text graph enhanced knowledge graph representation learning

Feb 13 2023

abstract knowledge graphs kgs such as freebase and yago have been widely adopted in a
variety of nlp tasks representation learning of knowledge graphs kgs aims to map entities and

relationships into a continuous low dimensional vector space

multiagent trajectory prediction with global local scene

Jan 12 2023

to mitigate these challenges this study presents a novel multiagent trajectory prediction model termed the global local scene enhanced social interaction graph network glsign which incorporates two pivotal strategies global local scene information utilization and a social adaptive attention graph network

fault detection of complicated processes based on an enhanced

Dec 11 2022

for this problem an improved transformer network model with graph attention mechanism ga tran is proposed and used for complicated process fault detection considering the strong coupling property of process variables the presented method performs joint spatial temporal learning by mining the data information in views of both time dimension
