Jan 01 2022

2013 12 20 we introduce a stochastic variational inference and learning algorithm that scales to large datasets and under some mild differentiability conditions even works in the intractable case our contributions are two fold first we show that a reparameterization of the variational lower bound yields a lower bound estimator that

the gapeev shiryaev conjecture originating in gapeev and shiryaev 2011 and gapeev and shiryaev 2013 can be broadly stated as follows monotonicity of the signal to noise ratio implies monotonicity of the optimal stopping boundaries the conjecture was originally formulated both within i sequential testing problems for

Jun 25 2021

alex graves this paper shows how long short term memory recurrent neural networks can be used to generate complex sequences with long range structure simply by predicting one data point at a time the approach is demonstrated for text where the data are discrete and online handwriting where the data are real valued
