## **Condition Red Area 51**

1992-08

structuring sense explores the difference between words however defined and structures however constructed it sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure from memory of words to manipulation of rules its reformulation of how grammar and lexicon interact has profound implications for linguistic philosophical and psychological theories about human mind and language hagit borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation and that language variation emerges from the morphological and phonological properties of inflectional material taking form the third and final volume of structuring sense applies this radical approach to the construction of complex words integrating research in syntax and morphology the author develops a new model of word formation arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions while on the other hand they are roots which in themselves are but packets of phonological information and are devoid of both meaning and grammatical properties of any kind within such a model syntactic category syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions or alternatively constructed through general combinatorial principles of syntax such as chomsky s merge the meaning of words in turn does not involve the existence of lexemes but rather the matching of a well defined and phonologically articulated syntactic domain with conceptual content itself outside the domain of language as such in a departure from most current models of syntax but in line with many philosophical traditions then the exo skeletal model partitions meaning into formal functions on the one hand and content on the other hand while the former are

read off syntactico semantic structures as is usually assumed content is crucially read off syntactico phonological structures
