<u>Cannabis</u> 2016-06-28 cannabis evolution and ethnobotany is a comprehensive interdisciplinary exploration of the natural origins and early evolution of this famous plant highlighting its historic role in the development of human societies cannabis has long been prized for the strong and durable fiber in its stalks its edible and oil rich seeds and the psychoactive and medicinal compounds produced by its female flowers the culturally valuable and often irreplaceable goods derived from cannabis deeply influenced the commercial medical ritual and religious practices of cultures throughout the ages and human desire for these commodities directed the evolution of the plant toward its contemporary varieties as interest in cannabis grows and public debate over its many uses rises this book will help us understand why humanity continues to rely on this plant and adapts it to suit our needs

Ethnobotany 2008-05-19 published on the 100th anniversary of the science of ethnobotany this volume provides a comprehensive summary of the history and current state of the field the 36 articles present a truly global perspective on the theory and practice of today s ethnobotany this book is only available through print on demand all interior art is black and white

Cannabis 2013 cannabis evolution and ethnobotany is a comprehensive interdisciplinary exploration of the natural origins and early evolution of this famous plant highlighting its historic role in the development of human societies *Plant Resins* 2003 few people are aware of the great diversity of resin producing plants or the remarkable roles resins play in the lives of plants and people plant resins tells the whole story about these fascinating plant products

Evolutionary Ethnobiology 2015-09-23 ethnobiology is a fascinating science to understand this vocation it needs to be studied under an evolutionary point of view that is very strong and significant although this aspect is often poorly approached in the literature this is the first book to compile and discuss information about evolutionary ethnobiology in english

Ethnobotany for Beginners 2017-02-14 designed for new scholars this book features a quick and easy to read discussion of ethnobotany along with its major developments the language is clear and concise objective and straightforward and structured to lead the reader from the beginning of this science to the most recent developments while there are some books on ethnobotany mainly dealing with methods this book covers the topic in an introductory and comprehensive text that prepares the reader for more advanced study of ethnobotany

Ethnobotany of the Himalayas 2021-07-29 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this website and its dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly the various societies like the society for economic botany the international society of ethnopharmacology the society of ethnobiology and the international society for ethnobiology currently have thousands of members growth has been most robust in bric countries this new mrw on ethnobotany of the himalayas takes advantage of the increasing international interest and scholarship in the field of mountain research it includes the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants in the himalayas each contribution is scientifically rigorous and contributes to the overall field of study

Ethnobotany of Mexico 2016-04-23 this book reviews the history current state of knowledge and different research approaches and techniques of studies on interactions between humans and plants in an important area of agriculture and ongoing plant domestication mesoamerica leading scholars and key research groups in mexico discuss essential topics as well as contributions from international research groups that have conducted studies on ethnobotany and domestication of plants in the region such a convocation will produce an interesting discussion about future investigation and conservation of regional human cultures genetic resources and cultural and ecological processes that are critical for global sustainability Systematics, Evolution, and Ethnobotany of a Domesticated Squash, Cucurbita Argyrosperma 1991 this book emerged from a series of lectures on crop evolution at the faculty of agriculture of the hebrew university of jerusalem while many textbooks are available on general evolution only a few deal with evolution under domestication this book is a modest attempt to bridge this gap it was written for advanced undergraduate and graduate students in the fields of crop evolution ethnobotany plant breeding and related subjects evolution under domestication is unique in the general field of plant evolution for three main reasons a it is recent having started not much more than 10 000 years ago with the emergence of agri culture b the original plant material i e the wild progenitors of many important crop plants still grow in their natural habitats c man played in this process these factors enable a more reliable a major role assessment of the impact of different evolutionary forces such as hybridization migration selection and drift under new circumstances interestingly a great part of evolution under domestication has been unconscious and a result of agricultural practices which have created a new selection criteria mostly against characters favored by natural selec tion introducing crop plants to new territories exposed them to different ecological conditions enhancing selection for new characters diversity in characters associated with crop plants evolution is virtually absent in their wild progenitors and most of it has evolved under domestication Plant Evolution under Domestication 2012-12-06 the study of european wild food plants and herbal medicines is an old discipline that has been invigorated by a new generation of researchers pursuing ethnobotanical studies in fresh contexts modern botanical and medical science itself was built on studies of medieval europeans use of food plants and medicinal

herbs in spite of monumental changes introduced in the age of discovery and mercantile capitalism some communities often of immigrants in foreign lands continue to hold on to old recipes and traditions while others have adopted and enculturated exotic plants and remedies into their diets and pharmacopoeia in new and creative ways now in the 21st century in the age of the european union and globalization european folk botany is once again dynamically responding to changing cultural economic and political contexts the authors and studies presented in this book reflect work being conducted across europe s many regions they tell the story of the on going evolution of human plant relations in one of the most bioculturally dynamic places on the planet and explore new approaches that link the re evaluation of plant based cultural heritage with the conservation and use of biocultural diversity

Systematics, Evolution, and Ethnobotany of the Flora of Mount Kinabalu 2001 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a guickly changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this website and its dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly the various societies society for economic botany international society of ethnopharmacology society of ethnobiology international society for ethnobiology and many regional and national societies in the field currently have thousands of members growth has been most robust in bric countries the objective of this new mrw on ethnobotany of mountain regions is to take advantage of the increasing international interest and scholarship in the field of mountain research we anticipate including the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region each contribution will be scientifically rigorous and contribute to the overall field of study

Systematics, Evolution and Ethnobotany of the Flora of Mount Kinabalu 2001 the treatise presents a wide range of information on different facets of world food crops it justifies the present state of knowledge with reference to crop history initial and latest developments with evolutionary approach based on karyotaxonomic and geographical evidence the author has endeavored to dilate attempts for crop domestication and cultivation by worldwide human societies these are supported by various considerations like ethnology philology ancient and religious treatises archaeological evidence works of pioneers various human affairs etc he further based his writing on botanical conclusions accrued from distribution number of varieties occurrence of wild types agro botanical characteristics time and place of origin and worldwide usage of each crop species the treatise is a highly acclaimed source of information of crop plants useful to degree and post graduate students of botany agriculture and food science as a main text and reference work for researchers it is recommendable for use in any country especially in the english speaking world it will also appeal to the general reader being rich in contents in a nutshell this treatise is a history of development of food crops and therefore a humble attempt has been made first to ascertain what was actually done or said and second to emphasize the causes of success or failure truly it is the study of causes that makes history more fruitful and a basis for evaluating the future events with confidence

Ethnobotany of the Mountain Regions of Mexico 2023-05-31 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly various societies of such professionals include the society for economic botany the international society of

ethnopharmacology the society of ethnobiology the international society for ethnobiology and many regional and national societies in the field that currently have thousands of members growth has been most robust in bric countries the objective of this new mrw on ethnobotany of mountain regions is to take advantage of the increasing international interest and scholarship in the field of mountain research we anticipate including the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region each contribution will be scientifically rigorous and contribute to the overall field of study

Food Crops: Evolution, Diversity and Advances 2019-01-10 the present book comprises of two sections a and b section a has the text of the lectures during the training course in ethnobotany and the section b has some of the material and exercise handled by the trainees during the workshop and in practical classes the sequence of the lectures has been so arranged as to gradually and step by step introduce the scope methodology and applications of the subject along with the subjects of preparation of scientific papers and research projects this book will not only popularize the important subject of ethnobotany but will also provide basic instructions for person freshly interested or inducted into this discipline Ethnobotany of the Andes 2020-08-02 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly various societies of such professionals include the society for economic botany the international society of ethnopharmacology the society of ethnobiology the international society for ethnobiology and many regional and national societies in the field that currently have thousands of members growth has been most robust in bric countries this new mrw on ethnobotany of mountain regions covers the latest scholarship in the field of mountain research it offers the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region each contribution was scientifically rigorous and contributes to the overall field of study

Ethnobotany of the Mountain Regions of Far Eastern Europe 2020-07-15 the contributions gathered together in this volume analyse the link that humankind establishes with nature examining the way in which a dialogue has been initiated between these two worlds and how it has evolved from a geographical point of view the text takes the reader to africa america asia and europe via brazil canada china ethiopia france somalia switzerland tibet tunisia ukraine and the united states providing a meeting ground between plants and humanity in different dimensions

Manual of Ethnobotany, 2nd Revised Ed. 2010-03-01 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly various societies of such professionals include the society for economic botany the international society of ethnopharmacology the society of ethnobiology the international society for ethnobiology and many regional and national societies in the field that currently have thousands of members growth has been most robust in bric countries this new mrw on ethnobotany of mountain regions covers the best and latest research and scholarship in the field of mountain research it offers a full range of descriptive methodological theoretical and applied research on the most important plants for each region each contribution was examined with scientific rigor and contributes to the overall field of study Ethnobotany of the Andes 2020-08-01 the caucasus mrw online and print volume will cover this european macroregion the content will focus on the ethnobotany of wild plants in this macroregion and it will be first developed as an online site and later when all of the planned topics have been covered for this specific volume printed in a hard copy version the online site will remain live and be available for updates with new monographs if not covered initially due to lack of research the content will be divided into sections covering countries or groups of countries based on plant diversity and not necessarily political or

national boundaries the caucasus volume will have an introduction 4 000 6 000 words 50 200 plant monographs 10 to maximum 50 monographs per country with each monograph having a length of 1 500 words with references plus 2 4 photographs to further define the content the plant monographs will be divided into five major categories food medicine cosmetic veterinary handicraft plants and ritual folkloric uses and include notes the number of the monographs in every category will be negotiated depending on the advances of the ethnobotanical research in each specific country or group of countries the main criteria for the inclusion of a given plant will be its cultural salience within a given country assessed by the volume editor references will be given at the end of the introduction and each monograph

Herbs and the Evolution of Human Societies 2022-02-14 research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development it has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly

changing environment trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market scholars in plant sciences worldwide will be interested in this website and its dynamic content the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly the various societies society for economic botany international society of ethnopharmacology society of ethnobiology international society for ethnobiology and many regional and national societies in the field currently have thousands of members growth has been most robust in bric countries the objective of this new mrw on ethnobotany of mountain regions is to take advantage of the increasing international interest and scholarship in the field of mountain research we anticipate including the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region each contribution will be scientifically rigorous and contribute to the overall field of study

Ethnobotany of the Mountain Regions of Central Asia and Altai 2020-08-14 part of the journal of the royal anthropological institute special issue book series this landmark volume assesses the contribution of recent work in ethnobiology to anthropological thought considers the ways in which the subject matter and methodologies of ethnobiological research address core anthropological questions contributors explore a wide range of themes such as our understanding of those processes which transform the environment and the evolution of the cultural mind addresses anthropological issues of general interest from biology to reflexivity helps to develop the productive relationship between ethnobiology and anthropology

Ethnobotany of the Caucasus 2017-07-21 the book introduction to ethnography discusses how indigenous people use plants for food medicine cultural customs housing fuel and transportation it discusses the evolution of ethnobotany and the formation of this field over the years ethnobotany is described as the study of the connection between people in their indigenous societies and their plant ecosystem this book aims to study culturally based biological and environmental understanding cultural perception and perception of the natural world including related behaviors and activities it also mentions the naming and classification process of plants by community members and points out that different communities may use the same plants in different ways

Ethnobotany, Evolution, and Chemistry of Medicinal Bryophytes 2006 excerpt from irish ethno botany and the evolution of medicine in ireland the religion of early ireland consisted largely of nature worship the primitive celt sought everywhere for an ti ta he who is as a follower of the druids he worshipped groves and held in veneration the oak and the mistletoe the moun tains rivers and seas claimed his attention and were objects which called forth his greater naturism these again he peopled with naiads dryads fauns and fairies his pan theon extended to the seas around and to the skies above about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Ethnobotany of the Mountain Regions of Brazil 2023-07-09 this volume is a compendium of selected plant species of ethnobotanical value to the highland communities of popular southeast asia traditional knowledge held by local communities on their resources is always in flux and adapting to a quickly changing environment new plants find their entry into the local pharmacopoeias while existing ones maybe removed likewise various local communities might find the same plant useful for completely different purposes while compiling information on the species authors have taken great care to ensure that the dynamic nature of ethnobotanical knowledge is represented adequately special emphasis has also been given to cultural value of species to the local communities in the region the field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly the various societies society for economic botany international society of ethnopharmacology society of ethnobiology international society for ethnobiology and many regional and national societies in the field currently have thousands of members the objective of this new major reference work on ethnobotany of mountain regions of southeast asia is to take advantage of the increasing international interest and scholarship on highland landscapes and communities while ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic volume on the highlands of popular se asia is available in the market we include the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for the region scholars in plant sciences worldwide will also be interested in the dedicated website for this volume and its dynamic content

<u>Contributions to Botany</u> 1982 plants have cultural histories and their culturally known applications change through time and across contexts this pattern is seen in all types of uses that humans make of plants from trees used for construction through species used for perfume through to food plants however it is medicinal plants that have attracted considerable attention recently whether as a justification of plant conservation efforts or through the perception that direct use of medicinal plants may offer something that is not delivered by orthodox medicine this volume s two central aims are to demonstrate that plant knowledge is not paradigmatic positive knowledge but situational and arises in relationships and to show that modern medicinal plant discovery can be viewed as the epitome of a long history of borrowing stealing and exchanging plants

Irish Ethno-botany and the Evolution of Medicine in Ireland 1919 this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Ethnobiology and the Science of Humankind 2006-10-23 plants play a central role in human existence medicinal plants in particular have allowed for the continued survival of the human species this book based on over a decade of research in southern mexico with the highland maya explores the relationship between medicinal plants traditional ecological knowledge and the environment the biodiversity of the region remains among the highest in the world comprising more than 9000 plant species over 1600 employed for medicinal uses and knowledge for approximately 600 species is widespread medicinal plants play an overwhelmingly primary role in the daily health care of the highland maya three principal objectives are addressed 1 identifying which medicinal plants are used 2 determining the role of environmental variation on use and selection of medicinal plants and 3 identifying which habitats are preferred for medicinal plants explanations are presented from human ecology and biochemical ecology implications for conservation health and the environment are discussed

<u>Introduction to Ethnobotany</u> 2020-11 this book has been considered by academicians and scholars of great significance and value to literature this forms a part of the knowledge base for future generations so that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published hence any marks or annotations seen are left intentionally to preserve its true nature

Plans resins 2003 a founder of and leading thinker in the field of modern ethnobiology looks at the widespread regularities in the classification and naming of plants and animals among peoples of traditional nonliterate societies regularities that persist across local environments cultures societies and languages brent berlin maintains that these patterns can best be explained by the similarity of human beings largely unconscious appreciation of the natural affinities among groupings of plants and animals people recognize and name a grouping of organisms quite independently of its actual or potential usefulness or symbolic significance in human society berlin s claims challenge those anthropologists who see reality as a set of culturally constructed often unique and idiosyncratic images little constrained by the parameters of an outside world part one of this wide ranging work focuses primarily on the structure of ethnobiological classification inferred from an analysis of descriptions of individual systems part two focuses on the underlying processes involved in the functioning and evolution of ethnobiological systems in general originally published in 1992 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905

Irish Ethno-Botany and the Evolution of Medicine in Ireland (Classic Reprint) 2017-10-12 this case study illustrates the contemporary archaeological field of ethnobotany and explores the interrelationships between the prehistoric residents of a small valley in coastal ecuador and the dry tropical forest habitat in which they lived the work has three related objectives 1 it is an ethnobotany a work that explores how through the medium of culture people shape and are shaped by the environment in which they live 2 it is a work that synthesizes results of some 10 years of research done by pearsall during the jama archaeological paleoethnobotanical project and 3 it is a work that provides pearsall with the opportunity to illustrate paleoethnobotanical research methods an important component of contemporary interdisciplinary archaeology pearsall took as her subject the 3 600 year old archaeological record of the jama river valley in northern manabi ecuador and she determined what plants people selected for food fuel building materials and ritual evaluated the impact of agricultural activities on the tropical forest environment and examined the response of populations to volcanic ash fall disasters broken into four parts this case study starts with an introduction to the field of ethnobotany then goes on to describe pearsall s experiences doing field work in the jama river valley and the results of her research and concludes with an illustration of how ethnobotany fits into and contributes to archaeology
