faenza in the implementation of a course for syrian restorers at the national museum in damascus the book takes into consideration archaeological artefacts made out of the most common materials like stones both natural and artificial mosaics ceramics glass metals wood and textiles together with less diffuse artefacts and materials like clay tablets goldsmith artefacts icons leather and skin objects bones and ivory coral and mother of pearl each type of material is treated from four different points of view composition and processing technology alteration and degradation causes and mechanisms procedures for conservative intervention case studies and or examples of conservation and restoration due to the high number of materials and to the great difference between their conservation problems all the subjects are treated in a schematic but precise and complete way the book is mainly addressed to students young restorers conservators and conservation scientists all around the world but the book can be usefully read by expert professionals too because nobody can know everything and the experts often need to learn something of the materials not included in their specific knowledge twenty two experts in very different fields of activity contributed with their experience for obtaining a good product all they are italian experts or working in italy so that the book can be seen as an exemplification on how the conservation problem of cultural heritage is received and tackled in italy science and conservation for museum collections introduction 1 preventive
