

Free ebook Scientific journals impact factor 2012 .pdf

this book proposes a reference framework and guidelines to help researchers produce a manuscript of high scientific quality in order to meet the requirements of high impact journals and to succeed in their publication endeavours it offers a series of precise guidelines tips and tricks with a detailed description of the different steps to be taken to achieve a solid publication with a high impact factor as such the book will be of interest to students and researchers alike scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011 the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge

is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge in this short paper we recall the garfield impact factor of a journal we improve and extend it and eventually present the total impact factor that reflects the most accurate impact factor traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la www trad julio alonso arévalo univ salamanca the world of the academic journal continues to be one of radical change a follow up volume to the first edition of the future of the academic journal this book is a significant contribution to the debates around the future of journals publishing the book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years with contributions from leading academics and industry professionals the book

provides a reliable and impartial view of this fast changing area the book includes various discussions on the future of journals including the influence of business models and the growth of journals publishing open access and academic libraries as well as journals published in asia africa and south america looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers this much anticipated book is a comprehensive guide to a successful publishing strategy written by top journal editors it introduces the publishing process resolves practical issues encourages the right methods and offers tips for navigating the review process understanding journals and publishing across disciplinary boundaries as if that weren't enough it includes key contributions on open access publishing ethics making use of peer review special issues sustaining a publications career journal rankings and increasing your odds of publishing success this will be a must read for anyone seeking to publish in top journals this book first published in 2002 gathers some of america's top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal's quest for reputational dominance each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract sustain professional or academic affiliations opinion leadership or agenda setting power and ongoing criticality to the study or practice of their field the book presents wholly independent reviewers none are in the employ of any publisher but each is fully credentialed and well published and many are award winners the authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele an up to date and comprehensive handbook written by experienced professionals covering all aspects of journal publishing both online and in print this book is an indispensable guide to how to write articles choose journals and deal with revisions or rejection each chapter is written by a highly experienced journal editor people who have actually made decisions on manuscripts and publication as well as being eminent in their respective scientific field and written many articles themselves it showcases parts of articles discusses journal submission outlines the resubmission process and highlights systemic issues clear instructions are given on writing an empirical article literature reviews titles and abstracts introductions theories hypotheses methods and data analysis each part of the process is laid out from presenting results to mapping out a discussion and writing for referees the integral skills of revising papers and ensuring a high impact are taught in article writing 101 whilst less intuitive knowledge is provided concerning publishing strategies references online submission review systems open access and ethical considerations on october 25 26 2005 the chemical sciences roundtable held a workshop to explore issues involving those who use and contribute to chemical literature as well as those who publish and disseminate chemical journals as a follow up to the workshop a summary was written to capture the presentations and discussions that occurred during the workshop as a forum to discuss chemistry journals within the larger context of scientific technical and medical journal publishing the workshop covered whether chemists and chemical engineers have unique journal needs and if so whether these needs are being met in the current journal publishing environment workshop participants also tackled how open access publishing might be applied to the chemical literature such as to provide authors more freedom to distribute their articles after publication and allowing free access to chemical literature archives along with the infamous reviewer 2 journal editors are a leading cause of angst among scholars when editors are bad at their jobs careers are damaged reputations of journals suffer and the overall scholarship within a field is weakened yet despite their importance to the practice of academia most editors do not receive any formal training on the

editing process even well published authors face a steep learning curve when navigating all of the moving parts of a scholarly journal and providing quality feedback to authors this book is intended to be a guide for scholarly journal editors it walks current and prospective editors through the various steps of the editing process including establishing an editorial vision creating editorial teams boards interpreting reviewers comments and writing decision letters and publicizing published articles and improving journal metrics a secondary goal of the book is to provide authors with a peek inside the process of journal editing by better understanding the decisions that editors make authors can make more informed choices about which journals they should submit their work as well as improve their chances for publication this book is a very concise introduction to the basic knowledge of scientific publishing it starts with the basics of writing a scientific paper and recalls the different types of scientific documents in gives an overview on the major scientific publishing companies and different business models the book also introduces to abstracting and indexing services and how they can be used for the evaluation of science scientists and institutions last but not least this short book faces the problem of plagiarism and publication ethics international journal on multicultural literature ijml volume 7 number 2 july 2017 yissn 2231 6248 highlights include solutions to religious communalism as projected in mahesh dattani s final solutions an analysis by s chelliahk v dominic s winged reason a portrait of social realism by d c chambialtracing political bricoleurs in winston churchill s thoughts and adventures and khushwant singh s the end of india by sreedevi r raichel m sylusplay games as sublimation of juvenile delinquency an exploration into the world of children s literature by sijo vargheseintrinsic journey into the epic savitri a symbolic exploration by santanu basakfeminine or feminist ambiguous women in the moor s last sigh by sharmila bhattacharjeeelement of grotesque in carson mccullers the ballad of the sad cafe by sarika tiwarialec derwent hope on poet and art of poetry by amodini sreedharanwomen as victims a study of nalini sharma s strange equations by s barathimahesh dattani s final solutions deconstruction of communalism nidhish kumar singhauthenticity of rural life in the novels of chinua achebe kamala markandaya and ramesh k srivastava by smita daslives on pyre a socio realistic portrayal in d c chambial s the cargoes of the bleeding hearts by parthajit ghosh madhu kamraan evolution of his demography a socio cultural flow in the fictional world of manoj das by suresh bera somali guptamaya angelou s shaker why don t you sing a paroxysm of confession by ishita pramanik shukla banerjee fruits of delight in the fields of despair in manas bakshi s dance of satan and other poems by t v reddy ijml is a peer reviewed research journal in english literature published from thodupuzha kerala india the publisher and editor is prof dr k v dominic renowned english language poet critic short story writer and editor who has to his credit 27 books he is also the secretary of guild of indian english writers editors and critics giewec since 2010 ijml is a biannual journal published in january and july the articles are sent first to the referees by the editor and only if they accept the papers will be published although based in india each issue includes worldwide contributors although ijml concentrates on multiculturalism it also encompasses other literature each issue also includes poems short stories review articles book reviews interviews general essays etc under separate sections ijml is available in paperback kindle epub and pdf editions distributed by modern history press lco004020 literary collections asian indic lit008020 literary criticism asian indic pol035010 political science political freedom security human rights learn more at profkvdomic com this e book asks is supply chain management an emerging academic discipline supply chain management scm has continued to grow in prominence within the field of operations management and also within the broader discipline of management practitioners have begun to adopt and adapt new techniques to supply management that improve firm performance organizations in both the public and private sectors are becoming increasingly aware of the pivotal role that scm can play in their business success this is a challenging special issue aimed at stimulating debate rather than providing a definiti this book has been written with a view to understand the validity of the perceptions of open access oa e journals in the library and information science lis

field using relevant oa journals this book presents and evaluates journals qualitatively and quantitatively over the last three hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process however in the last few decades a changing scenario has been witnessed in their form and format oa is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process some scholars are of the opinion that oa has led to a chaotic environment where anyone can publish anything scholarly communication in library and information services records in detail the impact by accessing the journals web site qualitatively and quantitatively in measuring the important elements such as articles authors countries subjects and cited references finally the book calculates the impact factor using synchronous and asynchronous approaches first ever study to extensively evaluate lis journals site qualitatively by using a newly developed set of criteria lis oa journals are also evaluated quantitatively counts citations of lis oa articles in terms of formal citations by using google scholar the art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one s skills as a research methodologist it is also an ability that despite its importance is often overlooked by research courses and senior level mentors this straightforward pocket guide to preparing research articles steps into the void as an insider s guide to getting published drawing on nearly 20 years of experience editing a social work research journal bruce a thyer has crafted a candid companion to the journal publishing process unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve thyer s frank advice on selecting an appropriate journal handling rejections and revisions understanding confusing concepts like impact factors and electronic publishing and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher writer isi s main advantages lie in the fact that as a traditional bibliographic database it allows more complex and focused search options the option to filter and refine queries and further analyze results isi s most important disadvantage lies in its lack of comprehensive coverage resulting in an often serious underestimation of citation impact in addition isi has a number of idiosyncracies difficulty in reliably establishing self citations poor handling of stray citations and frequent misclassification of original research articles as review articles and proceedings articles chapter 15 proposes an alternative to the traditionally used isi journal impact factor jif to evaluate journals it proposes both an alternative metric hirsch s h index and data source google scholar to assess journal impact using a comparison between the google scholar h index and the isi jif for a sample of 838 journals in economics business i argue that the former provides a more accurate and comprehensive measure of journal impact finally chapter 16 shows how different data sources and citation metrics impact on comparisons of academics between disciplines this 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology provided by publisher the book discusses the topics related to quality in education and research it begins with a topic on good science education and teaching next chapter on total quality management in pharmacy education highlights the importance of quality pharmacy education there are focused chapters emphasizing the importance of quality education in pharmaceuticals medicinal chemistry pharmaceutical biotechnology pharmaceutical services and pharmacognosy the book includes a brief note on scope and potential in pharmacovigilance and quality of pharmaceutical sciences journals on october 25 26 2005 the chemical sciences roundtable held a workshop to explore issues involving those who use and contribute to chemical literature as well as those who publish and disseminate chemical journals as a follow up to the workshop a summary was written to capture the presentations and discussions that occurred during the workshop as a forum to discuss chemistry journals within

the larger context of scientific technical and medical journal publishing the workshop covered whether chemists and chemical engineers have unique journal needs and if so whether these needs are being met in the current journal publishing environment workshop participants also tackled how open access publishing might be applied to the chemical literature such as to provide authors more freedom to distribute their articles after publication and allowing free access to chemical literature archives in academics and research everyone needs publications it has always been a vital requirement in an academic research career due to a lack of a comprehensive setup of learning writing skills career growth is affected this book provides the foundation for effective paper and thesis writing the book covers basics of research review paper synopsis and thesis writing targeting quality journals impact factors as journal metrics detection and avoiding plagiarism planning executing reporting documenting and presenting the research work including empirical studies defending thesis useful resources for writing and research usps of the book are easy language to the point coverage of topics effective presentation and vital further reading links on every topic contents section i paper writing 1 paper publications in academic career 2 targeting journals 3 impact factor 4 review paper writing 5 writing a research paper 6 submission avoiding rejections 7 plagiarism ethics in publications section ii thesis dissertation execution writing 8 introducing research 9 planning a topic 10 literature survey 11 preparing synopsis 12 procurements execution of work 13 results and discussion 14 empirical or field studies 15 report writing 16 presentation of work section iii appendices appendix 1 funding agencies appendix2 directory of major journals appendix3 directory of analytical service providers appendix4 e resources on paper writing appendix5 important software for research and writing this book first published in 1987 brings together from a variety of sources analysis on the major issues involved in the collection of scientific journals working from the premise that scientists tend to know much more about their subject than about their journals it examines the rationale for journal choices journals and tenure journals and budgeting and the elements of a good journal it shows librarians how to penetrate the internal structure of some imposing technical literatures in a way that can help them make responsible collection management decisions that even their science clientele will respect measuring academic research outlines how to undertake a bibliometric study a topic of vital importance in academic research today scientometrics studies assess scientific productivity and can be applied to all disciplines many analyses have been applied in relation to bibliometric studies but few have shown how to actually carry out the analysis this book provides a guide on how to develop a bibliometric study from the first step in which the topic study has to be set to the analysis and interpretation a practical and easy to read guide on how to carry out a bibliometric study gives a wide and up to date view about the most common scientometric indexes analyses are illustrated with multiple and practical examples about their application writing and publishing are at the heart of most academic and research pursuits many potential authors however feel lost in the seemingly everest climbing like process there is little formal education that authors receive during their education the little guide to getting your journal article published seeks to pull back the curtain on the process and provide essential information to lead authors to their goals the little guide answers all of a novice author s questions in a direct and useful fashion the book can be read all the way through or serve as a spot reference guide as authors wind their way through the process the book is divided into 29 short focused chapters sections include getting started selecting potential journals for submission writing your article submitting your article and publication at last this book presents a guide for research methodology and scientific writing covering various elements such as finding research problems writing research proposals obtaining funds for research selecting research designs searching the literature and review collection of data and analysis preparation of thesis writing research papers for journals citation and listing of references preparation of visual materials oral and poster presentation in conferences and ethical issues in research besides introducing library and its various features in a lucid style the latest on the use of information technology in

retrieving and managing information through various means are also discussed in this book the book is useful for students young researchers and professionals you want to conduct a cam study but don t know how problem solved clinical research demonstrates all aspects of state of the art study design in an understandable and practical way you will get a comprehensive overview and instruction step by step the code in the book will give you 12 months of free online access to the content and illustrations of the book this practical training book systematically introduces the key aspects of study design and basic statistics helps you to develop plan and execute your research project combines established theoretical approaches with practical skills applicable to your own clinical study is a step by step tutorial for a complete clinical study which is illustrated in three case studies includes additional training exercises featuring different study conditions and environments that will help you to practice and test your knowledge clinical research in complementary and integrative medicine the best way to understand clinical research and to plan and perform your own study free online access after activating the code inside this book you get free online access to the content and the illustrations for 12 months drawing on real world experience and presented in an informal and accessible manner writing and publishing research in kinesiology health and sport science provides upper level students and early career academics with an essential resource to aid in disseminating research and publishing their first papers logically structured to take researchers through each step of the publishing process the book offers subject specific advice on developing every aspect of theoretical applied or position papers including the title abstract and keywords method results and discussion sections referencing finding the right journal and submitting a paper revising content in light of peer review presenting papers this is important and accessible reading for any researchers seeking advice on publishing their work in fields including but not limited to kinesiology health exercise science physical education or recreation encyclopedia of forensic and legal medicine volumes 1 4 second edition is a pioneering four volume encyclopedia compiled by an international team of forensic specialists who explore the relationship between law medicine and science in the study of forensics this important work includes over three hundred state of the art chapters with articles covering crime solving techniques such as autopsies ballistics fingerprinting hair and fiber analysis and the sophisticated procedures associated with terrorism investigations forensic chemistry dna and immunoassays available online and in four printed volumes the encyclopedia is an essential reference for any practitioner in a forensic medical healthcare legal judicial or investigative field looking for easily accessible and authoritative overviews on a wide range of topics chapters have been arranged in alphabetical order and are written in a clear and concise manner with definitions provided in the case of obscure terms and information supplemented with pictures tables and diagrams each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading brings together all appropriate aspects of forensic medicine and legal medicine contains color figures sample forms and other materials that the reader can adapt for their own practice also available in an on line version which provides numerous additional reference and research tools additional multimedia and powerful search functions each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading examines current issues in journals publishing and reviews how the industry will develop over the next few years with contributions from leading academics and industry professionals the book provides an authoritative and balanced view of this fast changing area there are a variety of views surrounding the future of journals and these are covered using a range of contributors online access is now taken for granted 90 per cent of journals published are now available online an increase from 75 per cent in 2003 looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers world university rankings were announced by thomas reuters and the times as an indian besides being one

teaching for nearly five decades i was eager to know the results of the announcement i showed enough concern where have our good indian universities higher educational institutions been placed i set my eyes on top ranks and it didn t give me anything to be proud of my eyes crossed over more than two hundred and fifty names of universities of the world including those of some not so developed countries but i came across no name of indian institutions universities this upsets me what made the indian educational scenario virtually get eclipsed by the scenarios of the rest of the world i drew a comparison between the higher education in india with that of many other countries the world education scene in general occupied a higher level of degree in research and publication than that of the indian education scene research flourishes when research is brought to light through publication i always advocate sound growth in indian education this can be achieved if we improve journal publication this awareness has resulted in this book therefore journal publishing is a cultural imperative this book is designed to help readers understand what a journal is the people who are responsible for the creation and production of this journal how a journal is published where a journal flourishes and why it is mandatory in education development i have taken materials from all over the world and all these sources have been acknowledged in the references but for them this book would not have been a reality introducing communication research paths of inquiry teaches students the basics of communication research in an accessible manner by using interesting real world examples engaging application exercises and up to date resources best selling author donald treadwell and new co author andrea davis guide readers through the process of conducting communication research and presenting findings for scholarly professional news media and web audiences the fourth edition continues to emphasize the internet and social media as topics of and tools for communication research and incorporates new content on online methodologies qualitative research critical methodologies and ethics the well received first edition of the encyclopedia of industrial and organizational psychology 2007 2 vols established itself in the academic library market as a landmark reference that presents a thorough overview of this cross disciplinary field for students researchers and professionals in the areas of psychology business management and human resources nearly ten years later sage presents a thorough revision that both updates current entries and expands the overall coverage adding approximately 200 new articles expanding from two volumes to four examining key themes and topics from within this dynamic and expanding field of psychology this work offers a truly cross cultural and global perspective

The Impact Factor of Scientific and Scholarly Journals 2007

this book proposes a reference framework and guidelines to help researchers produce a manuscript of high scientific quality in order to meet the requirements of high impact journals and to succeed in their publication endeavours it offers a series of precise guidelines tips and tricks with a detailed description of the different steps to be taken to achieve a solid publication with a high impact factor as such the book will be of interest to students and researchers alike

Publishing in High Impact Factor Journals 2022-10-21

scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

Multidimensional Journal Evaluation 2012-04-26

the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis 2017-12-15

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating

experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals 2013

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals 2013-01-01

in this short paper we recall the garfield impact factor of a journal we improve and extend it and eventually present the total impact factor that reflects the most accurate impact factor

Improved, extended, and total impact factor of a journal 2020-08-01

traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine

qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek h r barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la web trad julio alonso arévalo univ salamanca

Research evaluation metrics 2015-04-27

the world of the academic journal continues to be one of radical change a follow up volume to the first edition of the future of the academic journal this book is a significant contribution to the debates around the future of journals publishing the book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years with contributions from leading academics and industry professionals the book provides a reliable and impartial view of this fast changing area the book includes various discussions on the future of journals including the influence of business models and the growth of journals publishing open access and academic libraries as well as journals published in asia africa and south america looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers

Determining Measures of the Quality and Impact of Journals 1996

this much anticipated book is a comprehensive guide to a successful publishing strategy written by top journal editors it introduces the publishing process resolves practical issues encourages the right methods and offers tips for navigating the review process understanding journals and publishing across disciplinary boundaries as if that weren't enough it includes key contributions on open access publishing ethics making use of peer review special issues sustaining a publications career journal rankings and increasing your odds of publishing

success this will be a must read for anyone seeking to publish in top journals

The Future of the Academic Journal 2014-07-01

this book first published in 2002 gathers some of america s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract sustain professional or academic affiliations opinion leadership or agenda setting power and ongoing criticality to the study or practice of their field the book presents wholly independent reviewers none are in the employ of any publisher but each is fully credentialed and well published and many are award winners the authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

How to get Published in the Best Management Journals 2016-06-24

an up to date and comprehensive handbook written by experienced professionals covering all aspects of journal publishing both online and in print

Journals of the Century 2019-12-06

this book is an indispensable guide to how to write articles choose journals and deal with revisions or rejection each chapter is written by a highly experienced journal editor people who have actually made decisions on manuscripts and publication as well as being eminent in their respective scientific field and written many articles themselves it showcases parts of articles discusses journal submission outlines the resubmission process and highlights systemic issues clear instructions are given on writing an empirical article literature reviews titles and abstracts introductions theories hypotheses methods and data analysis each part of the process is laid out from presenting results to mapping out a discussion and writing for referees the integral skills of revising papers and ensuring a high impact are taught in article writing 101 whilst less intuitive knowledge is provided concerning publishing strategies references online submission review systems open access and ethical considerations

The Handbook of Journal Publishing 2013-02-21

on october 25 26 2005 the chemical sciences roundtable held a workshop to explore issues involving those who use and contribute to chemical

literature as well as those who publish and disseminate chemical journals as a follow up to the workshop a summary was written to capture the presentations and discussions that occurred during the workshop as a forum to discuss chemistry journals within the larger context of scientific technical and medical journal publishing the workshop covered whether chemists and chemical engineers have unique journal needs and if so whether these needs are being met in the current journal publishing environment workshop participants also tackled how open access publishing might be applied to the chemical literature such as to provide authors more freedom to distribute their articles after publication and allowing free access to chemical literature archives

Guide to Publishing in Psychology Journals 2018-12-06

along with the infamous reviewer 2 journal editors are a leading cause of angst among scholars when editors are bad at their jobs careers are damaged reputations of journals suffer and the overall scholarship within a field is weakened yet despite their importance to the practice of academia most editors do not receive any formal training on the editing process even well published authors face a steep learning curve when navigating all of the moving parts of a scholarly journal and providing quality feedback to authors this book is intended to be a guide for scholarly journal editors it walks current and prospective editors through the various steps of the editing process including establishing an editorial vision creating editorial teams boards interpreting reviewers comments and writing decision letters and publicizing published articles and improving journal metrics a secondary goal of the book is to provide authors with a peek inside the process of journal editing by better understanding the decisions that editors make authors can make more informed choices about which journals they should submit their work as well as improve their chances for publication

Are Chemical Journals Too Expensive and Inaccessible? 2005-06-09

this book is a very concise introduction to the basic knowledge of scientific publishing it starts with the basics of writing a scientific paper and recalls the different types of scientific documents in gives an overview on the major scientific publishing companies and different business models the book also introduces to abstracting and indexing services and how they can be used for the evaluation of science scientists and institutions last but not least this short book faces the problem of plagiarism and publication ethics

Introduction to Scientific Publishing 2013-06-28

this e book asks is supply chain management an emerging academic discipline supply chain management scm has continued to grow in prominence within the field of operations management and also within the broader discipline of management practitioners have begun to adopt and adapt new techniques to supply management that improve firm performance organizations in both the public and private sectors are becoming increasingly aware of the pivotal role that scm can play in their business success this is a challenging special issue aimed at stimulating debate rather than providing a definiti

International Journal on Multicultural Literature (IJML) Vol. 7, No. 2 2006

this book has been written with a view to understand the validity of the perceptions of open access oa e journals in the library and information science lis field using relevant oa journals this book presents and evaluates journals qualitatively and quantitatively over the last three hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process however in the last few decades a changing scenario has been witnessed in their form and format oa is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process some scholars are of the opinion that oa has led to a chaotic environment where anyone can publish anything scholarly communication in library and information services records in detail the impact by accessing the journals web site qualitatively and quantitatively in measuring the important elements such as articles authors countries subjects and cited references finally the book calculates the impact factor using synchronous and asynchronous approaches first ever study to extensively evaluate lis journals site qualitatively by using a newly developed set of criteria lis oa journals are also evaluated quantitatively counts citations of lis oa articles in terms of formal citations by using google scholar

PULP Guide: Where to publish, Information on academic journals relevant to law and accredited by the Department of Education of South Africa (Second Edition) 2010-07-27

the art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist it is also an ability that despite its importance is often overlooked by research courses and senior level mentors this straightforward pocket guide to preparing research articles steps into the void as an insider's guide to getting published drawing on nearly 20 years of experience editing a social work research journal bruce a thyer has crafted a candid companion to the journal publishing process unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve thyer's frank advice on selecting an appropriate journal handling rejections and revisions understanding confusing concepts like impact factors and electronic publishing and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledging researcher writer

Supply chain management theory and practice - the emergence of an academic discipline? 2008-02-14

isi's main advantages lie in the fact that as a traditional bibliographic database it allows more complex and focused search options the option to filter and refine queries and further analyze results isi's most important disadvantage lies in its lack of comprehensive coverage resulting in an often serious underestimation of citation impact in addition isi has a number of idiosyncracies difficulty in reliably establishing self citations poor handling of stray citations and frequent misclassification of original research articles as review articles and proceedings articles chapter 15 proposes an alternative to the traditionally used isi journal impact factor jif to evaluate journals it proposes both an alternative metric hirsch's h index and data source google scholar to assess journal impact using a comparison between the google scholar h index and the isi jif for a sample of 838 journals in economics business i argue that the former provides a more accurate and comprehensive measure of journal impact finally chapter 16 shows how different data sources and citation metrics impact on comparisons of academics between disciplines

Scholarly Communication in Library and Information Services 2010

this 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology provided by publisher

Writing and Publishing Research in Kinesiology, Health, and Sport Science 2009-06-22

world university rankings were announced by thomas reuters and the times as an indian besides being one teaching for nearly five decades i was eager to know the results of the announcement i showed enough concern where have our good indian universities higher educational institutions been placed i set my eyes on top ranks and it didn t give me anything to be proud of my eyes crossed over more than two hundred and fifty names of universities of the world including those of some not so developed countries but i came across no name of indian institutions universities this upsets me what made the indian educational scenario virtually get eclipsed by the scenarios of the rest of the world i drew a comparison between the higher education in india with that of many other countries the world education scene in general occupied a higher level of degree in research and publication than that of the indian education scene research flourishes when research is brought to light through publication i always advocate sound growth in indian education this can be achieved if we improve journal publication this awareness has resulted in this book therefore journal publishing is a cultural imperative this book is designed to help readers understand what a journal is the people who are responsible for the creation and production of this journal how a journal is published where a journal flourishes and why it is mandatory in education development i have taken materials from all over the world and all these sources have been acknowledged in the references but for them this book would not have been a reality

Encyclopedia of Forensic and Legal Medicine 2017-11-29

introducing communication research paths of inquiry teaches students the basics of communication research in an accessible manner by using interesting real world examples engaging application exercises and up to date resources best selling author donald treadwell and new co author andrea davis guide readers through the process of conducting communication research and presenting findings for scholarly professional news media and web audiences the fourth edition continues to emphasize the internet and social media as topics of and tools for communication research and incorporates new content on online methodologies qualitative research critical methodologies and ethics
