manufactured during this period by surveying examples depicted in
ramesside theban and memphite tombs ancient records show how the
procurement of furniture occurred at deir el medina while the design
and manufacturing of these furniture forms can be traced through a
series of furniture sketches that are annotated with a range of marks
and signs these designs are seen in surviving examples of furniture
from settlements such as medinet el gurob to facilitate the
manufacture of furniture procedures were developed that were managed
by cooperatives of egyptian artisans these groups established a
recognisable egyptian furniture style that was employed throughout the
ramesside world depictions of furniture used by the ruling ramesside
elite are examined including a remarkable collection of furniture used
by rameses iii illustrations of which could once be found in a painted
wall scene in his tomb kv11 and still seen carved on the walls of his
temple at medinet habu these illustrations show how royal furniture
was used as a symbolic tool to promote the ramesside empire at the
edges of its sphere of influence temple furniture was also used to
serve a religious purpose in the rituals performed by ramesside
priests these forms are also analysed in this volume this third volume
contains a catalogue of known egyptian furniture preserved in world
museums that augments those catalogues found in the first two volumes
of this series the author also provides a distribution list with
illustrations of a number of replica pieces of woodwork made by him
that can now be found preserved in several museums and collections the
purpose of these replica pieces has been to analyse the design and
construction techniques used by egyptian carpenters using a range of
replica woodworking tools this book showcases over 100 cutting edge
research papers from the 4th international conference on research into
design icord 13 the largest in india in this area written by eminent
researchers from over 20 countries on the design process methods and
tools for supporting global product development gpd the special
features of the book are the variety of insights into the gpd process
and the host of methods and tools at the cutting edge of all major
areas of design research for its support the main benefit of this book
for researchers in engineering design and gpd are access to the latest
quality research in this area for practitioners and educators it is
exposure to an empirically validated suite of methods and tools that
can be taught and practiced explorations in automatic thesaurus
discovery presents an automated method for creating a first draft
thesaurus from raw text it describes natural processing steps of
tokenization surface syntactic analysis and syntactic attribute
extraction from these attributes word and term similarity is
calculated and a thesaurus is created showing important common terms
and their relation to each other common verb noun pairings common
expressions and word family members the techniques are tested on
twenty different corpora ranging from baseball newsgroups
assassination archives medical x ray reports abstracts on aids to
encyclopedia articles on animals even on the text of the book itself
the corpora range from 40 000 to 6 million characters of text and
results are presented for each in the appendix the methods described
in the book have undergone extensive evaluation their time and space
complexity are shown to be modest the results are shown for convergence to
a stable state as the corpus grows the similarity is assessed and deci

venom research and technology has advanced greatly rapidly transforming our knowledge of reptile venoms research advances like the development of molecular systematics provide the framework necessary to reconstruct the evolutionary history of glands and fangs such research developments have expanded our understanding of venom s evolution and its usefulness in therapeutic development the results of this punctuated toxin molecular evolutionary expansion include protein neofunctionalization while these changes may impact antivenom efficacy this molecular diversity also facilitates their usefulness in the development of novel drug therapies venomous reptiles and their toxins brings together the world s leading toxinologists in this comprehensive study of the entire scope of reptile venoms from clinical effects to evolution to drug design and development the book contains detailed applied chapters on clinical care of the envenomed patient ineffective traditional or modern remedies occupational considerations involved in the maintenance of institutional venomous reptile collections veterinary care for venomous reptiles and research methods used in venom research this book also devotes a chapter to each toxin class found in reptile venoms detailing the full trajectory of research on the peptide or protein in question these chapters discuss each toxin s respective role in the envenomation process through to how each has been explored for their biomedical potential this book is a unique resource for anyone working with venomous reptiles

God With Us - CTL - 2009

2015-05-13

This photographic book sheds new light upon the architectural and decorative elements of domestic doorways from nineteenth and early twentieth century Cairo. Previous studies on the subject have been few and far between and have paid more attention to the Cairo of Khedive Ismail the New Quarter of the city. Enter in Peace focuses instead on those doorways of houses built in Cairo's older neighborhoods and inhabited by Egypt's middle classes. Included here are over 150 photographs illustrating eighty-one of these doorways as well as the façades of the buildings in which they appear. The book records their dimensions and their various architectural and stylistic elements from the structure of doors, lintels and paneling to common designs and motifs built during a period of great change and modernization in Egypt. These doorways reflect the Ottoman, European, Neo-Pharaonic and Islamic Revival architectural styles prevalent at the time. Ahmed Abdel Gawad has made a careful study of these historic doorways with descriptive comments on the houses' original owners and dates of construction, drawing on tax records and historical documentation to present them in context. Handsomely illustrated and thoroughly researched, Enter in Peace provides an important visual record of Cairo's rapidly disappearing architectural heritage.

Venomous Reptiles and Their Toxins

2007

First published in 1998, this book formed part of an ongoing effort to restore politics and history to the centre of Blake studies. It adopts a three-pronged approach when presenting its essays, seeking to promote a return to the political Blake, to deepen the understanding of some of the conversations articulated in Blake's art by introducing new historical material or new interpretations of texts, and to highlight differing perspectives on Blake's politics among historically focused critics. The collection contains essays with varying methodological assumptions and differing positions on questions central to historicist Blake scholarship.

Enter in Peace
