Theorizing Discrimination in an Era of Contested Prejudice 2009-08-15 despite several decades of attention there is still no consensus on the effects of racial or sexual discrimination in the united states in this landmark work the well known sociologist samuel lucas shows how discrimination is not simply an action that one person performs in relation to another individual but something far more insidious a pervasive dynamic that permeates the environment in which we live and work challenging existing literature on the subject lucas makes a clear distinction between prejudice and discrimination he maintains that when an era of condoned exploitation ended the era of contested prejudice as he terms it began he argues that the great strides made in the 1950s and 1960s repudiated prejudice but not discrimination drawing on critical race theory feminist theory and a critique of dominant perspectives in the social sciences and law lucas offers a new understanding of racial and sexual discrimination that can guide our actions and laws into a more just future

**The Future of Prejudice** 2007-01-19 established psychoanalytic psychodynamic researchers and theorists bring the exploration of prejudice to a new level by examining how psychoanalysis might elucidate strategies that will eliminate prejudice

*Neuroscience of Prejudice and Intergroup Relations* 2013-06-19 psychological research on the origins and consequences of prejudice discrimination and stereotyping has moved into previously uncharted directions through the introduction of neuroscientific measures psychologists can now address issues that are difficult to examine with traditional methodologies and monitor motivational and emotional as they develop during ongoing intergroup interactions thus enabling the empirical investigation of the fundamental biological bases of prejudice however several very promising strands of research have largely developed independently of each other by bringing together the work of leading prejudice researchers from across the world who have begun to study this field with different neuroscientific tools this volume provides the first integrated view on the specific drawbacks and benefits of each type of measure illuminates how standard paradigms in research on prejudice and intergroup relations can be adapted for the use of neuroscientific methods and illustrates how different methodologies can complement each other and be combined to advance current insights into the nature of prejudice this cutting edge volume will be of interest to advanced undergraduates graduates and researchers students who study prejudice intergroup relations and social neuroscience

**Interpersonal Rejection** 2006-08-24 interpersonal rejection ranks among the most potent and distressing events that people experience romantic rejection ostracism stigmatization job termination and other kinds of rejections have the power to compromise the quality of people's lives as a result people are highly motivated to avoid social rejection and indeed much of human behavior appears to be designed to avoid such experiences yet despite the widespread effects of real anticipated and even imagined rejections psychologists have devoted only passing attention to the topic and the research on rejection has been scattered throughout a number of psychological subspecialties e.g. social clinical developmental personality in the past few years however we have seen a surge of interest in the effects of interpersonal rejection on behavior and emotion the goal of this book is to pull together the contributions of several scholars whose work is on the cutting edge of rejection research providing a scholarly yet readable overview of recent advances in the area in doing so it not only provides a look at the current state of the area but also helps to establish the topic of rejection as an identifiable area for future research topics covered in the book include ostracism unrequited love betrayal stigmatization rejection sensitivity rejection and self esteem peer rejection in childhood emotional responses to rejection and personality moderators of reactions to rejection

Handbook of Employment Discrimination Research 2008-06-06 this volume contains a collection of original papers by leading legal scholars and social scientists that develop new perspectives on anti discrimination law with an emphasis on employment discrimination the articles were written for a conference held at stanford law school in spring 2003 that was sponsored by the american bar foundation and stanford law school the purpose of that conference this volume and ongoing work by the discrimination research group based at the american bar foundation and the center for advanced study in the behavioral sciences is to advance the social scientific understanding of employment discrimination and the operation of employment discrimination law as a social system and to consider the legal and policy implications of this emerging body of social science now is a pivotal moment for an attempt at a deeper understanding of discrimination and law after three decades of theoretical development and empirical research on employment discrimination and its treatment in law it is crucial that lawyers social scientists and policymakers assess what we know and do not know about employment discrimination and its treatment by

law to date there are several streams of active research that only occasionally engage with each other economists and sociologists continue to debate the extent to which women minorities and other traditionally disadvantaged groups faced discrimination in labor markets and organizations organization scholars and legal scholars have begun to map the effect of anti discrimination law on organizational structures and processes and to raise questions about the extent to which the legalization of organizational employment systems represents symbolic or substantive changes in employment practices
