to trade rangebound markets understanding trading psychology and its impact on option trades and much more a blow by blow account of the highly political and often contentious negotiations around the trips waiver proposal at the world trade organization wto between october 2020 and june 2022 for more than two years developing countries have fought against the inequities in the access to medical products to address the pandemic covid 19 as many as 100 countries led by south africa and india sought to challenge the existing rules that protect intellectual property to boost manufacturing capacities for medical products during covid 19 this they did at the wto in geneva by seeking to temporarily suspend certain provisions of the agreement on trade related aspects of intellectual property rights trips legal rules that govern intellectual property matters it is a battle these countries lost in june 2022 after first bringing this bold proposal to the wto in october 2020 that directly sought to challenge the monopolies of big pharmaceutical companies on medical products many developed countries are home to the biggest pharmaceutical companies in the world what was finally agreed upon is a narrow set of clarifications of existing rules applicable to the production of vaccines in sharp contrast to the paradigmatic shift that the proponents of the waiver proposal had originally sought after an estimated 15 million deaths associated with covid 19 when billions of people globally continue to remain unvaccinated because of the lack of timely access to medical products the fight is now moving on to ensure that the access to medicines and tests goes beyond vaccines the first edition of this book is a compilation of 50 stories published in geneva health files an investigative newsletter on global health that tracked these negotiations over the last two years male dominated law and legal knowledge essentially characterized the whole of pre modern history in that the patriarchy represented the axis of social relations in both the private and public spheres indeed modern and even contemporary law still have embedded elements of patriarchal heritage even in the secular modern legal systems of western developed countries either within the content of legislation or in terms of its implementation and interpretation this is true to a greater or lesser extent across legal systems although the secular modern legal systems of the western developed countries have made great advances in terms of gender equality the traditional understanding of law has always been self evidently dominated by men but modern law and its understanding have also been more or less malestreamed therefore it has become necessary to overcome the given maskulinity of legal thought in contemporary legal and political orders gender mainstreaming of law has been of the utmost importance for overcoming deeply and persistently embedded power relations and gender based unequal social relations at the same time and equally importantly the gender mainstreaming of legal education to which this book aims to contribute can help to gradually eliminate this male dominance and accompanying power relations from legal education and higher education as a whole this open access textbook provides an overview of gender issues in all areas of law including sociological historical and methodological issues written for students and teachers around the globe it is intended to provide both a general overview and in depth knowledge in the individual areas of law relevant court decisions and case studies are supplied throughout the book

in this book australian economist graham dunkley explains and critiques the crucial concept of free trade a policy of free trade is central to today s world dominating globalization project the more euphoric globalists uncritically assume that it has universal and unequivocal benefits for all people and countries and the perpetual negotiations of the world trade organization are wholly based on this presumption graham dunkley shows however that leading economists have always been more sceptical about free trade doctrine than the dogmatic globalizers realize there are more holes in free trade theory than its

advocates grasp and the benefits of free trade in practice are more limited and contingent than they acknowledge he also argues that the world bank s long time push for export led development is misguided a more democratic world trading order is necessary and possible and more interventionist self reliant trade policies are feasible especially if a more holistic view of economic development goals is adopted

while it s easy to blame globalization for shrinking job opportunities dangerous declines in labor standards and a host of related discontents the flattening of the world has also created unprecedented opportunities for worker organization by expanding employment in developing countries especially for women globalization has formed a basis for stronger workers rights even in remote sites of production using india s labor movement as a model rohini hensman charts the successes and failures strengths and weaknesses of the struggle for workers rights and organization in a rich and varied nation as indian products gain wider acceptance in global markets the disparities in employment conditions and union rights between such regions as the european union and india s vast informal sector are exposed raising the issue of globalization s implications for

labor hensman s study examines the unique pattern of employees unionism which emerged in bombay in the 1950s before considering union responses to recent developments especially the drive to form a national federation of independent unions a key issue is how far unions can resist protectionist impulses and press for stronger global standards along with the mechanisms to enforce them after thoroughly unpacking this example hensman zooms out to trace the parameters of a global labor agenda calling for a revival of trade unionism the elimination of informal labor and reductions in military spending to favor funding for comprehensive welfare and social security systems

a blow by blow account of the highly political and often contentious negotiations around the trips waiver proposal at the world trade organization wto between october 2020 and june 2022 for more than two years developing countries have fought against the inequities in the access to medical products to address the pandemic covid 19 as many as 100 countries led by south africa and india sought to challenge the existing rules that protect intellectual property to boost manufacturing capacities for medical products during covid 19 this they did at the wto in geneva by seeking to temporarily suspend certain provisions of the agreement on trade related aspects of intellectual property rights trips legal rules that govern intellectual property matters it is a battle these countries lost in june 2022 after first bringing this bold proposal to the wto in october

2020 that directly sought to challenge the monopolies of big pharmaceutical companies on medical products many developed countries are home to the biggest pharmaceutical companies in the world what was finally agreed upon is a narrow set of clarifications of existing rules applicable to the production of vaccines in sharp contrast to the paradigmatic shift that the proponents of the waiver proposal had originally sought after an estimated 15 million deaths associated with covid 19 when billions of people globally continue to remain unvaccinated because of the lack of timely access to medical products the fight is now moving on to ensure that the access to medicines and tests goes beyond vaccines the first edition of this book is a compilation of 50 stories published in geneva health files an investigative newsletter on global health that tracked these negotiations over the last two years

male dominated law and legal knowledge essentially characterized the whole of pre modern history in that the patriarchy represented the axis of social relations in both the private and public spheres indeed modern and even contemporary law still have embedded elements of patriarchal heritage even in the secular modern legal systems of western developed countries either within the content of legislation or in terms of its implementation and interpretation this is true to a greater or lesser extent across legal systems although the secular modern legal systems of the western developed countries have made great advances in terms of gender equality the traditional understanding of law has always been self evidently dominated by men but modern law and its understanding have also been more or less malestreamed therefore it has become necessary to overcome the given maskulinity of legal thought in contemporary legal and political orders gender mainstreaming of law has been of the utmost importance for overcoming deeply and persistently embedded power relations and gender based unequal social relations at the same time and equally importantly the gender mainstreaming of legal education to which this book aims to contribute can help to gradually eliminate this male dominance and accompanying power relations from legal education and higher education as a whole this open access textbook provides an overview of gender issues in all areas of law including sociological historical and methodological issues written for students and teachers around the globe it is intended to provide both a general overview and in depth knowledge in the individual areas of law relevant court decisions and case studies are supplied throughout the book
