

today s american popular culture makes it even inevitable to not be faced with vampires on television in advertisement on cereal boxes or even in educational programs for children the undead has always been appealing to viewers especially of the horror and fantasy genre zombies ghosts demons mummies and vampires have been present in movies and on television ever since the invention of the motion picture at the turn of the twentieth century it is the otherness of such monsters their frightful darkness and exoticism that makes them so interesting since the turn of the twenty first century a striking popularity of the undead figure of the vampire in american popular culture is particularly notable since f w murnau s masterpiece nosferatu in 1922 it is not possible anymore to imagine cinema and television without these nocturnal creatures the vampire has always been serving as a metaphor for something strange for anxieties and hidden desires in society what it has in common with other undead figures in american popular culture is its representation as a monster the vampires otherness their mystical darkness hypnotizing men seducing women longing for life and its taste in human blood that is what makes the figure of the vampire so extraordinary fascinating and engaging to today s movie and television audience this thesis deals with the figure of the vampire regarded as the unknown other and how it is fictionally represented in the american tv series true blood 2008 the thesis argues that the figure of the vampire in postmodern american popular culture lost some of its otherness to a certain extent and cannot be regarded as a monster per se anymore
