Ski 1995-02 short listed for the 2010 banff mountain book festival competition the mountain knows no expert epitomizes george evanoff s philosophy towards the outdoors while presenting an intriguing contrast with the man himself widely regarded as an expert he was a knowledgeable experienced and practical outdoorsman teacher and mentor yet ironically lost his life in the mountains in an encounter with a grizzly son of a macedonian immigrant family george was raised in alberta and went on to become a mountaineer guide avalanche specialist and pioneer in ecotourism in british columbia s north rockies the many themes embedded in evanoff s life experiences encompass self propelled backcountry travel outdoor safety avalanche safety and rescue ski patrol leader exploration and discovery outdoor ethics and public involvement with respect to land and resource use george evanoff was honoured in several tangible ways after his death culminating in the naming of evanoff provincial park in the hart ranges of the rockies

France Ski Guide 1989 discover the leadership strengths of world class mountain guides and see how developing and applying these principles can help you reach for the highest summits in work and in life this intriguing approach to business and personal success introduces six leadership strengths of world class mountain guides demonstrating social intelligence adopting a flexible leadership style empowering others facilitating the development of trust managing risk in an environment of uncertainty and seeing the big picture the premise is that these same strengths provide a valuable model in the workplace and other networks whether one is already in a leadership position or aspiring to get there the result of more than a decade of research combined with the author s personal experience the book explains how mountain guides coach people to reach for their highest goals in the most challenging environments often enabling them to far exceed what they imagined possible the same principles can be applied in business and elsewhere to set readers on the right path the author explains six strengths of guides incorporating interviews and quotes from guides and expedition participants to illustrate leadership lessons and show how they can be successfully used off the slopes the book also provides a checklist of action steps readers can follow to foster skill development

The Mountain Knows No Expert 2009-02-23 the american west at risk summarizes the dominant human generated environmental challenges in the 11 contiguous arid western united states america s legendary even mythical frontier when discovered by european explorers and later settlers the west boasted rich soils bountiful fisheries immense dense forests sparkling streams untapped ore deposits and oil bonanzas it now faces depletion of many of these resources and potentially serious threats to its few renewable resources the importance of this story is that preserving lands has a central role for protecting air and water quality and water supplies and all support a healthy living environment the idea that all life on earth is connected in a great chain of being and that all life is connected to the physical earth in many obvious and subtle ways is not some new age fad it is scientifically demonstrable an understanding of earth processes and the significance of their biological connections is critical in shaping societal values so that national land use policies will conserve the earth and avoid the worst impacts of natural processes these connections inevitably lead science into the murkier realms of political controversy and bureaucratic stasis most of the chapters in the american west at risk focus on a human land use or activity that depletes resources and degrades environmental integrity of this resource rich but tender and slow to heal western u s the activities include forest clearing for many purposes farming and grazing mining for aggregate metals and other materials energy extraction and use military training and weapons manufacturing and testing road and utility transmission corridors recreation urbanization and disposing of the wastes generated by everything that we do we focus on how our land degrading activities are connected to natural earth processes which act to accelerate and spread the damages we inflict on the land visit theamericanwestatrisk.com to learn more about the book and its authors

Mountain Travel and Rescue 2012 awarded the 2009 bronze medal in the society of american travel writers foundation s annual lowell thomas travel journalism competition whether you want to stand on a glacier or have a beer with local bikers this is the definitive as well as wonderfully eccentric guide to the immensity of the southern sierra and owens valley john muir would be pleased mike davis author of city of quartz and ecology of fear the only complete guide to california s southern sierra nevada some of the most stunning wilderness in north america is better than ever in this revised updated edition detailed reviews of lodging dining and recreation plus outfitters campsites trails and points of historic and cultural interest
