer more than 100 000 entrepreneurs rely on this book the national science foundation pays hundreds of startup teams each year to follow the process outlined in the book and it is taught at stanford berkeley columbia and more than 100
