fundamental part of bioethanol fuel production to make biomass more accessible this book also includes an introductory section on the bioethanol fuels bioethanol fuel production processes i biomass pretreatments is the first volume in the handbook of bioethanol fuels six volume set the primary pretreatments at the macro level are the biological chemical hydrothermal and mechanical pretreatments of the biomass it also has an introductory section on the biomass pretreatments at large for bioethanol fuel production the major pretreatments at the micro level are the enzymatic and fungal pretreatments of the biomass as the biological pretreatments acid alkaline ionic liquid and organic solvent pretreatment pretreatments of the biomass as the chemical pretreatments steam explosion and liquid hot water pretreatments of the biomass as the hydrothermal pretreatments and milling ultrasonic and microwave pretreatments of the biomass as the mechanical pretreatments the first volume also indicates that a wide range of pretreatments stand alone or in combination with each other fractionate the biomass to its constituents of cellulose lignin and hemicellulose and improve both sugar and bioethanol fuel yield making this bioethanol fuel more competitive in relation to crude oil and natural gas based fossil fuels this first volume is a valuable resource for the stakeholders primarily in the research fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry genetics molecular biology plant sciences water resources economics business management transportation science and technology ecology public environmental and occupational health social sciences toxicology multidisciplinary sciences and humanities among others each of these package has the latest solved cbse examination papers latest sample papers and 5 practice papers this third volume of the handbook presents a representative sample of the population papers in the field of petrodiesel fuels following the substantial public concerns on the adverse impact of the emissions from petrodiesel fuels on the environment and human health the research has intensified in the areas related to the reduction of these adverse effects thus bioremediation of spills from crude oils and petrodiesel fuels at sea and soils as well as desulfurization of petrodiesel fuels have emerged as publicly important research areas similarly the emissions from diesel fuel exhausts due to their adverse effects on both human health and environment have been researched more in recent years these emissions cover particulate emissions aerosol emissions and nox emissions research on the adverse impact of petrodiesel fuel exhaust emissions on human health has primarily progressed along the lines of respiratory illnesses cancer and other illnesses such as cardiovascular illnesses brain illnesses and reproductive system illnesses through human animal and in vitro studies it is clear that these illnesses caused by the petrodiesel fuel exhaust emissions have been one of the most significant reasons to develop alternative biodiesel fuels part ix presents a representative sample of the population papers in the field of crude oils covering major research fronts it covers crude oil spills in general crude oil spills and their cleanup properties and removal of crude oils biodegradation of crude oil contaminated soils and crude oil recovery besides an overview paper part x presents a representative sample of the population papers in the field of petrodiesel fuels in general covering major research fronts it covers combustion
