## **The Limits of Voice**

1996

the title of this work derives from costa lima s reading of what is probably the most famous passage in kant s third critique in kant s thesis that the results of aesthetic judgment are generally communicable but without the mediation of a concept costa lima discovers the necessity to identify and

underscore a silence this silence these limits of voice becomes the complex metonymy for the central theme of this book literary experience as a case of aesthetic experience in pursuing this theme costa lima views aesthetic and literary experience as a historically limited potentiality and examines the limits of aesthetic experience which comes from its dependence on contextual requirements the concern about limits of voice is developed on three different levels first costa lima focuses as a historical and systematic condition for aesthetic and literary experience on subjectivity as the subject's right to speak in his/her own name second he argues that although historical modes of speaking and experiencing were inscribed into and legitimized by cosmological constructions subjectivity requires the existence of a context no longer grounded in cosmology which he refers to as the law third he postulates the double dependence of literary and aesthetic experience on the emergence of subjectivity and the existence of the law as its enabling and limiting frame condition this book answers a challenge that has persisted in literary theory and literary history for almost two decades how to historicize the concept of literature

this bold groundbreaking study of american political development assesses the presidency of abraham lincoln through the lenses of governmental power economic policy expansion of executive power and natural rights to show how lincoln not only believed in the limitations of presidential power but also dedicated his presidency to restraining the scope and range of it though lincoln s presidency is inextricably linked to the civil war and he is best known for his defense of the union and executive wartime leadership lincoln believed that congress should be at the helm of public policy making likewise lincoln may have embraced limited government in vague terms but he strongly supported effective rule of law and distribution of income and wealth placing the lincoln presidency within a deeper and more meaningful historical context abraham lincoln s statesmanship and the limits of liberal democracy highlights lincoln s significance in the development of american power institutions and social movement politics using lincoln s prepresidential and presidential words and actions this book argues that decent government demands a balance of competing goods and the strong statesmanship that lincoln exemplified instead of relying too heavily on the will of the people and institutional solutions to help prevent tyranny jon d schaff proposes that american democracy would be better served by a moderate and prudential statesmanship such as lincoln s which would help limit democratic excesses schaff explains how lincoln s views on prudence moderation natural rights and economics contain the notion of limits then views lincoln s political and presidential leadership through the same lens he compares lincoln s views on governmental powers with the defense of unlimited government by twentieth century progressives and shows how lincoln s theory of labor anticipated twentieth century distributist economic thought schaff s unique exploration falls squarely between historians who consider lincoln a protoprogressive and those who say his presidency was a harbinger of industrialized corporatized america in analyzing lincoln s approach abraham lincoln s statesmanship and the limits of liberal democracy rejects the idea he was a revolutionary statesman and instead lifts up lincoln s own affinity for limited presidential power making the case for a modest approach to presidential power today based on this understanding of lincoln s statesmanship as a counterpoint to the contemporary landscape of bitter uncivil politics schaff points to lincoln s statesmanship as a model for better ways of engaging in politics in a democracy

scarcity is considered a ubiquitous feature of the human condition it underpins much of modern economics and is widely used as an explanation for social organisation social conflict and the resource crunch confronting humanity s survival on the planet it is made out to be an all pervasive fact of our lives be it of housing food water or oil but has the conception of scarcity been politicized naturalized and universalized in academic and policy debates has overhasty recourse to scarcity evoked a standard set of market institutional and technological solutions which have blocked out political contestations overlooking access as a legitimate focus for academic debates as well as policies and interventions theoretical and empirical chapters by leading academics and scholar activists grapple with these issues by questioning scarcity s taken for granted nature they examine scarcity debates across three of the most important resources food water and energy and their implications for theory institutional arrangements policy responses and innovation systems the book looks at how scarcity has emerged as a totalizing discourse in both the north and south the scare of scarcity has led to scarcity emerging as a political strategy for powerful groups aggregate numbers and physical quantities are trusted while local knowledges and experiences of scarcity that identify problems more accurately and specifically are ignored science and technology are expected to provide solutions but such expectations embody a multitude of unexamined assumptions about the nature of the problem about the technologies and about the institutional arrangements put forward as a fix through this examination the authors demonstrate that scarcity is not a natural condition the problem lies in how we see scarcity and the ways in which it is socially generated

human reason is limited given the scarcity of reason how should the power to make constitutional law be allocated among legislatures courts and the executive and how should legal institutions be designed in law and the limits of reason adrian vermeule denies the widespread view stemming from burke and hayek that the limits of reason counsel in favor of judges making living constitutional law in the style of the common law instead he proposes and defends a codified constitution a regime in which legislatures have the primary authority to develop constitutional law over time through statutes and constitutional amendments vermeule contends that precisely because of the limits of human reason large modern legislatures with their numerous and highly diverse memberships and their complex internal structures for processing information are the most epistemically effective lawmaking institutions

to many observers congress has become a deeply partisan institution where ideologically distinct political parties do little more than engage in legislative trench warfare a zero sum winner take all approach to congressional politics has replaced the bipartisan comity of past eras if the parties cannot get everything they want in national policymaking then they prefer gridlock and stalemate to compromise or at least that is the conventional wisdom in the limits of party james m curry and frances e lee challenge this conventional wisdom by constructing legislative histories of congressional majority parties

attempts to enact their policy agendas in every congress since the 1980s and by drawing on interviews with washington insiders the authors analyze the successes and failures of congressional parties to enact their legislative agendas their conclusions will surprise many congressional observers even in our time of intense party polarization bipartisanship remains the key to legislative success on capitol hill congressional majority parties today are neither more nor less successful at enacting their partisan agendas they are not more likely to ram through partisan laws or become mired in stalemate rather the parties continue to build bipartisan coalitions for their legislative priorities and typically compromise on their original visions for legislation in order to achieve legislative success

the old discussion of market or state is obsolete there will always have to be a mix of market and state the only relevant question is what that mix should look like how far do we have to let the market go its own way in order to create as much welfare as possible for everyone what is the responsibility of the government in creating welfare these are difficult questions but they are also interesting questions and paul de grauwe analyses them in this book the desired mix of market and state is anything but easy to bring about it is a difficult and sometimes destructive process that is constantly in motion there are periods in history in which the market gains in importance during other periods the opposite occurs and government is more dominant the turning points in this pendulum swing typically seem to coincide with disruptive events that test the limits of market and state why we experience this dynamic is

an important theme in the book will the market which today is afforded a greater and greater role due to globalization run up against its limits or do the financial crisis and growing income inequality show that we have already reached those limits do we have to brace ourselves for a rejection of the capitalist system are we returning to an economy in which the government is running the show
