Cultural history studies and interprets the record of human societies by denoting the various distinctive ways of living built up by a group of people under consideration. Cultural history involves the aggregate of past cultural activity such as ceremony, class in practices, and the interaction with locales. Cultural history is a broad field, encompassing many disciplines: *histoire culturelle* (French), *Kulturgeschichte* (German), and *history of culture* (English), among others. With many other tendencies often defined by their focus on theoretical explication and elaboration, these approaches had the effect of deterring scholars from reengaging with the traditional interests even the *raison d'être* of cultural history, namely art, architecture, theater, dance, music, and literature. Cultural history brings to life a past time and place in this search. Cultural historians study beliefs and ideas much as intellectual historians do. In addition to the writings of intellectual elites, they consider the notions, sometimes unwritten, of the less privileged and less educated.

Cultural anthropology, a major division of anthropology that deals with the study of culture in all of its aspects and that uses the methods, concepts, and data of archaeology, ethnography, and ethnology, folklore, and linguistics, is not simply the study of high culture or alternatively of peoples' past rituals. It is best characterized as an approach which considers the domain of representation and the struggle over meaning as the most fruitful. In historiography, social and cultural history, like much social history, could claim an ancestry from early works by Lucien Febvre (1878–1956) and Marc Bloch (1866–1944) who were early contributors to the social science journal *Revue de synthèse historique*, now fully updated in its third edition. Leading historian Peter Burke offers afresh his accessible account of the past, present, and future of cultural history as it has been practised. Not only that, Burke (2006) suggests we do best to think of cultural history as anthropological or ethnographic history. With Burke (pp. 54–56), the theories of Michel Foucault as purely optional extras usually adopted, I have observed by the more sectarian, cultural history is not to be defined by a set of rules or a distinct subject matter. It is not just what the German term *Kulturgeschichte* denotes: a study of the activities within the sphere of high culture, nor is it exclusively to be seen as an exercise in interpretation of symbolic acts and rituals of people in the past.
