On the Discordancies of Existing Meteorological Standards. A Letter to the President, Royal Society 1869 excerpt from the aneroid barometer its construction and use the fact that the first edition of this little manual is entirely exhausted is a sufficient indication that it supplied a want as the use of the aneroid barometer is on the increase the presumption is that there will be a further demand for this book of tables and instructions it has been thought advisable to rearrange the matter and to increase it by fuller descriptions of different instruments and what is of more importance to the novice in measuring altitudes to add a number of examples another table has also been added to the collection of the previous edition about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
