comparison operators soql and sosl reference salesforce soql and sosl reference resources docs salesforce com apex soql soql in operator examples tutorialkart get started with soql queries salesforce trailhead soql in vs not in operator salesforce stack exchange write soql queries salesforce trailhead the where in clause soql salesforce stack exchange use a wildcard with the in operator in a soql query salesforce object query language soql soql and sosl soql select syntax soql and sosl reference salesforce execute soql and sosl queries salesforce trailhead mastering soql queries in salesforce by ajit rajendran how do i build a soql query for records in a list of ids where soql and sosl reference salesforce developers introduction to soql and sosl soql and sosl reference apex use string array in in clause in dynamic soql what is the maximum number of items in a soql in clause select soql and sosl reference salesforce developers soql how to query not like salesforce stack exchange query how to combine 2 queries in to 1 soql salesforce

## **comparison operators soql and sosl reference salesforce *May 20 2024***

learn how to use comparison operators such as in and like in soql queries to filter records by field values see examples of semi joins and anti joins with in and not in clauses

## **soql and sosl reference resources docs salesforce com *Apr 19 2024***

learn how to use soql salesforce object query language and sosl salesforce object search language to query and search data in salesforce find syntax examples functions and tips for soql and sosl

## **apex soql soql in operator examples tutorialkart *Mar 18 2024***

soql in operator is used to fetch the data from the matched values specified in the the soql statement soql in operator is mainly used to compare a value to a list of values that have been specified and it retrieves the records if it matches the values specified in the list

## **get started with soql queries salesforce trailhead *Feb 17 2024***

in clause is an optional soql clause that returns records that meet at least one of three or more conditions learn how to use in clause with examples and practice in the developer console s query editor

## **soql in vs not in operator salesforce stack exchange *Jan 16 2024***

is there any advantage of using operator in instead of not in in soql are there any performance benefits of it i have a use case where i have to filter the records based on a certain column say region which has many distinct values

## **write soql queries salesforce trailhead *Dec 15 2023***

learn how to use soql the salesforce object query language to read records from salesforce in apex code see examples of basic and advanced soql syntax filter conditions and order by

clauses

## ***the where in clause soql salesforce stack exchange Nov 14 2023***

where opportunityid in opportunities or even better with one query select opportunity ownerid owner name select id oldvalue newvalue from histories where field probability select id probability stagename from opportunityhistories from opportunity where lastmodifieddate last n days 7

## ***use a wildcard with the in operator in a soql query Oct 13 2023***

what it looks like you re trying to do is a in and like if you drop the wildcarding your syntax is fine for in however if you do need to do the like you ll have to change approach if you are able to use bind variables you can do it like this set string emails new set string first last1 first last2 list user users select

## ***salesforce object query language soql soql and sosl Sep 12 2023***

learn how to use soql to search and retrieve data from salesforce objects soql is similar to sql but has some limitations and features specific to salesforce

## ***soql select syntax soql and sosl reference salesforce Aug 11 2023***

learn how to use soql query syntax to retrieve data from salesforce objects see the syntax clauses and examples of select statements with optional features such as typeof where with group by and order by

## ***execute soql and sosl queries salesforce trailhead Jul 10 2023***

learn how to use soql and sosl to read and search data in your salesforce org s database see examples of queries in apex code and in the query editor

## **mastering soql queries in salesforce by ajit rajendran *Jun 09***

***2023***

soql is a fundamental tool for querying salesforce data effectively from simple data extraction to complex analytics mastering soql empowers you to unlock insights and optimize decision making within the salesforce ecosystem

## **how do i build a soql query for records in a list of ids *May 08***

***2023***

select id syndication documents c from contentversion where syndication documents c in a4fa0000000kzbv a4fa0000000kzbw if you re doing it from apex and have a collection set list or map you can bind them to the query and avoid the string manipulation

## **where soql and sosl reference salesforce developers *Apr 07***

***2023***

the field expression syntax of the where clause in a soql query consists of a field name a comparison operator and a value the query uses these components to compare the field name value to records being searched

## ***introduction to soql and sosl soql and sosl reference Mar 06***

***2023***

this guide explains when to use soql and sosl and outlines the syntax clauses limits and performance considerations for both languages it is intended for developers and assumes knowledge and experience working with apis to interact with data

## ***apex use string array in in clause in dynamic soql Feb 05 2023***

i have an array of strings i d like to use in the in clause of a dynamic soql query if i wasn t building the string at runtime i could simply use from the sf docs where accountnumber in ss however as i m building at runtime i use the following where operators is my array

## **what is the maximum number of items in a soql in clause Jan**

***04 2023***

since bound variables do not contribute to query length the maximum number of items in a soql in clause becomes limited by either the maximum number of items in a collection or by available system memory

## **select soql and sosl reference salesforce developers Dec 03**

***2022***

soql query syntax consists of a required select statement that specifies the fields to query the fieldlist in the select statement specifies the list of one or more fields separated by commas that you want to retrieve

## **soql how to query not like salesforce stack exchange Nov 02**

***2022***

when i run the query in soql editor it says unexpected token and select id name email profileid from user where not email like example.com and profileid not in 00eee000000xxxx 00eee000000yyyyy 00eee000000zzzz

## **query how to combine 2 queries in to 1 soql salesforce Oct 01**

***2022***

sub queries in soql are limited to relationship queries documentation here because you want data from the lead table and the accounthistory table which have no native relationship you cannot get both of them in one soql query
