## **Oil and Politics in the Gulf 1995-01-27**

after a million deaths and twice that number injured after the destruction of much of the infrastructure of iran and iraq disruption of trade throughout the gulf and the involvement of the usa and ussr was the gulf war a pointless exercise a futile conflict which achieved nothing and left the combatants at the end of it all back in exactly the same position from which they started in 1980 in this book first published in 1989 the authors argue that the lack of territorial gain was irrelevant the real advantages won by each side were far more important intangible though they were for iran the channelling of the energies of her people away from domestic concerns meant the continuation of the islamic revolution and ensured the stability of the mullahs in iraq the war propped up the increasingly shaky regime of saddam hussein the outside world especially the superpowers was terrified of the spread of muslim fundamentalism so made no effort to prevent iraq from trying to halt this spread but israel saudi arabia syria and the oil states also had vested interests in promoting the continuation of the war

the kuwaiti population includes around 100 000 people approximately 10 per cent of the kuwaiti nationals whose legal status is contested often considered stateless they have come to be known in kuwait as biduns from bidun jinsiyya which means literally without nationality in arabic as long term residents with close geographical ties and intimate cultural links to the emirate the biduns claim that they are entitled to kuwaiti nationality because they have no other but since 1986 the state of kuwait has considered them illegal residents on kuwaiti territory as a result the biduns have been denied civil and human rights and treated as undocumented migrants with no access to employment health education or official birth and death certificates it was only after the first ever bidun protest in 2011 that the government softened restrictions imposed upon them claire beaugrand argues here that far from being an anomaly the position of the biduns is of central importance to the understanding of state formation processes in the gulf countries and the ways in which identity and the boundaries of nationality are negotiated and concretely enacted

## **The Transformation of the Gulf 2012**

Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of environmental studies, political economy, and economics of the GCC states.

## ***The Gulf in World History 2020-05-31***

Just imagine worlds in which harmony between peoples has been established, where families are cultured and treasured, where species from different worlds commune in peace. Imagine further these worlds having resolved all misunderstandings surrounding sexuality, a series of planets where same-gender echelon relationships are the majority, and opposite-gender reproductionist couplings are seen as necessary only to propagate a species. Now imagine this civilization on the verge of extending itself into unexplored space, sending out the cream of their generation to colonize the unknown in echelon's end. Book 4: Perils of the Gulf. As the hurrying podship Pioneer 4 traverses between the galactic spiral arms on its way to a promised planet, the cost is energy, which is quickly being consumed, denying it the power to sustain itself. The Aidennians find themselves with no other option than to explore two separate sources for vital elements needed to prolong their flight. Nicraan and Retho find themselves

the tempest between warring societal factions while capel and the others fight for their lives on worlds of ice and horror is this the end for the last generation of the system
