Neighbourhood Policy and the Construction of the European External Borders 2015-06-02 this book looks both
backward and forward with regard to the european union s political strategies towards its neighbouring
countries by bringing together the perspectives of critical geopolitics policy studies and border studies
it presents a comprehensive review of the european neighbourhood policy and how it impacts the ongoing
construction of the eu s external frontiers is the eu committed to promoting integration in a wider
european space or is a fortress europe emerging where the strengthening of internal cohesion is coupled
with the militarisation of its external borders the book aims to problematize this question by showing how
the eu s external policies are based on a mixture of openness and closure inclusion and exclusion
cooperation and securitisation the european neighbourhood policy is a controversial strategy where
regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces
proceed side by side in an explicit attempt to construct a selective mobile and fragmented border a
specific focus is devoted to the diversity of geo strategies the eu is pursuing in its neighbouring
countries and regions macro regional strategies and cross border cooperation initiatives as new scales of
cooperation and the role of other global players
The Other '68ers 2016-02-23 this is a history of 1968 written from a new perspective that of center right
student activists in west germany based on oral history interviews and new archival sources it examines the
ideas experiences and repertoires of center right students in this age of protest writing these activists
back into the history of 1968 and its afterlives including student protest cultural revolt internationalism
debates about left wing violence and the terror of the red army faction the memory wars of the 1980s and

beyond reveals that this was a broader more versatile and ultimately more consequential phenomenon than the traditionally narrower focus on a left wing minority allows other 68ers demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years student activists comprised individuals from across the political spectrum who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of west german democracy 1968 was a moment of intense political conflict but it also played out within the student body and nurtured contrasting identities this book shows that the center right involvement in 1968 had real consequences many of the protagonists of this book would go on to pursue high profile political careers and leave their mark on west german political culture other 68ers therefore sheds fresh light on how west germany s center right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968 how it coped with generational change how it transformed and modernized after losing power at the national level for the first time in 1969 and how it managed to re emerge so successfully in the 1980s

China's Quest for Great Power 2015-05-12 this book examines china s national security strategy by looking at the three major elements foreign policy energy security and naval power all interactive and major influences on china s future and its relations with the united states a decade and a half into the twenty first century beijing requires reliable access to energy resources the navy to defend that access and foreign policies to navigate safely toward its goals most importantly the people s liberation army navy plan must be able to safeguard china s regional maritime interests especially the sovereignty disputes involving taiwan and the yellow east china and south china seas many chinese naval officers and analysts think the united states is determined to contain china and prevent it from achieving the dominant historical position to which it is entitled this view has been strengthened by washington s shift to asia transfer of naval units to the pacific and the march 2015 maritime strategy released by the u s navy marine corps and coast guard china s relationship with the united states is vital to both countries and to the world the relationship is based on both common and divergent interests in economics military operations and political goals and methods china s international trading economy and ambition for a world class navy require effective foreign diplomacy and participation in global affairs this policy trifecta in large part defines china s posture to the world beijing is approximately halfway toward its mid century goal of deploying a navy capable of defending china s perceived maritime interests china s priorities follow president xi jinping s definition of national security as comprehensive encompassing politics the military the economy technology the environment and culture what this means for future chinese foreign policy choices as naval modernization and energy security concerns enable different courses of action lies at the center of this book s conclusions

Sustainable Governance in Hybrid Organizations climate change is a pressing international political issue for which a practical but principled solution is urgently required climate justice in a non ideal world aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy the motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances in the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment however there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter the aim of this edited volume is to address this in doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy the first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change the second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal the chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics
