This is followed by a brief outline of a case as it is presented. The presentation is divided into steps and the tutorial discussion takes place as the problem unfolds. The tutorial emphasizes the history and examination thought to be relevant and discusses issues which were raised. Finally, where possible, the outcome of the case is recorded and a summary of the teaching points is given for any future revision. The second edition of this textbook contains two new chapters on the nature of the tutorial and the GP's new contract.
