high performance however it is rarely explained what more precisely being more proactive actually entails or even indeed defined what is meant by the term proactivity in this particular context this dissertation seeks to investigate proactivity and its role in shaping firms market strategies from prior research on proactivity in the strategic marketing domain we know that proactive firms on average develop more radical innovation are better at managing complex and highly competitive environments and seem to achieve higher business performance however few if any of these prior studies properly define proactivity and take a more holistic perspective on its impact on firms market strategies in this dissertation i propose a definition of proactivity through three main proactive characteristics being future oriented taking the initiative and driving change thus a proactive firm does not wait for things to happen and then react to those events instead it keeps a long term horizon on its scanning for market intelligence and takes action before things happen in order to create the change needed to improve its situation while certainly not all proactive actions are successes particularly not if the firm lacks proper awareness of the situation or exceeds its capabilities in its striving to shape events proactive firms do have access to a broader set of opportunities than their less proactive competitors to understand how proactivity influences market strategies it is first necessary to understand market strategy itself a bit closer i define market strategies as firms strategies for creating customer value according to the market orientation literature the basis of achieving long term high firm performance is to consistently provide customers with superior value to that of the competition thus firms market strategies are squarely at the center of their efforts to become more successful to study these strategies and the effects they have it is necessary to go beyond strategy documents and study the actual activities that firms perform to implement them a market strategy in my conceptualization can thus be perceived as a coherent set of activities aimed at fulfilling

certain goals leading to the creation of customer value these activities can then be further categorized according to the strategic orientations that drive the firm s strategy making with customer orientation competition orientation and innovation orientation being the orientations that have the most impact on market strategies from this conceptual foundation the dissertation takes four different approaches to investigating proactive market strategies each presented in one of the four appended papers in the first paper a conceptual typology of different types of market strategies based on different value creation logics which are the combinations of responsiveness and proactivity that influence a firm s value creation efforts is presented in the second paper the market strategies of five proactive firms are investigated to find three generic proactive market strategies each representing a typical way for firms to employ proactivity in their market strategies the third paper uses fuzzy set qualitative comparative analysis to investigate the configurations of proactivity market environment and different market strategies that consistently lead to high market strategic effectiveness finally the fourth paper goes more in depth in exploring the activities that firms employ to create value for customers with particular focus on the different activities that are performed during different stages of contact with a customer through this thorough investigation of proactive market strategies this dissertation presents a holistic view of proactivity and its impact on firms market strategies and their associated activities as this is the first proper holistic view of proactivity in market strategy and also the first attempt to properly define proactivity in the market strategic context the dissertation also provides directions for future research

vi måste vara mer proaktiva är en fras som säkerligen har dragits på många strategimöten i såväl internationaliserade jättar som lokala småföretag tjänsteföretag likväl som tillverkande industrier har det i styrelserum ledningsmöten pratats om behovet att vara mer proaktiv det uppenbara är att proaktivitet ses som något positivt

något som kan hjälpa företaget bli bättre mer konkurrenskraftigt och så vidare men vad menar man egentligen med att vara proaktiv i det här sammanhanget och hur påverkar det egentligen företags prestationsförmåga harald brege vid linköpings universitet har studerat proaktivitet och hur företag kan använda det för att öka effektiviteten på sina marknadsstrategier d v s deras strategier för att skapa kundvärde proaktivitet är en nyckel som kan låsa upp möjligheter för företag att bli bättre på att hantera en föränderlig och komplex omvärld och stärka sin konkurrenskraft slår man upp ordet proaktiv i saol får man veta att det betyder förebyggande eller förutseende men för att kunna användas som ett verktyg för strategiutveckling behövs en mer användbar definition än så ur ett strategiskt perspektiv så har proaktivitet tre huvudsakliga komponenter att vara långsiktig att ta initiativet och att driva förändring det viktigaste för ett proaktivt företag är att inte vara passiva och vänta på att något händer som tvingar dem till förändring eller att bara reaktivt agera på det som finns i omvärlden istället så blickar man framåt identifierar de potentiella sätt som en situation kan utvecklas på och tar sedan initiativet och agerar för att förändra situationen så att den passar företaget bättre dock så räcker det inte bara att bli proaktiv och så får man stora vinster på direkten för att proaktiviteten ska bli framgångsrik så måste ett företag dels arbeta för att skaffa en grundlig förståelse av sin omgivning dels se till de olika delarna i deras marknadsstrategi hänger ihop och arbetar mot samma mål Är strategin otydlig eller om företaget håller på med saker de inte har insikt i så är proaktivitet istället sannolikt att ge dåliga resultat genom att arbeta för att förstå sina kunder på djupet så kan proaktiva företag snabbt komma med lösningar till behov inklusive behov som kanske inte ens kunderna själva hade identifierat genom att aktivt arbeta med att förändra kunders uppfattning av vad en leverantör ska göra för dem och att påverka politiker och andra intressenter så kan proaktiva företag forma sina marknader för att bättre passa dem genom att driva produktutveckling som

fokuserar på morgondagens produkter och att testa nya möjligheter inte bara småförbättringar av samma gamla produkter så kan proaktiva företag skapa innovativa nya erbjudanden som vänder upp och ner på marknaden dessa tre exempel belyser de tre generiska proaktiva marknadsstrategier som har identifierats kundengagemang marknadsformande och innovationsledarskap

in discussions of firm strategy proactivity is often mentioned as an enabler of effective goal accomplishment and high performance however it is rarely explained what more precisely being more proactive actually entails or even indeed defined what is meant by the term proactivity in this particular context this dissertation seeks to investigate proactivity and its role in shaping firms market strategies from prior research on proactivity in the strategic marketing domain we know that proactive firms on average develop more radical innovation are better at managing complex and highly competitive environments and seem to achieve higher business performance however few if any of these prior studies properly define proactivity and take a more holistic perspective on its impact on firms market strategies in this dissertation i propose a definition of proactivity through three main proactive characteristics being future oriented taking the

initiative and driving change thus a proactive firm does not wait for things to happen and then react to those events instead it keeps a long term horizon on its scanning for market intelligence and takes action before things happen in order to create the change needed to improve its situation while certainly not all proactive actions are successes particularly not if the firm lacks proper awareness of the situation or exceeds its capabilities in its striving to shape events proactive firms do have access to a broader set of opportunities than their less proactive competitors to understand how proactivity influences market strategies it is first necessary to understand market strategy itself a bit closer i define market strategies as firms strategies for creating customer value according to the market orientation literature the basis of achieving long term high firm performance is to consistently provide customers with superior value to that of the competition thus firms market strategies are squarely at the center of their efforts to become more successful to study these strategies and the effects they have it is necessary to go beyond strategy documents and study the actual activities that firms perform to implement them a market strategy in my conceptualization can thus be perceived as a coherent set of activities aimed at fulfilling certain goals leading to the creation of customer value these activities can then be further categorized according to the strategic orientations that drive the firm s strategy making with customer orientation competition orientation and innovation orientation being the orientations that have the most impact on market strategies from this conceptual foundation the dissertation takes four different approaches to investigating proactive market strategies each presented in one of the four appended papers in the first paper a conceptual typology of different types of market strategies based on different value creation logics which are the combinations of responsiveness and proactivity that influence a firm s value creation efforts is presented in the second paper the market strategies of five proactive firms are investigated to find

three generic proactive market strategies each representing a typical way for firms to employ proactivity in their market strategies the third paper uses fuzzy set qualitative comparative analysis to investigate the configurations of proactivity market environment and different market strategies that consistently lead to high market strategic effectiveness finally the fourth paper goes more in depth in exploring the activities that firms employ to create value for customers with particular focus on the different activities that are performed during different stages of contact with a customer through this thorough investigation of proactive market strategies this dissertation presents a holistic view of proactivity and its impact on firms market strategies and their associated activities as this is the first proper holistic view of proactivity in market strategy and also the first attempt to properly define proactivity in the market strategic context the dissertation also provides directions for future research

vi måste vara mer proaktiva är en fras som säkerligen har dragits på många strategimöten i såväl internationaliserade jättar som lokala småföretag tjänsteföretag likväl som tillverkande industrier har det i styrelserum ledningsmöten pratats om behovet att vara mer proaktiv det uppenbara är att proaktivitet ses som något positivt något som kan hjälpa företaget bli bättre mer konkurrenskraftigt och så vidare men vad menar man egentligen med att vara proaktiv i det här sammanhanget och hur påverkar det egentligen företags prestationsförmåga

harald brege vid linköpings universitet har studerat proaktivitet och hur företag kan använda det för att öka effektiviteten på sina marknadsstrategier d v s deras strategier för att skapa kundvärde proaktivitet är en nyckel som kan låsa upp möjligheter för företag att bli bättre på att hantera en föränderlig och komplex omvärld och stärka sin konkurrenskraft slår man upp ordet proaktiv i saol får man veta att det betyder förebyggande eller förutseende men för att kunna användas som ett verktyg för strategiutveckling behövs en mer användbar definition än så ur ett strategiskt perspektiv så har

proaktivitet tre huvudsakliga komponenter att vara långsiktig att ta initiativet och att driva förändring det viktigaste för ett proaktivt företag är att inte vara passiva och vänta på att något händer som tvingar dem till förändring eller att bara reaktivt agera på det som finns i omvärlden istället så blickar man framåt identifierar de potentiella sätt som en situation kan utvecklas på och tar sedan initiativet och agerar för att förändra situationen så att den passar företaget bättre dock så räcker det inte bara att bli proaktiv och så får man stora vinster på direkten för att proaktiviteten ska bli framgångsrik så måste ett företag dels arbeta för att skaffa en grundlig förståelse av sin omgivning dels se till de olika delarna i deras marknadsstrategi hänger ihop och arbetar mot samma mål Är strategin otydlig eller om företaget håller på med saker de inte har insikt i så är proaktivitet istället sannolikt att ge dåliga resultat genom att arbeta för att förstå sina kunder på djupet så kan proaktiva företag snabbt komma med lösningar till behov inklusive behov som kanske inte ens kunderna själva hade identifierat genom att aktivt arbeta med att förändra kunders uppfattning av vad en leverantör ska göra för dem och att påverka politiker och andra intressenter så kan proaktiva företag forma sina marknader för att bättre passa dem genom att driva produktutveckling som fokuserar på morgondagens produkter och att testa nya möjligheter inte bara småförbättringar av samma gamla produkter så kan proaktiva företag skapa innovativa nya erbjudanden som vänder upp och ner på marknaden dessa tre exempel belyser de tre generiska proaktiva marknadsstrategier som har identifierats kundengagemang marknadsformande och innovationsledarskap
