The Neolithic Revolution

2016-07-15

the dawn of the neolithic era ushered in major changes in the way people lived in fact these changes were so sweeping that the transition from the mesolithic era to the neolithic era is referred to as the neolithic revolution the beginnings of agriculture and the domestication of animals both date from this period these changes to the food supply led people to settle in permanent communities which in turn led to organized societies and social hierarchy this book examines the factors that could have led to this revolution and the archaeological evidence of which changes happened where and when

The Neolithic Demographic Transition and its Consequences

2008-09-30

the transition from hunting and gathering to farming the neolithic revolution was one of the most significant cultural processes in human history that forever changed the face of humanity natu an communities 15 100 12 000cal bp all dates in this chapter are calibrated before present planted the seeds of change and the pre pottery neolithic ppn ca 12 000 ca 8 350cal bp people were the rst to establish farming communities the revolution was not fully realized until quite late in the ppn and later in the pottery neolithic pn period we would like to ask some questions and comment on a few aspects emphasizing the linkage between biological and cultural developments during the neolithic revolution the biological issues addressed in this chapter are as follows is there a demographic change from the natu an to the neolithic is there a change in the overall health of the neolithic populations compared to the natu an is there a change in the diet and how is it expressed is there a change in the physical burden stress people had to bear with is there a change in intra and inter community rates of violent encounters from the cultural perspective the leading questions will be what was the change in the economy and when was it fully realized is there a change in settlement patterns and site nature and organization from natu an to neolithic is there a change in human activities and division of labor

Tale of the Axe

2016

archaeological research in sweden and denmark has uncovered a startling array of evidence over the last 150 years but until now there has been no comprehensive synthesis and interpretation of the material an ethnography of the neolithic bridges this gap giving an accessible and up to date analysis of a wide range of evidence from landscapes to monumental tombs to portable artifacts christopher tilley also uses this material as a basis for a provocative and novel reconstruction of late mesolithic and earlier neolithic societies in southern scandinavia over a period of 3 000 years his skilful integration of archaeological evidence with new anthropological approaches makes this book an original contribution to an important topic whose significance stretches outside scandinavia and beyond the neolithic

An Ethnography of the Neolithic

2003-10-30

essay from the year 2008 in the subject history world history early and ancient history the university of liverpool course diet evolution and culture language english abstract about 10 000 years go the neolithic revolution was the starting point of both the domestication of animals and the cultivation of plants in the near east due to climatic changes at the beginning of the holocene and probably distinctively connected to a variation of food preparation throughout several parts of the earth including europe north america and asia the introduction of agriculture led to a rapidly increased population a forthcoming of health and therefore a longer life expectancy for plenty of years however this intention was suggested by medical anthropological as well as evolutionary and social historical examines since the last few decades the currently regarded conclusions of researchers have been significantly overthrown as the utilization of computer assisted technology has been improved and observations dealing with stable isotopic issues rather than archaeological artefacts or morphological alterations have been enlarged consequently new explorations allow further research and more detailed information regarding the evolutionary development of human beings this paper will firstly elucidate the main fields of evidence to give

an insight into the evolutionary process especially when stressing the dietary progress meaning morphological changes evidence given by archaeological findings and bone chemistry additionally the submitted text will point out the transformations of food preparation between the palaeolithic and neolithic periods thirdly the discussion of advantages and disadvantages of neolithic food grounding will be investigated to give a brief overview permitting an understanding of the currently heavy discussions between scholars pressuring the post traditional issue of the neolithic revolution the aspects ought to be underscored by several case studies as a result it will be illustrated that the obviously contrary groups of intentions are based on an equal question of scholarship how useful are modern technologies reflecting on the evolutionary process and do they actually allow more detailed observations to overcome the hiatus of data due to the development of human beings

Food Preparation Methods used in the Neolithic Period

The Neolithic Revolution

1993-01-01

dr whittle reviews the latest archaeological evidence on neolithic europe from 7000 to 2500 bc describing important areas sites and problems he addresses the major themes that have engaged the attention of scholars the transition from a forager lifestyle the rate and dynamics of change and the nature of neolithic society he challenges conventional views arguing that neolithic society was rooted in the values and practices of its forager predecessors right across the continent the processes of settling down and adopting farming were piecemeal and slow only gradually did new attitudes emerge to time and the past to the sacred realms of ancestors and the dead to nature and to the concept of community unique in its broad and up to date coverage of long term processes of change on a continental scale this completely rewritten and revised version of

whittle's neolithic europe a survey reflects radical changes in the evidence and in interpretative approaches over the past decade

Understanding the Neolithic

2002-02-07

the neolithic period is noted primarily for the change from hunter gatherer societies to agriculture domestication and sedentism this change has been studied in the past by archaeologists observing the movements of plants animals and people but has not been examined by looking at the domestic architecture of the time along with tracking the movement of sedentism neolithic houses are also able to show researchers the beginnings of cultural identity group representation through the construction and decoration of these structures additionally as agriculture moved west and north in this era the architecture and material culture shows this change and its significance chapters are arranged chronologically so that authors can address differences and similarities of their region to neighboring ones to ensure continuity authors have framed the chapters around the following considerations construction materials and architectural characteristics how houses facilitated or perpetuated

Europe in the Neolithic

1996-05-23

the neolithic period is one of the great transformations in human history when agriculture first began and dramatic changes occurred in human society these changes occurred in environments that were radically different to those that exist today and in northern europe many landscapes would have been dominated by woodland yet wood and woodland rarely figures in the minds of many archaeologists and it plays no part in the traditional three age system that has defined the frameworks of european prehistory this book explores how human environment relations altered with the beginnings of farming and how the neolithic in northern europe was made possible through new ways of living in and understanding the environment

drawing on a broad range of evidence from pollen data and stone axes to the remains of timber monuments and settlements the book analyzes the relationship between people their material culture and their woodland environment

Tracking the Neolithic House in Europe

2012-12-09

smarter in sixty minutes get smarter in just 60 minutes with in60learning concise and elegantly written non fiction books and audiobooks help you learn the core subject matter in 20 of the time that it takes to read a typical book life is short so explore a multitude of fascinating historical biographical scientific political and financial topics in only an hour each the shift from the paleolithic to neolithic periods represents a watershed moment in human history while many may consider the humans of both stone ages to be unintelligent barbarians this brief history proves that the humans of yesteryear were just as smart as we are today between 10 000 bce and 2000 bce they instituted revolutionary changes in human life all over the globe formerly nomadic people began settling into villages farming and creating hi tech stone inventions thanks to new research tools exciting discoveries are popping up all over the world revealing more about the mysterious early humans behind such wonders as stonehenge

Woodland in the Neolithic of Northern Europe

2017

going west uses the latest data to question how the neolithic way of life was diffused from the near east to europe via anatolia the transformations of the 7th millennium bc in western anatolia undoubtedly had a significant impact on the neighboring regions of southeast europe yet the nature pace and trajectory of this impact needs still to be clarified archaeologists searched previously for similarities in prehistoric especially early neolithic material cultures on both sides of the sea of marmara recent research shows that although the isthmi of the dardanelles and the bosphorus connect asia minor and the eastern balkans they apparently did not serve as passageways for the dissemination of neolithic innovations instead

the first permanent settlements are situated near the aegean coast of thrace and macedonia often occurring close to the mouths of big rivers in secluded bays the courses and the valleys of rivers such as the maritsa strymon and axios were perfect corridors for contact and exchange using previous studies as a basis for fresh research this volume presents exciting new viewpoints by analyzing recently discovered materials and utilising interdisciplinary investigations with the application of modern research methods the seventeen authors of this book have dedicated their research to a renewed evaluation of an old problem namely the question of how the complex transformations at the transition from the mesolithic to the neolithic can be explained they have focused their studies on the vast area of the eastern balkans and the pontic region between the bosphorus and the rivers strymon danube and dnestr going west thus offers an overview of the current state of research concerning the neolithisation of these areas considering varied viewpoints and also providing useful starting points for future investigations

The Neolithic Revolution

2018-09-16

archaeologists show us how the neolithic human lived in mainland scotland what was life like in scotland between 4000 and 2000bc where were people living how did they treat their dead why did they spend so much time building extravagant ritual monuments what was special about the relationship people had with trees and holes in the ground what can we say about how people lived in the neolithic and early bronze age of mainland scotland where much of the evidence we have lies beneath the ploughsoil or survives as slumped banks and ditches or ruinous megaliths each contribution to this volume presents fresh research and radical new interpretations of the pits postholes ditches rubbish dumps human remains and broken potsherds left behind by our neolithic forebears from the apf what was life like in scotland between 4000 and 2000bc where were people living how did they treat their dead why did they spend so much time building extravagant ritual monuments what was special about the relationship people had with trees why was so much time and effort spent digging holes and filling them back up again what can we say about how people lived in the neolithic and early bronze age of mainland scotland where much of the evidence we have lies beneath the plough soil or survives as slumped banks and filled ditches or ruinous megaliths this book will draw together leading experts and young researchers to present fresh research

and outline radical new interpretations of the pits postholes ditches rubbish dumps human remains and broken potsherds left behind by our neolithic forebears much of this evidence has come to light in the past few decades putting the emphasis very much lowland mainland scotland as opposed to more famous orcadian neolithic sites inspired by the work of gordon barclay the leading scholars of scotland s neolithic in the last 40 years the chapters in this book offer a wide ranging analysis of the evidence we have for the first farmers in scotland

Going West?

2017-04-21

becoming neolithic examines the revolutionary transformation of human life that was taking place around 12 000 years ago in parts of southwest asia hunter gatherer communities were building the first permanent settlements creating public monuments and symbolic imagery and beginning to cultivate crops and manage animals these communities changed the tempo of cultural social technological and economic innovation trevor watkins sets the story of becoming neolithic in the context of contemporary cultural evolutionary theory there have been 70 years of international inter disciplinary research in the field and in the laboratory stage by stage he unfolds an up to date understanding of the archaeology the environmental and climatic evidence and the research on the slow domestication of plants and animals turning to the latest theoretical work on cultural evolution and cultural niche construction he shows why the transformation accomplished in the neolithic began to accelerate the scale and tempo of human history everything that followed the neolithic up to our own times has happened in a different way from the tens of thousands of years of human evolution that preceded it this well documented account offers a useful synthesis for students of prehistoric archaeology and anyone with an interest in our prehistoric roots this new narrative of the first rapid transformation in human evolution is also informative to those interested in cultural evolutionary theory

Neolithic of Mainland Scotland

2016-03-16

the new stone age in northern europe by john m tyler explores the archaeological discoveries and advancements of the stone age in northern europe tyler s work sheds light on the prehistoric cultures technologies and artistic achievements of ancient societies providing readers with a comprehensive understanding of this significant period in human history

Becoming Neolithic

2023-12-05

one of the principal characteristics of the european neolithic is the development of monumentality in association with innovations in material culture and changes in subsistence from hunting and gathering to farming and pastoralism the papers in this volume discuss the latest insights into why monumental architecture became an integral part of early farming societies in europe and beyond one of the topics is how we define monuments and how our arguments and recent research on temporality impacts on our interpretation of the neolithic period different interpretations of göbekli tepe are examples of this discussion as well as our understanding of special landmarks such as flint mines the latest evidence on the economic and paleoenvironmental context carbon 14 dates as well as analytical methods are employed in illuminating the emergence of monumentalism in neolithic europe studies are taking place on a macro and micro scale in areas as diverse as great britain denmark sweden poland germany the dutch wetlands portugal and malta involving a range of monuments from long barrows and megalithic tombs to roundels and enclosures transformation from a natural to a built environment by monumentalizing part of the landscape is discussed as well as changes in megalithic architecture in relation to shifts in the social structure an ethnographic study of megaliths in nagaland discuss monument building as an act of social construction other studies look into the role of monuments as expressions of cosmology and active loci of ceremonial performances also a couple of papers analyse the social processes in the transformation of society in the aftermath of the initial boom in monument construction and the related changes in subsistence and social structure in northern europe the aim of the

publication is to explore different theories about the relationship between monumentality and the neolithic way of life through these studies encompassing a wide range of types of monuments over vast areas of europe and beyond

The New Stone Age in Northern Europe

2019-12-03

problems in neolithic archaeology is a notable contribution to the debate about how we can write prehistory drawing on both processual and post processual approaches it reaffirms the central role of theory and interpretation while accepting as permanent the uncertainty which makes the testing of archaeological hypotheses difficult or even impossible dr whittle asserts in particular the need for greater self confidence and for the formulation of new theory and questions more appropriate to the archaeological record the book s specific strength lies however in a close contextual study of the neolithic period in western and central europe in this respect it provides an admirable complement to his textbook neolithic europe

Monumentalising Life in the Neolithic

2020-09-30

traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the system point of view that s how we have been educated the time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about after so many years of studying history i came to the conclusion that the best study system is through an impartial objective chronology that just put each event in its exact place in time revealing history without manipulation this chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on in parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the

religion of each civilization inventions or discoveries that cannot be placed in an exact date etc the result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences this is something that traditional history has generally ignored when it was not usable a work of this magnitude could not be published in a single book so i have divided it into several collections and the spanish originals are being translated into french english italian and portuguese the chronology goes from prehistory to the present day year by year as far as possible for those who prefer a deeper and more detailed study i have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections

Problems in Neolithic Archaeology

1988

the neolithic peoples of the near east laid the foundations upon which the civilisations of western asia and europe were built

The Neolithic Revolution

2019-05-08

originally published in 1925 an expert study of the development of primitive culture in europe and in particular the latter stages of the neolithic period and the builders of megalithic monuments in north western europe illustrations of long barrows carvings etc many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive home farm books are republishing these classic works in affordable high quality modern editions using the original text and artwork

The Neolithic of the Near East

1975

this excellent introductory textbook describes and explains the origins of modern culture the dawn of agriculture in the neolithic area written in an easy to read style this lively and engaging book familiarises the reader with essential archaeological and genetic terms and concepts explores the latest evidence from scientific analyses as varied as deep sea coring pollen identification radiometric dating and dna research condensing them into an up to date academic account specifically written to be clear even the novice reader focusing primarily on sites in southwest asia neolithic addresses questions such as which plants and animals were the first to be domesticated and how how did life change when people began farming what were the first villages like what do we know about the social political and religious life of these newly founded societies what happened to human health as a result of the neolithic revolution lavishly illustrated with almost a hundred images this enjoyable book is an ideal introduction both for students of archaeology and for general readers interested in our past

The Axe Age - A Study of the Neolithic Period and Its Long Barrows

2008-11-01

examines the history of mankind during the neolithic age and presents evidence that the stone age human was more advanced than science originally thought includes figures and photographs

Neolithic

2012-11-12

the biographies of flint objects reveal their various and changing roles in prehistoric life using raw material sourcing

technological analysis experimental archaeology microwear and residue studies the author tells the story of flint from the early neolithic to its virtual demise in the late bronze and early iron age incorporating data from settlements burials and hoards from the region of the present day netherlands this richly illustrated book shows the way flint functioned in daily life how simple domestic tools became ritualized how flint was used to negotiate change and how the biography of flint objects was related to personhood

The Neolithic Revolution

1975

un settling the neolithic is a radical redirection in the study of the central and east european neolithic 6500 3500 cal bc attacking the essentialisms of traditional approaches to the period the volume pushes forward with new thinking about how best to understand human existence at this time in a critical region containing major statements by the key authorities on the topic un settling the neolithic challenges scholars students excavators and teachers to think again about the fundamental conceptions with which the neolithic has been defined since the origins of its academic study book jacket

The Lost Civilizations of the Stone Age

2000-01-25

in the final stage of the stone age humans use of stone tools was coming to an end people started farming at different times in different places chapters cover how plants and animals were domesticated how pottery production boomed and how farming meant that people could settle down stay put and build great cities like jericho the first known plague victim dates from this era and so do the earliest temples each chapter includes attention grabbing photos and fascinating facts sidebars go deeper and prompts invite readers to think for themselves a timeline of the neolithic era gives a big picture view

Flint in Focus

2010

alasdair whittle argues for the complexity fluidity of life in the neolithic through a combination of archaeological anthropological case studies current theoretical debate he highlights the multiple dimensions which simultaneously constituted neolithic existence in complicated situations

(Un)settling the Neolithic

2005

the neolithic of britain and ireland provides a synthesis of this dynamic period of prehistory from the end of the mesolithic through to the early beaker period drawing on new excavations and the application of new scientific approaches to data from this period this book considers both life and death in the neolithic it offers a clear and concise introduction to this period but with an emphasis on the wider and on going research questions it is an important text for students new to the study of this period of prehistory as well as acting as a reference for students and scholars already researching this area the book begins by considering the mesolithic prelude specifically the millennium prior to the start of the neolithic in britain and ireland it then goes on to consider what life was like for people at the time alongside the monumental record and how people treated the dead this is presented chronologically with separate chapters on the early neolithic middle neolithic late neolithic and early beaker periods finally it considers future research priorities for the study of the neolithic

12 Things to Know about the Neolithic Age

2020

this book explores the transition from the old stone age to the new stone age in northern europe it covers topics such as the

development of agriculture the rise of metallurgy and the emergence of new forms of social organization with its nuanced analysis and clear prose this book is perfect for scholars of anthropology or anyone interested in the neolithic era this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

The Archaeology of People

2003

covering the approximately 6 500 years from the beginning of the late mesolithic to the transition to the bronze age mats larsson takes the reader on a journey through the development of swedish prehistoric society and culture set against the backdrop of climatic and landscape change using examples selected from a wealth of archaeological sites artefacts and palaeo environmental studies he explores a series of chronological themes such as how the relationship between land and water influenced people s lives in many ways and the development of often long distance cultural and exchange networks as reflected in the occurrence of foreign stone axes flint copper and pottery he describes how innovations such as the introduction of agriculture spread rapidly during the neolithic incorporating characteristics of extensive northern european cultural groups beginning with the funnel beaker culture with its array of distinctive objects settlements and burial monuments while retaining some specific regional and local expressions in material culture later certain characteristics of the pitted ware culture such as specific types of pottery decoration were taken up in some areas while the emergence of some regional groups can be seen as a step in the ideological and social changes that led to what we today call the battle axe culture towards the end of the stone age the battle axe was replaced by the dagger as a symbol of the male warrior as a more stable society emerged in many parts of the country concentrated around large farms with longhouses it was only at this late stage that agriculture and the raising of livestock gained a firm hold and the landscape was opened up permanently

The Neolithic of Britain and Ireland

2017-05-18

a turkish farmer finds a large obsidian mirror on top of a mound how did it get there what did it mean for its creator and what does it mean for us in this teaching novel by writer rob swigart the story toggles back and forth between a neolithic village and the changing fortunes of the family who finds this wondrous tool and modern archaeologists whose excavated treasure stirs journalists governments and goddess worshippers alike through an engrossing tale across millennia swigart s novel provides both a basic reconstruction of neolithic lifeways and a primer on contemporary archaeological politics and practice for archaeology students and for anyone curious about artifacts past and present stone mirror will be a fun informative introduction both to archaeology and to the people they study

The New Stone Age in Northern Europe

2023-07-18

the climax of the stone age in britain the neolithic period 4700 2000bc was a period of startling achievement the british isles are rich in neolithic sites which give us evidence of a complex and surprisingly developed archaic society the author surveys 1100 secular and ceremonial sites in britain selecting some for detailed explanation from these a sense of the diversity and dynamism of the living neolithic communities emerges he presents a comprehensive profusely illustrated and up to date view of the neolithic organised by county archaeologists and prehistorians will find this book of interest and it should prove indispensable to students of archaeology as a source of information about the british neolithic

Paths Towards a New World

2014-04-16

the neolithic in britain was a period of fundamental change human communities were transformed collectively owning domesticated plants and animals and inhabiting a richer world of material things timber houses and halls pottery vessels polished flint and stone axes and massive monuments of earth and stone equally important was the development of a suite of new social practices with an emphasis on descent continuity and inheritance these innovations set in train social processes that culminated with the construction of stonehenge the most remarkable surviving structure from prehistoric europe neolithic britain provides an up to date concise introduction to the period of british prehistory from c 4000 2200 bce written on the basis of a new appreciation of the chronology of the period the result reflects both on the way that archaeologists write narratives of the neolithic and how neolithic people constructed histories of their own incorporating new insights from the extraordinary pace of archaeological discoveries in recent years a world emerges which is unfamiliar complex and challenging and yet played a decisive role in forging the landscape of contemporary britain important recent developments have resulted in a dual realisation firstly highly focused research into individual site chronologies can indicate precise and particular time narratives and secondly this new awareness of time implies original insights about the fabric of neolithic society embracing matters of inheritance kinship and social ties and the descent of cultural practices moreover our understanding of neolithic society has been radically affected by individual discoveries and investigative projects whether in the stonehenge area on mainland orkney or in less well known localities across the british isles the new perspective provided in this volume stems from a greater awareness of the ways in which unfolding events and transformations in societies depend upon the changing relations between individuals and groups mediated by objects and architecture this concise panorama into neolithic britain offers new conclusions and an academically stimulating but accessible overview it covers key material and social developments and reflects on the nature of cultural practices tradition genealogy and society across nearly two millennia

Stone Mirror

2016-09-16

this is an account of the neolithic period in scotland from its earliest traces around 4000 bc to the transformation of neolithic society in the early bronze age fifteen hundred years later gordon noble interprets scottish material in the context of debates

and issues in european archaeology comparing sites and practices identified in scotland to those found elsewhere in britain and beyond he considers the nature and effects of memory sea and land travel ritualisation island identities mortuary practice symbolism and environmental impact he synthesises excavations and research conducted over the last century and more bringing together the evidence for understanding what happened in scotland during this long period his long term and regionally based analysis suggests new directions for the interpretation of the neolithic more generally after outlining the chronology of the neolithic in europe dr noble considers its origins in scotland he investigates why the earlier neolithic in scotland is characterised by regionally distinct monumental traditions and asks if these reflect different conceptions of the world he uses a long term perspective to explain the nature of monumental landscapes in the later neolithic and considers whether neolithic society as a whole might have been created and maintained through interactions at places where large scale monuments were built he ends by considering how the neolithic was transformed in the early bronze age through the manipulation of the material remains of the past neolithic scotland provides a comprehensive approachable and up to date account of the scottish neolithic such a book has not been available for many years it will be widely welcomed

Neolithic Britain

2014-10-24

after an outline of the continental background of the british neolithic cultures the book contains two subdivisions professor piggott first describes those cultures that he classes as primary that is those brought to britain by colonists who brought a knowledge of agriculture he then shows how there arose derivative secondary neolithic cultures showing a resurgence of earlier characteristics finally all the british neolithic cultures are considered in relation to one another and to their continental setting and an outline of relative and absolute chronology is made

Neolithic Britain

2018-06-05

the beginning of the neolithic in britain marks the end of a hunter gatherer way of life with the introduction of domesticated plants and animals polished stone tools and a range of new monuments julian thomas offers a coherent argument to explain the process of transition between the mesolithic and neolithic periods

Neolithic Scotland

2006-06-19

this book explores the shift from hunting and gathering to agriculture as a way of life and the implications of this neolithic transition for the genetic structure of european populations originally published in 1984 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905

The Neolithic Cultures of the British Isles

2009-03-19

the neolithic of europe comprises eighteen specially commissioned papers on prehistoric archaeology written by leading international scholars the coverage is broad ranging geographically from southeast europe to britain and ireland and chronologically from the neolithic to the iron age but with a decided focus on the former several papers discuss new scientific approaches to key questions in neolithic research while others offer interpretive accounts of aspects of the archaeological record thematically the main foci are on neolithisation the archaeology of neolithic daily life settlements and subsistence as well as monuments and aspects of world view a number of contributions highlight the recent impact of techniques such as isotopic analysis and statistically modeled radiocarbon dates on our understanding of mobility diet lifestyles events and historical processes the volume is presented to celebrate the enormous impact that alasdaire whittle has

had on the study of prehistory especially the european and british neolithic and his rich career in archaeology

The Birth of Neolithic Britain

2013-11

south east england is largely devoid of impressive neolithic monuments that characterise many other areas and has therefore not been accorded the same attention or significance however research carried out in the south east much of it developer funded has revealed new discoveries and some surprise findings as this volume demonstrates the twenty one contributions reflect some of the recent work carried out in the area and as well as looking at evidence from particular sites the authors present overviews on a range of subjects including aerial survey soils the study of human remains landscapes and environments as richard bradley states in the foreword such evidence challenges the accounts of british prehistory created from data in other areas contributors include

The Neolithic Transition and the Genetics of Populations in Europe

2016-04-19

living well together investigates the development of the neolithic in southeast and central europe from 6500 3500 cal bc with special reference to the manifestations of settling down a collection of reports and comments on recent fieldwork in the region living well together provides 14 tightly written and targeted papers presenting interpretive discussions from important excavations and reassessments of our understanding of the neolithic each paper makes a significant contribution to existing knowledge about the period and the book like its companion un settling the neolithic oxbow 2005 will be a benchmark text for work in this region the reports in living well together play out the critical questions posed in the earlier volume how should one interpret settlement what of the difference between tells and flat sites what do we mean by permanent occupation can we avoid the assumptions that underlie claims for year round residence or seasonal occupation why in some regions and at some times did people maintain residence for so many generations that monumental tell

settlements grew to dominate the visual and social landscape what would a viewshed analysis of tells reveal what are the dynamics of households in neolithic greece how should we see the emergence of pottery in terms of material culture and what were the origins of the lbc and how can we understand its development the volume's authors have succeeded in attacking existing thought in provoking new discussion and in creating new paths to understanding the nature of human existence in the neolithic together they set a new agenda for studying the neolithic across and beyond southeastern and central europe
