changing landscape brought about by innovation technological change and rapid digitization the ability of digital technology to reduce the transaction costs of music copyright licensing has all but destroyed the traditional media business models of incumbent performance rights organizations pros music publishers record labels and radio and television stations in a climate where streaming services are rapidly proliferating and consumers prefer subscription models over direct ownership new business models such as direct licensing are developing this book provides an overview of the economics of the traditional music industry the technology induced changes in business models and copyright law and the role of publishers copyright holders and songwriters in the emerging direct licensing model in part one the author examines the economic aspects of direct licensing as an alternative to the traditional blanket license for copyrighted musical compositions with an emphasis on the often monopolistic nature of pros in part two the author focuses on the music publisher and the role direct licensing and competition may play in the changing business models in the music industry and the potential benefits this may bring to copyright holders such as songwriters to compliment this model the author proposes a maximum statutory fixed rate for musical performances to further streamline the royalty process especially where distributors such as google and youtube are concerned this book adds to the growing body of literature on the economics of music licensing in the digital age it will be useful to those in the fields of economics and law as well as music executives musicians songwriters composers and other industry professionals who are interested in understanding how technology innovation and competition have reshaped the music industry simon frith has been one of the most important figures in the emergence and subsequent development of popular music studies from his earliest academic publication the sociology of rock 1978 through to his recent work on the live music industry in the uk in his desire to take popular music seriously he has probably been cited more than any other author in the field uniquely he has combined this work with a lengthy career as a music critic for leading publications on both sides of the atlantic the contributions to this volume of essays and memoirs seek to honour frith s achievements but they are not merely about frith rather they

are important interventions by leading scholars in the field including robert christgau antoine hennion peter j martin and philip tagg the focus on sociology and industry and aesthetics and values reflect major themes in frith s own work which can also be found within popular music studies more generally as such the volume will become an essential resource for those working in popular music studies as well as in musicology sociology and cultural and media studies in the year 2060 after decades of war famine and financial collapse individual nations ceased to exist borders were blurred different currencies were abandoned and the new world order was complete the dominion of the global alliance ruled by the heads of the five families had begun now over a century later the power of the global alliance is absolute every aspect of daily life brings the families more power and more profit though there are internal struggles within the families the world is enjoying history s longest stretch of peace even crime is nearly non existent due to the sid chip implanted in every citizen at birth banking and shopping are now controlled through the simple swipe of a hand and the world s citizens are pacified in a haze of security and consumerism but when the man overseeing the launch of the sid upgrade discovers a fatal design flaw the government quickly silences him his children eighteen year old danica seton and her thirteen year old brother marcus are forced to run as agents of the global alliance hunt them their frantic flight will lead them into the company of a pale skinned man with a dark history dr sonje nysgaard a colleague of the children s father and likewise aware of the flaw narrowly escapes the attempt on her life hiding from alliance soldiers she finds herself under the protection of a terrorist organization dedicated to the overthrow of the alliance and the families these distractions are ill timed for kerwen garrott the head or caput of his family with the unveiling of the peacekeeper drones the world s first fully automated soldier the garrott name has risen high thus attracting the distrust and contempt of the other families and as caput garrott struggles to navigate the treacherous politics of the alliance the terrorists have marked him as their next target the first threads tugged are small but possess the potential to unravel the whole tapestry a tapestry carefully woven two millennia ago in deep shadow and bloody conspiracy few remember its origin and none
