2014-09-10 computer science computation and language submitted on 10 sep 2014 v1 last revised 14 dec 2014 this version v3 sequence to sequence learning with neural networks ilya sutskever oriol vinyals quoc v le deep neural networks dnns are powerful models that have achieved excellent performance on difficult

1406 2661 generative adversarial networks arxiv org

2014-10 we propose a new framework for estimating generative models via an adversarial process in which we simultaneously train two models a generative model g that captures the data distribution and a discriminative model d that estimates the probability that a sample came from the training data rather than g

1409 1556 very deep convolutional networks for large

2014-09-04 very deep convolutional networks for large scale image recognition karen simonyan andrew zisserman in this work we investigate the effect of the convolutional network depth on its accuracy in the large scale image recognition setting

generative adversarial nets neurips

□□□ we propose a new generative model 1 estimation procedure that sidesteps these difficulties in the proposed adversarial nets framework the generative model is pitted against an adversary a discriminative model that learns to determine whether a sample is from the model distribution or the data distribution
