A Fork of Paths

2016-01-18

thanks to mona's discovery the residents of the shade finally know their enemies ultimate weakness but this knowledge will soon be worthless if they lose the race against the black witches starting out on what seems like an impossible journey the novaks and their closest companions must solve the mystery that is magnus and hope to not lose themselves in the process

Software Defined Mobile Networks (SDMN)

2015-08-17

this book describes the concept of a software defined mobile network sdmn which will impact the network architecture of current lte 3gpp networks sdn will also open up new opportunities for traffic resource and mobility management as well as impose new challenges on network security therefore the book addresses the main affected areas such as traffic resource and mobility management virtualized traffics transportation network management network security and techno economic concepts moreover a complete introduction to sdn and sdmn concepts furthermore the reader will be introduced to cutting edge knowledge in areas such as network virtualization as well as sdn concepts relevant to next generation mobile networks finally by the end of the book the reader will be familiar with the feasibility and opportunities of sdmn concepts and will be able to evaluate the limits of performance and scalability of these new technologies while applying them to mobile broadband and networks

Operator's, Organizational, Direct Support, and General Support Maintenance Manual

1990

the 6th acis international conference on software engineering research management and applications sera 2008 was held in prague in the czech republic on august 20 22 sera 08 featured excellent theoretical and practical contributions in the areas of formal methods and tools requirements engineering software process models communication systems and networks software quality and evaluation software engineering networks and mobile computing parallel distributed computing software testing reuse and metrics database retrieval computer security software architectures and modeling our conference officers selected the best

17 papers from those papers accepted for presentation at the conference in order to publish them in this volume the papers were chosen based on review scores submitted by members or the program committee and underwent further rounds of rigorous review

Software Engineering Research, Management and Applications

2009-01-29

welcome to the proceedings of the 2005 ifip international conference on bedded and ubiquitous computing euc 2005 which was held in nagasaki japan december 6 9 2005 embedded and ubiquitous computing is emerging rapidly as an exciting new paradigm to provide computing and communication services all the time erywhere its systems are now pervading every aspect of life to the point that they are hidden inside various appliances or can be worn unobtrusively as part of clothing and jewelry this emergence is a natural outcome of research and technological advances in embedded systems pervasive computing and c munications wireless networks mobile computing distributed computing and agent technologies etc its tremendous impact on academics industry gove ment and daily life can be compared to that of electric motors over the past century in fact it but promises to revolutionize life much more profoundly than elevators electric motors or even personal computers the euc 2005 conference provided a forum for engineers and scientists in academia industry and government to address profound issues including te nical challenges safety and social legal political and economic issues and to present and discuss their ideas results work in progress and experience on all aspects of embedded and ubiquitous computing

Water-resources Investigations Report

1993

this book constitutes the refereed proceedings of the international conference on theory and practice of digital libraries tpd1 2011 formerly known as ecdl european conference on research and advanced technology for digital libraries held in berlin germany in september 2011 the 27 full papers 13 short papers 9 posters and 9 demos presented in this volume were carefully reviewed and selected from 162 initial submissions in addition the book contains the abstract of 2 keynote speeches and an appendix stating information on the doctoral consortium as well as the panel which were held at the conference the papers are grouped in topical sections on networked information semantics and interoperability systems and architectures text and multimedia retrieval collaborative information spaces dl applications and legal aspects user interaction and information visualization user studies archives and repositories

2005-11-24

this book constitutes the refereed proceedings of the 5th international workshop on system analysis and modelling sam 2006 held in kaiserslautern germany in may june 2006 the 14 revised full papers cover language profiles evolution of development languages model driven development and language implementation

Research and Advanced Technology for Digital Libraries

2011-09-15

for years companies have rewarded their most effective engineers with management positions but treating management as the default path for an engineer with leadership ability doesn't serve the industry well or the engineer the staff engineer's path allows engineers to contribute at a high level as role models driving big projects determining technical strategy and raising everyone's skills this in depth book shows you how to understand your role manage your time master strategic thinking and set the standard for technical work you'll read about how to be a leader without direct authority how to plan ahead to make the right technical decisions and how to make everyone around you better while still growing as an expert in your domain by exploring the three pillars of a staff engineer's job tanya reilly a veteran of the staff engineer track shows you how to take a broad strategic view when thinking about your work dive into practical tactics for making projects succeed determine what good engineering means in your organization

Guide to Paths in the Blue Ridge

1931

this book focuses on the latest innovations in the process of manufacturing in engineering provided by publisher

System Analysis and Modeling: Language Profiles

2006-12-06

poor performance is one of the main quality related shortcomings that cause software projects to fail thus the need to address performance concerns early during the software development process is fully acknowledged and there is a growing interest in the research and software industry communities towards techniques methods and tools that permit to manage system performance concerns as an integral part of software engineering model based software performance analysis introduces performance concerns in the scope of software modeling thus allowing the developer to carry on performance analysis throughout the software lifecycle with this book cortellessa di marco and inverardi provide the cross knowledge that allows developers to tackle software performance issues from the very early phases of software development they explain the basic concepts of performance analysis and describe the most representative methodologies used to annotate and transform software models into performance models to this end they go all the way from performance primers through software and performance modeling notations to the latest transformation based methodologies as a result their book is a self contained reference text on software performance engineering from which different target groups will benefit professional software engineers and graduate students in software engineering will learn both basic concepts of performance modeling and new methodologies while performance specialists will find out how to investigate software performance model building

The Staff Engineer's Path

2022-09-20

in this book we will be focusing upon following apache hadoop and its components like hdfs and yarn we will learn about mapreduce framework which is foundation for many big data processing frameworks technologies we will walk through apache hive apache pig apache flume also detailing apache oozie we will also get an introduction to apache sqoop to get a practical overview we would implement a case study to analyze clickstream data and visualize the reports using jasper ireport designer tool note that this book is written to understand big data development the focus will be minimal on hadoop cluster administration and or installing tools technologies we will be going through practical exercises rather than keeping it theoretical it is good to have a basic understanding of programming concepts any programming language this book is designed to help developers learn this book will ensure to keep details simple and practical thus even if you are a novice to it by the end of this book you will gain enough knowledge about

engineering big data
