since 2007 central banks of industrialized countries have counteracted financial instability recession and deflationary risks with unprecedented monetary policy operations while generally regarded as successful these measures also led to an exceptional increase in the size of central bank balance sheets the book first introduces the subject by explaining monetary policy operations in normal times including the key instruments open market operations standing facilities reserve requirements and the collateral framework second the book reviews the basic mechanics of financial crises as they have hit economies many times the book then explains what central banks need to do to when financial markets and banks are impaired to fulfil their monetary policy and financial stability mandates besides demonstrating the need for non conventional monetary policy measures the book also highlights their dangers such as moral hazard and increased central bank risk taking the book draws a number of lessons from the crisis on non conventional monetary policy operations assessing what measures have worked well and how a framework should be designed in future normal times such as to contribute to make financial crises less likely central bank monetary policy operations have traditionally been considered as a matter of practice while the macroeconomic modelling of the transmission mechanism of monetary policy is regarded as a discipline relying on substantial theory monetary economics however monetary policy operations can equally benefit from a theory and from a normative framework to guide policy choices the limited interest that monetary policy operations have found for many decades in academic economics may well have contributed to the many misunderstandings on central bank actions over recent years this book provides a basis for a better theoretical understanding of real world monetary policy operations

Small Island 1998-02

Small Island is a novel by British author Andrea Levy. It is set in the 1940s and tells the story of two sisters, Olive and Vivien, who are born in London to Jamaican parents and brought up on a council estate. They go to the same grammar school, but while Vivien's life becomes a chaotic mix of friendships, youth clubs, skinhead violence, a levels, discos, and college, Olive, three years older and a skin shade darker, has a very different tale to tell. The collection finishes on Fruit of the Lemon, a masterful novel which centres on young ambitious Faith Jackson, furious and perplexed when her parents announce their intention to retire back home to Jamaica. Faith makes her own journey there where she is immediately welcomed by her aunt Coral, keeper of a rich cargo of family history through the weave of her aunt's storytelling. A cast of characters unfolds in a novel that sweeps through continents.
