garwin is a man confronted by one trying situation after another as one of his world's top scientists he grapples with his planet's impending destruction that terrible burden is made even more difficult by his need to explain the problem to top policy makers and by the failing health of his wife slayva garwin deals with this long list challenges as a man of great character might be expected to but he does not emerge unscathed the challenges only seem to subside when garwin ventures to earth there he and a friend named denck along with a small team of researchers determine that our world might be a good fit for some small portion of their planet's refugees to that end the team must consider a great deal about earth's people their political and economic systems and the history of their thought in the end however the people of earth prove to be the biggest challenge of all many of the challenges encountered along the way arise from the relationship between science and politics garwin and denck who happens to be a professor of the history and philosophy of science encounter problems relating to such relationships on both worlds though it's made clear that their civilization sees the issues with much greater clarity than the people of earth do indeed garwin denck and their comrades struggle to

understand the people of earth and the lagging nature of their social and political systems these systems just aren't what they should be given earth's scientific development in time the people of earth prove incapable of managing the influence that political forces have on research in the natural sciences science or at least specific research projects is arbitrated less in the peer reviewed journal or the lab than in the public square the purpose is clear controlling perceptions of scientific thought is part of a broader program that's designed to control thought more generally science has been appropriated to serve the collective rather than some truth that transcends mere politics garwin and his friends are heartbroken to discover that earth will not be suitable for their project many of them had hoped to make a home here and believed that with assistance from their kind the people of earth might be shown the right path but another culture one greatly more advanced that garwin's intervenes and makes that impossible as fate would have it even this latest challenge was beyond garwin's control

Garwin's Tale

2023-10-27

in the post world war ii era the emergence of area studies marked a signal development in the social sciences as the social sciences evolved methodologically however many dismissed area studies as favoring narrow description over general theory still area studies continues to play a key if unacknowledged role in bringing new data new theories and valuable policy relevant insights to social sciences in comparative area studies three leading figures in the field have gathered an international group of scholars in a volume that promises to be a landmark in a resurgent field the book upholds two basic convictions that intensive regional research remains indispensable to the social sciences and that this research needs to employ comparative referents from other regions to demonstrate its broader relevance comparative area studies cas combines the context specific insights from traditional area studies and the logic of cross and inter regional empirical research this first book devoted to cas explores methodological rationales and illustrative applications to demonstrate how area based expertise can be fruitfully integrated with cutting edge comparative analytical frameworks

Garwin's Tale

2023-10-27

in this innovative grassroots to global study kathleen mapes explores how the sugar beet industry transformed the rural

midwest by introducing large factories contract farming and foreign migrant labor identifying rural areas as centers for modern american industrialism mapes contributes to an ongoing reorientation of labor history from urban factory workers to rural migrant workers she engages with a full range of individuals including midwestern family farmers industrialists eastern european and mexican immigrants child laborers rural reformers washington politicians and colonial interests engagingly written *sweet tyranny* demonstrates that capitalism was not solely a force from above but was influenced by the people below who defended their interests in an ever expanding imperialist market

Comparative Area Studies

2018-01-03

this study of taxation in latin america takes a novel approach to the subject using a framework that posits three dimensions for studying taxes historical relational and transnational the book argues that first taxation should be understood as a relational concept and tax systems as a function of a strategic nexus between the state and society second that any analysis of tax systems across latin america needs to take historical legacies of national tax systems into account and finally that transnational phenomena have significant implications for tax regime dynamics in latin america the essays included provide diverse and representative insights for a new understanding of taxation in latin america and highlight the bottlenecks to the development of sustainable tax systems in the region exploring new links between academic research and policy making

2020-02-11

what does local self government look like in the absence of sovereignty from the beginning of its occupation of the west bank in 1967 israel has experimented with different forms of rule since the 1990s it has delegated certain governing responsibilities to the palestinian authority pa an organization that israel hoped would act as a buffer between the military occupation and the palestinian population through a historically informed empirically nuanced analysis of towns and cities

across the west bank diana b greenwald offers a new theory of local government under indirect rule a strategy that is often associated with imperial powers of the past but persists in settings of colonialism and state building today grounded in fine grained data on municipal governance under occupation as well as interviews with palestinian mayors council members staff activists and political elites this book traces how the israel pa regime has influenced the constraints and incentives of palestinians serving in local government mayors in the middle demonstrates that both the indirect rule system itself as embodied in local policing arrangements and the political affiliation of palestinian mayors shape how politicians will govern this variation greenwald argues depends in part on whether local palestinian governments are perceived as intermediaries within or opponents of the regime although palestine is often treated as exceptional greenwald draws illustrative parallels with british colonial india and south africa s apartheid regime a groundbreaking study of palestinian local politics mayors in the middle illuminates the broader dilemmas of indigenous self government under systems of exclusion and domination
