Public Records and Archives in Classical Athens

2018-02-01

in this book james sickinger explores the use and preservation of public records in the ancient athenian democracy of the archaic and classical periods athenian public records are most familiar from the survival of inscribed stelai slabs of marble on which were published decrees treaties financial accounts and other state documents working largely from evidence supplied by such inscriptions sickinger demonstrates that their texts actually represented only a small part of athenian record keeping more numerous and more widely used he says were archival texts written on wooden tablets or papyri that were made and often kept for extended periods of time by athenian officials beginning with the legislation of drakon in the seventh century b c sickinger traces the growing use of written records by the athenian state over the next three centuries concluding with an examination of the metroon the state archive of athens during the fourth century challenging assumptions about ancient athenian literacy democracy and society sickinger argues that the practical use and preservation of laws decrees and other state documents were hallmarks of athenian public life from the earliest times
