earliest body of religious literature to have survived from ancient egypt places these documents into the ritual context in which they belong until now the pyramid texts have been viewed primarily as royal funerary texts that were used in the liturgy of the dead pharaoh or to aid him in his afterlife journey this emphasis on funerary interpretation has served only to externalize what were actually experiences of the living not the dead king in order to understand the character and significance of the extreme psychological states the pharaoh experienced states often involving perilous encounters with alternate realities we need to approach them as spiritual and religious phenomena that reveal the extraordinary possibilities of human consciousness it is the shamanic spiritual tradition argues naydler that is the undercurrent of the pyramid texts and that holds the key to understanding both the true nature of these experiences and the basis of ancient egyptian mysticism
