shareholders as a class vis à vis other corporate constituencies such as corporate creditors and employees every jurisdiction must address these problems in a variety of contexts framed by the corporation's internal dynamics and its interactions with the product labor capital and takeover markets the authors central claim however is that corporate or company forms are fundamentally similar and that to a surprising degree jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues this book explains in detail how and why the principal european jurisdictions japan and the united states sometimes select identical legal strategies to address a given corporate law problem and sometimes make divergent choices after an introductory discussion of agency issues and legal strategies the book addresses the basic governance structure of the corporation including the powers of the board of directors and the shareholders meeting it proceeds to creditor protection measures related party transactions and fundamental corporate actions such as mergers and charter amendments finally it concludes with an examination of friendly acquisitions hostile takeovers and the regulation of the capital markets
