

1

Alan Tucker

2007

this edition explains how to reason and model combinatorically it also stresses the systematic analysis of different possibilities exploration of the logical structure of a problem and ingenuity

Applied Combinatorics

1984

when tucker s people was published in 1943 it was praised by the new york times for its blowtorch intensity the idea for tucker s people stemmed from ira wolfert s coverage as a reporter of the trial of james jimmy hines a tammany hall district leader who was prosecuted by thomas e dewey for letting dutch schultz take over the numbers game in new york it is a penetrating sympathetic novel of frustration and insecurity a story of little people many of them decent people battling against forces they are too feeble to resist and too simple to understand according to the saturday review of literature

Selected Solutions for Applied Combinatorics

1997

siskiyou county library has vol 1 only

Tucker's People

2016-02

the new 6th edition of applied combinatorics builds on the previous editions with more in depth analysis of computer systems in order to help develop proficiency in basic discrete math problem solving as one of the most widely used books in combinatorial problems this edition explains how to reason and model combinatorically while stressing the systematic analysis of different possibilities exploration of the logical structure of a problem and ingenuity although important uses of combinatorics in computer science operations research and finite probability are mentioned these applications are often used solely for motivation numerical examples involving the same concepts use more interesting settings such as poker probabilities or logical games

1990

mathematics today is approaching a state of crisis as the demands of science and society for mathematical literacy increase the percentage of american college students intending to major in mathematics plummets and achievement scores of entering college students continue their unremitting decline as research in core mathematics reaches unprecedented heights of power and sophistication the growth of diverse applied specialties threatens to fragment mathematics into distinct and frequently hostile mathematical sciences these crises in mathematics presage difficulties for science and engineering and alarms are beginning to sound in the scientific and even in the political communities citing a trend towards virtual scientific and technological illiteracy and a shrinking of our national commitment to excellence in science mathematics and technology a recent study conducted for the president by the u s national science foundation and department of education warns of serious impending shortcomings in public understanding of science today people in a wide range of non scientific professions must have a greater understanding of technology than at any time in our history yet our educational system does not now provide such understanding the study goes on to conclude that present trends pose great risk of manpower shortages in the mathematical and engineering sciences the pool from which our future scientific and engineering personnel can be drawn is in danger of becoming smaller even as the need for such personnel is increasing it is time to take a serious look at mathematics tomorrow

Lucy Pearson's lively and engaging book examines British children's literature during the period widely regarded as a second golden age, drawing extensively on archival material. Pearson investigates the practical and ideological factors that shaped ideas of good children's literature in Britain, with particular attention to children's book publishing. Pearson begins with a critical overview of the discourse surrounding children's literature during the 1960s and 1970s, summarizing the main critical debates in the context of the broader social conversation that took place around children and childhood. The contributions of publishing houses, large and small, to changing ideas about children's literature become apparent as Pearson explores the careers of two enormously influential children's editors: Kaye Webb of Puffin Books and Aidan Chambers of Topliner Macmillan. Brilliant as an innovator of highly successful marketing strategies, Webb played a key role in defining what were, in her words, 'the best in children's books'. While Chambers' work as an editor and critic illustrates the pioneering nature of children's publishing during this period, Pearson shows that social investment was a central factor in the formation of this golden age and identifies its legacies in the modern publishing industry, both positive and negative.

The Chance

2006-12-01

本書は、児童文学の黄金時代と呼ばれる1960年代から1970年代にかけての児童文学の発展を、出版業界の内部から探る。著者は、この時代の児童文学の発展に、出版業界のリーダーたち、特にPuffin BooksのKaye WebbとTopliner MacmillanのAidan Chambersの果たした役割に焦点を当て、彼らのキャリアと出版戦略を詳しく分析する。また、この時代の児童文学の発展に、社会投資が果たした役割についても、著者は詳しく分析する。本書は、児童文学の黄金時代の歴史を、出版業界の内部から探るという点で、非常に興味深い。全300ページ、ハードカバー、2006年12月1日発行。

児童文学の黄金時代 1960年代から1970年代

1988

books in the life of a child explores the value of books and reading in the stimulation of children's imagination and their fundamental importance in the development of language and true literacy it examines not only the vast range of children's books available but also how to introduce young people to the joys of reading in the home the school and in the community the book has been written as a resource for all adults especially teachers student teachers librarians and parents and those who care about the value of literature for children it is a comprehensive and critical guide with chapters on the history of children's literature and an analysis of its many forms and genres from poetry fairytale myth legend and fantasy through realistic and historical fiction to humour pulp fiction and information books

Siskiyou National Forest (N.F.), Silver Fire Recovery Project

1989

in most mathematics textbooks the most exciting part of mathematics the process of invention and discovery is completely hidden from the student the aim of knots and surfaces is to change all that knots and surfaces guides the reader through euler's formula one and two sided surfaces and knot theory using games and examples by means of a series of carefully selected tasks this book leads the reader on to discover some real mathematics there are no formulas to memorize no procedures to follow this book is a guide to the mathematics it starts you in the right direction and brings you back if you stray too far discovery is left to you this book is aimed at undergraduates and those with little background knowledge of mathematics

henry o pollak chairman of the international program committee bell laboratories murray hill new jersey usa the fourth international congress on mathematics education was held in berkeley california usa august 10 16 1980 previous congresses were held in lyons in 1969 exeter in 1972 and karlsruhe in 1976 attendance at berkeley was about 1800 full and 500 associate members from about 90 countries at least half of these come from outside of north america about 450 persons participated in the program either as speakers or as presiders approximately 40 percent of these came from the u s or canada there were four plenary addresses they were delivered by hans freudenthal on major problems of mathematics education hermina sinclair on the relationship between the learning of language and of mathematics seymour papert on the computer as carrier of mathematical culture and hua loo keng on popularising and applying mathematical methods george polya was the honorary president of the congress illness prevented his planned attendance but he sent a brief presentation entitled mathematics improves the mind there was a full program of speakers panelists debates miniconferences and meetings of working and study groups in addition 18 major projects from around the world were invited to make presentations and various groups representing special areas of concern had the opportunity to meet and to plan their future activities

Higher Education in South Africa

1987

upon receiving his execution date one of the thousands of men living on death row in the united states had an epiphany all there ever is is this moment you me all of us right here right now this minute that s love right here right now collects the powerful first person stories of dozens of men on death rows across the country from childhood experiences living with poverty hunger and violence to mental illness and police misconduct to coming to terms with their executions these men outline their struggle to maintain their connection to society and sustain the humanity that incarceration and its daily insults attempt to extinguish by offering their hopes dreams aspirations fears failures and wounds the men challenge us to reconsider whether our current justice system offers actual justice or simply perpetuates the social injustices that obscure our shared humanity

The Bombing of Darwin

1988

it was going on ten o clock the next morning when luther heard a car pull into the ranch yard he opened the barn door and saw the suv the driver s and two back doors open and three people got out luther stopped in his tracks now who in the heck was this could it be his new southern cook had two children why hadn t he mentioned that little bit of news on the phone yesterday well we ll see about this he wasn t a happy man luther walked purposely toward the car that stood by the front porch just then a chilled wind whipped the lady s hat away the woman s hair free of its confine flew out like a blond flag streaming in the wind she reached up grabbing at her hair as the same frisky wind opened

her coat wide enough for luther to catch a glimpse of this delightfully shaped lady oh wow luther s anger was momentarily forgotten that she was here to interview for a job myohmy some southern lady was all he could think as he walked toward her he swept up her hat that was tumbling along the ground welcome to rocking horse ma am i m luther strong bow he was rather proud of being able to overcome his surprise i m miss golight sir oh that velvety southern voice lord help me now ah pleased to meet you we d better go in as the storm looks to be arriving earlier than expected he said and offered the hat back to her luther opened the front door and caught a whiff of some light perfume as she passed by him causing his nose to quiver like a rabbit s whoa boy that s not a good sign luther struggled to bring himself back to a business like mode
