Machine Learning Cookbook with Python

2020-11-12

a cookbook that will help you implement machine learning algorithms and techniques by building real world projects ð key features ð learn how to handle an entire machine learning pipeline supported with adequate mathematics create predictive models and choose the right model for various types of datasets learn the art of tuning a model to improve accuracy as per business requirements get familiar with concepts related to data analytics with visualization data science and machine learning description machine learning does not have to be intimidating at all this book focuses on the concepts of machine learning and data analytics with mathematical explanations and programming examples all the codes are written in python as it is one of the most popular programming languages used for data science and machine learning here i have leveraged multiple libraries like numpy pandas scikit learn etc to ease our task and not reinvent the wheel there are five projects in total each addressing a unique problem with the recipes in this cookbook one will learn how to solve machine learning problems for real time data and perform data analysis and analytics classification and beyond the datasets used are also unique and will help one to think understand the problem and proceed towards the goal the book is not saturated with mathematics but mostly all the mathematical concepts are covered for the important topics every chapter typically starts with some theory and prerequisites and then it gradually dives into the implementation of the same concept using python keeping a project in the background ð ð what will you learn understand the working of the o s e m n framework in data science ð get familiar with the end to end implementation of machine learning pipeline learn how to implement machine learning algorithms and concepts using python learn how to build a predictive model for a business case who this book is for ð this cookbook is meant for anybody who is passionate enough to get into the world of machine learning and has a preliminary understanding of the basics of linear algebra calculus probability and statistics this book also serves as a reference guidebook for intermediate machine learning practitioners ð table of contents 1 boston crime 2 world happiness report 3 iris species 4 credit card fraud detection 5 heart disease uci

Oracle Service Bus 11g Development Cookbook

2012-01-24

this cookbook is full of immediately useable recipes showing you how to develop service and message oriented integration applications on the oracle service bus in addition to its cookbook style which ensures the solutions are presented in a clear step by step manner the explanations go into great detail which makes it good learning material for everyone who has experience in osb and wants to improve most of the recipes are designed in such a way that each recipe is presented as a separate standalone entity

and reading of prior recipes is not required the finished solution of each recipe is also made available electronically if you are an intermediate soa developer who is using oracle service bus to develop service and message orientated applications on the oracle service bus then this book is for you this book assumes that you have a working knowledge of fundamental soa concepts and oracle service bus
