this book is organized in seven chapters chapter one looks at the origins and the causes of war the chapter argues that war is a consequence of how we as a species have evolved war has both endogenous and exogenous causes while the former depends on our biology and psychology the latter has to do primarily with international relations chapter two makes the case for the paradoxical nature of war while war takes lives it is legitimate under certain circumstances for example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not chapter three asks if peace among nations is achievable which is the main theme of this book however it does not elaborate on the question entirely instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding chapter four builds on three by looking at realism idealism and pacifism in international relations as to pacifism the chapter attempts to answer the question what was the most peaceful time in history chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non-governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times on the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geo-economics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars it makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world's superpower after World War II finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments cyberspace the littoral choke points near space and increasingly in expanding cities or slums war the chapter concludes with a discussion on the doomsday clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man-made global catastrophe

this book illustrates how non pragmatic finite provinces of meaning emancipate one from pragmatic everyday pressures barber portrays everyday life originally as including the interplay between intrinsic and imposed relevances the unavoidable pursuit of pragmatic mastery and the resulting tensions non pragmatic provinces can relieve but individuals and groups also inevitably resort to meta level strategies of hyper mastery to protect set ways of satisfying lower level relevances strategies that easily augment individual anxiety and social pathologies after creatively interpreting the schutzian dialectic between the world of working and non pragmatic provinces barber describes the experience of reality in the finite provinces of religion and humor schutz who only mentioned these provinces laid out the six features of the cognitive style that characterize any finite province of meaning this book is the first to follow up on these suggestions and depict two new finite provinces of meaning beyond those in on multiple realities while entrance into these provinces reduces everyday life tensions it does not suffice since pragmatic relevances infiltrate the provinces as when one uses humor to belittle competing cultural groups or one deploys religion only as an instrument to ensure crop productivity instead liberation from anxieties and pathologies is brought to completion when the ego agens the 0 point of all its coordinates discovers its value in relation to the transcendent even if it fails to realize its pragmatic purposes or when one becomes comical to oneself through the eyes of another different from oneself this book aimed at advanced undergraduate graduate or scholarly audiences presents stimulating analyses of the religious appresentative mindset or of the healing potential of interracial humor drawing heavily on interdisciplinary resources the book also illustrates the relevance of phenomenological methods and concepts for concrete human experience barber offers a fresh understanding of pragmatic everyday life original descriptions of the religious and humorous provinces of meaning and a picture of how the overarching intentional stances of meaning provinces along with exposure to another perspective can diminish the pressures everyday life engenders

documenting impossible realities explores the limitations of conventional accounts through which belonging is documented focusing on the experiences of adoptees deportees migrants and other exilic populations susan bibler coutin and barbara yngvesson speak to the current historical moment in which the dichotomy between an above ground inhabited by dominant groups and an underground to which unauthorized immigrants political exiles and transnational adoptees are relegated cannot be sustained this dichotomy was made possible by the illusion that some people do not belong that some forms of kin are not real or that certain ways of knowing do not count to examine accounts that challenge such illusions coutin and yngvesson focus on the spaces between groups where difference is constituted and where the potential for new forms of relationship may be realized by juxtaposing and moving between entangled realities and modes of expression documenting impossible realities conveys the emotional experience of oscillating between being here and gone legitimate and treated as counterfeit

informed by world systems analysis this book examines the shifting patterns of accommodation and resistance to the offshore world with a particular focus on mauritius as a critical but underappreciated offshore node mediating foreign investment into india and africa drawing on a large pool of financial data and elite interviews the authors present the first detailed comparative study of the mauritius india and mauritius africa offshore relationships these relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance whereas india's economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner most african countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment its impact on offshore financial centers has likewise been limited a few of the least sophisticated ones appear to have fallen by the wayside but the rest have either remained largely unaffected or like mauritius succeeded in consolidating their operations and surviving the current round of regulatory headwinds the findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies the uneven offshore world is written in an accessible style and aimed at readers without specialized knowledge of tax issues

the study of british politics has been reinvigorated in recent years as a generation of new scholars seeks to build upon a distinct disciplinary heritage while also exploring new empirical territory and finds much support and encouragement from previous generations in forging new grounds in relation to theory and methods it is in this context that the oxford handbook of british politics has been conceived the central ambition of the handbook is not just to illustrate both the breadth and depth of scholarship that is to be found within the field it also seeks to demonstrate the vibrancy and critical self reflection that has cultivated a much sharper and engaging and notably less insular approach to the terrain it seeks to explore and understand in this emphasis on critical engagement disciplinary evolution and a commitment to shaping rather than re stating the discipline the oxford handbook of british politics is consciously distinctive in showcasing the diversity now found in the analysis of british politics the handbook is built upon three foundations the first principle that underpins the volume is a broad understanding of the political it covers a much broader range of topics themes and issues than would commonly be found within a book on british politics this emphasis on an inclusive approach also characterises the second principle that has shaped this collection namely diversity in relation to commissioned authors the final principle focuses on the distinctiveness of the study of british politics each chapter seeks to reflect on what is distinctive both in terms of the empirical nature of the issue of concern and the theories and methods that have been deployed to unravel the nature and causes of the debate the result is a unique volume that draws upon the intellectual strengths of the study of british politics reflects the innate diversity and inclusiveness of the discipline isolates certain distinctive issues and then reflects on their broader international relevance and finally looks to the future by pointing towards emerging or overlooked areas of research
