Bulletin of the United States Bureau of Labor Statistics

1913

usa appraisal of some of the major technological changes having taken place in industry and of trends resulting therefrom the effect thereof on the employment situation and on the occupational structure and consequential adjustments in labour relations forecast by industry through 1970 with selected references at the end of the report on each industry selected bibliography pp 260 to 269

Technological Trends in Major American Industries

1966

log home design is the preferred trusted partner with readers in simplifying the process of becoming a log home owner with its exclusive focus on planning and design the magazine s friendly tone practical content and targeted advertising provide the essential tools consumers need from the crucial preliminary stages through the finishing touches of their dream log home

Log Home Design

2002-02

snow surveyors throughout the world get to see what most of us only dream about stunning terrain birdlife and animals rarely seen in lower elevations and stars that seem close enough to grab patrick armstrong reveals the little known world of a snow surveyor in this fascinating account transporting readers into the remote winter world of the sierra nevada in california high in the mountains armstrong and his companions must cross twelve thousand foot passes and dig through snow to gain entrance to rock or log cabins for shelter at night traveling on skis they often traverse more than a hundred miles each month during the winter and in the process climb and descend twenty or thirty thousand feet this account also provides important and practical information on topics such as safe winter travel on skis avalanche prediction and avoidance cabin life cooking on and maintaining wood burning stoves wildlife and birdlife whether you re involved in snow surveying and snowmelt water management or you re just someone who enjoys the winter wilderness and the mountains prepare yourself to enter a beautiful and remarkable winter world that has its dangers and sublime beauties

History of the Lumber and Forest Industry of the Northwest

1898

here are some 80 patents that had an influence on the growth of the u s navy be it on above or below the surface of the water each chapter is focused on important patents that shaped the growth of the navy be it in communications navigation surveillance the ship s structure itself weaponry medical and life saving administration and miscellaneous when we began researching the patents the first few came easy inventors like edison bell burroughs seversky marconi morse the wright brothers curtiss goodyear cousteau grumman etc easily made the first cut other inventors were harder to find yet their contribution to the advancement of the navy was nonetheless important one example would be the patented process of dive bombing on enemy vessels using submarine torpedoes patented in 1912 another would be the catapult for launching aircraft off ships patented in 1928

The Repertory Of Arts And Manufactures: Consisting Of Original Communications, Specifications Of Patent Inventions, And Selections Of Useful Practical Papers From The Transactions Of The Philosophical Societies Of All Nations, &c. &c

1801

looking into the earth comprehensively describes the principles and applications of both global and exploration geophysics on all scales it forms an introduction to geophysics suitable for those who do not necessarily intend to become professional geophysicists including geologists civil engineers environmental scientists and field archaeologists the book is organised into two parts part 1 describes the geophysical methods while part 2 illustrates their use in a number of extended case histories mathematical and physical principles are introduced at an elementary level and then developed as necessary student questions and exercises are included at the end of each chapter the book is aimed primarily at introductory and intermediate university students taking courses in geology earth science environmental science and engineering it will also form an excellent introductory textbook in geophysics departments and will help practising geologists archaeologists and engineers understand what geophysics can offer their work

The Repertory of arts and manufactures [afterw.] arts, manufactures and agriculture

1801

prosopis describes the enormous historical importance of these trees as a human food source and reviews the contemporary food science of the fruit derived from these trees as well this treatise reviews the native genetic resources of this genus on 4 continents and classical genetic and horticultural techniques that could help stabilize the environment and alleviate human suffering on some of the world s most destitute agro ecosystems this book is

an essential read for researchers interested in forestry and plant science environmental science and functional foods the legume family fabaceae contains many genera and species that through their nitrogen fixing process provide high protein food and feed for humans and animals as evidenced by its presence in death valley california which holds the record for the highest temperatures in the world these types of plants can thrive in extreme environments edited by the world s leading experts on prosopis species with globally recognized contributors covers the different perspectives surrounding the advantages and disadvantages of planting different prosopis species discusses the applications of prosopis species including how the fruits of this tree can be used as a raw food material

The Log of a Snow Survey
