the essays in this collection are based on papers given at a conference on detective fiction in european culture held at the university of exeter in september 1997 the range of topics covered is designed to show not only the presence and variety of narratives of detection across different european countries and their different media although there is a predictable emphasis on the novel it also illustrates the fertility of the genre its openness to a spectrum of readings with different emphases formal as well as thematic approaches to detective fiction have often tended to confine them selves to symptomatic interpretation where details of the fictional world represented are used to diagnose a specific set of social preoccupations and priorities operative at the time of writing such approaches can yield valuable insights nonetheless there is a risk of limiting the value of the genre as a whole solely to its role as a mirror held up to society in this perspective issues of structure and style are sidelined or if addressed are praised to the extent that they approach invisibility concision spareness realism are the qualities singled out for praise the genre also gives much scope for formal innovation and indeed has often attracted already established mainstream writers and filmmakers for just this reason the eclectic diversity of the detective narratives considered in this volume reveal the malleability of the traditional constraints of the genre the essays bear rich testimony to the value of considering the interplay of thematic and structural issues even in the most apparently unselfconscious and popular or populist forms of narrative the patterns of reassurance the triumph of intellect and the ordered rational world of old are now challenged by the need to foreground the problems ambiguities and uncertainties of the self and of society the plurality of meanings and the antithetical imperatives explored in these detective narratives confirm that the most recent forms of the genre are not mere palimpsests of their golden age precursors the subversion of traditional expectations and the implementation of diverse stylistic devices take the genre beyond mere homage and pastiche the role of the reader spectator and critic in conferring meaning is a crucial one adelina patti was the most highly regarded singer in history she earned nearly 5 000 a night and had her own railway carriage yet a minor comic singer would perform for the cost of his food and a pair of shoes to wear on stage john rosselli s wide ranging study introduces all those singers members of the chorus as well as stars who have sung italian opera from 1600 to the twentieth century singers are shown slowly emancipating themselves from dependence on great patrons and entering the dangerous freedom of the market rosselli also examines the sexist prejudices against the castrati of the eighteenth century and against women singers securely rooted in painstaking scholarship and sprinkled with amusing anecdote this is a book to fascinate and inform opera fans at all levels the catholic church is one of the few institutions that have survived since the inception of the british colony she has contributed much during its development as early as 1841 she set up a mission in hong kong she and her various religious orders and congregations engaged in charitable works for the poor and the elderly in the early days of hong kong greatly relieving the burden on the newly established colonial government today apart from religious services the catholic church still plays an important role in providing hong kong with diversified and professional services in medical care education and social welfare historical studies on the catholic church in hong kong of a comprehensive nature are rare in comparison with other religions the reasons of this may include the complicated organizational structure of the catholic church and the multiple languages used in the archival documents such as latin french italian and portuguese as a catholic clergy the author of this book fr louis ha is knowledgeable about the internal operation of the church he is also familiar with many european languages which help him master the original records and guarantee the credible result of his research the contents of this book are based on the large number of documents provided by the hong kong diocesan archives office by archives in the vatican and in various religious orders in europe as an objective and impartial historian fr louis ha honestly pointed out the power struggle in the church the confrontation with the government the competition between chinese and foreign clerics in fact a candid description of the catholic church in hong kong is shown in front of the readers definitely it is a precious reference book for the study of the local society religion education and charitable work in early hong kong this book investigates the historical roots of the italian republic s oldest surviving political party the populist far right lega nord tracing its origins to post war italy the author examines two main case studies the movements for regional autonomy mras the piedmontese movement for regional autonomy the marp and the bergamascan movement for autonomy the mab both of which formed a first wave of post war populist regionalism from 1955 until 1960 the regionalist leagues which later emerged in both piedmont and lombardy in the 1980s and which would later form part of the lega nord represented in many ways a revival of the mras populist regionalist discourse and ideology and therefore a second wave of post war populist regionalism despite this neither the mras nor the twenty year gap between these waves of activism have received the attention they deserve drawing on a series of archival and secondary sources this book takes an innovative approach which blends concepts and theories from historical sociology and political science it also provides a nuanced examination of the continuities and discontinuities between the mras and the lega from the 1950s until time of publication this contributes to debates not only in contemporary italian history but also populism and the far right while rooted in historical approaches the book s interdisciplinarity makes it suitable for students and researchers across a variety of subject areas including european history modern history

fly through the air speak weep or produce miraculous cures although contrary to widely held assumptions the cults of particular paintings and statues held to be miraculous have persisted beyond the middle ages into the present even in a modern european city such as genoa the primary focus of this book drawing upon rich documentation from northwest italy and elsewhere spectacular miracles shows how these images work in a range of historical contexts jane garnett and gervase rosser vividly evoke ritual animation of the image and the phenomenology of the beholder s experience these images they engages with different strands of comedy including slapstick romantic satirical and ironic features original entries from a diverse group of multidisciplinary international contributors in the century after 1530 the empires of the habsburgs of spain and the ottoman turks fought a maritime war that seemed destined to lead nowhere lasting peace was as unlikely as final triumph in part because the salient feature of this conflict was a violent form of piracy practiced by the corsairs of north african and malta it was fundamentally a war of unequal means since the habsburgs of spain had too few good warships and the ottomans too many bad ones christendom and islam engaged in a war fought largely through the exercise of private violence the hospitaller knights of malta and ghazi captains of north africa succeeded in imposing their crusading ethos on the mediterranean if a degree of futility loomed over these campaigns it was nevertheless true that the mediterranean witnessed a sustained conflict which in scale and intensity was far greater than that of any contemporary form of warfare at sea moreover the sea was never abandoned as until at least 1620 large galley fleets continued to patrol the inland sea the raiding methods employed by elizabethan seadogs like sir francis drake would certainly not have worked in this theatre of arms as the defences in italy and north africa were much more formidable than those of the atlantic phillip williams begins with a detailed examination of the oared warships used in these campaigns he then explores the structures of political and military organization and the role of geography and the environment in shaping the fighting stressing that the italian territories were of vital significance to the habsburgs of spain he considers the cultural and historical outlook of protagonists such as the habsburg rulers charles v and philip ii and the ottoman sultan süleyman the magnificent examining the extent to which the dictates of prudence triumphed over ideals of performing the service of god providing a unique perspective on early modern maritime conflict this book will be essential reading for all students and researchers of mediterranean history and the early modern world with an approach both personal and symbolic this volume leads us through the imagined worlds delusions discoveries questions hopes ambivalences 1929 of a popular book series with bright yellow covers the italian word giallo yellow has come to define a whole spectrum of mystery and detective fiction and films although most english speakers associate the term giallo with the violent and erotic thrillers popular in the 1960s and 1970s from directors like mario bava dario argento lucio fulci and others the term encompasses a wide range of italian media such as mysteries thrillers and detective stories even comedies and political pamphlets as films like blood and black lace 1964 and deep red 1975 have received international acclaim
