The Ecological Status of European Rivers: Evaluation and Intercalibration of Assessment Methods

2009-03-20

the monitoring of benthic diatoms macrophytes macroinvertebrates and fish will be the backbone of future water management in europe this book describes and compares the relevant methodologies and tools based on a large data set covering rivers in most parts of europe the 36 articles presented will provide scientists and water managers with a unique insight into background and application of state of the art monitoring tools and techniques

Applications of Toxicogenomics in Safety Evaluation and Risk Assessment

2011-10-11

this book provides a timely overview of toxicogenomics with special emphasis on the practical applications of this technology to the risk assessment process introductory sections are followed by a series of chapters highlighting practical and systematic applications of toxicogenomics in informing the risk assessment process including the areas of mutagenicity carcinogenicity endocrine toxicity organ specific toxicity population monitoring and ecotoxicology the book concludes with approaches for the integration of this technology in safety evaluation studies and an outlook on how toxicogenomics and complementary technologies can reframe the current risk assessment paradigm

Food Systems Evaluation Methods and Sustainability Assessment

2024-03-08

the food system is responsible for some of society s most pressing sustainability challenges diets are currently unsustainable in many countries as evidenced by the growing burden of malnutrition degradation of natural resources contributions to climate change and unaffordability of healthy diets there is an urgent need to address the gaps in understanding of what a sustainable food system means across varying populations and geographies

and how we can better measure these systems while identifying how dietary choices impact on human health and the environment however decision makers and experts are questioning whether it is possible to meet environmental social and economic goals simultaneously or whether trade offs are necessary thus the development of better measurements and indicators to clearly understand the benefits and considerations for healthy and sustainable food systems is needed

Late-Life Depression and Anxiety

2022-02-07

late life depression and anxiety empowers health care professionals to identify and diagnose anxiety and depression in older adult patients and help them find relief stay independent and lower their risk of suicide readers will gain up to date knowledge of the scope and seriousness of depression anxiety and suicide in older adults alongside a system of proven assessment and treatment techniques for turning evidence based theory into practice

Sustainable Construction Processes

2016-04-13

this book explores the concepts and practicalities that lead to sustainable construction it breaks new ground by providing the reader with the underlying principles of how to build sustainably and then assesses many of the tools required for the task from energy to materials and from procurement to operation all aspects play their part in turning a theoretically sustainable building project into a reality there are many guidelines for the designer on how to maximise the sustainability of buildings but this resource text supplements these by focusing on the construction and operational aspects of sustainable buildings as well as some of the more fundamental design related considerations offers an excellent text for those learning to construct design and operate sustainable buildings covers the drivers for sustainable construction definitions historical impacts climate change and global regional and individual responses enables the construction professional to achieve optimum solutions both in design process and the aftercare of buildings evaluates the effectiveness of different renewable technologies and provides guidance on the practicalities of their use alerts the reader to future trends in this field

ICT-Based Assessment, Methods, and Programs in Tertiary Education

2020-04-17

the use of information and communication technologies icts in education has revolutionized learning shifting beyond traditional mode of education the integration of icts has become an advantage for students at tertiary education when used for the right purpose to enhance learning the use of technology brings forth a flexible and accessible mode of education and bridges the gap of learning across borders this enables students at tertiary level to have access to other universities and academic resource materials globally thereby expanding their knowledge thus it is crucial to consider the development of technology in education as part of a comprehensive pedagogical framework and take into account new developments in icts ict based assessment methods and programs in tertiary education is an essential research publication that provides relevant theoretical frameworks and recent empirical research findings on integrating icts in tertiary education to enhance learning and allow students to take more control of their learning highlighting topics such as assessment language learning and e learning this book is ideal for teachers professionals academicians researchers administrators curriculum designers instructional designers and students

Building Thermal Envelope

2020-03-27

this book results from a special issue published in energies entitled building thermal envelope its intent is to identify emerging research areas within the field of building thermal envelope solutions and contribute to the increased use of more energy efficient solutions in new and refurbished buildings its contents are organized in the following sections building envelope materials and systems envisaging indoor comfort and energy efficiency building thermal and energy modelling and simulation lab test procedures and methods of field measurement to assess the performance of materials and building solutions smart materials and renewable energy in building envelope adaptive and intelligent building envelope and integrated building envelope technologies for high performance buildings and cities

Proposed Wickland Oil Company Petroleum Products Facility, Selby, Draft EIR, Environmental Assessment (EA).

1979

developing software systems which are easy to use while simultaneously increasing the productivity performance and satisfaction of users is still a major challenge in software engineering thus a large number of usability engineering methods have been proposed to systematically develop software with high usability a large number of studies indicate that even basic usability engineering methods are not integrated in software development lifecycles practiced in industrial settings yet problems in the adoption of methods by project teams are rarely examined this book provides a new perspective on the integration and adoption of usability engineering methods by software development teams the adoption of methods by project teams contrary to popular belief is not assured just because it is mandated by the organization this work argues that usability engineering methods can only be regarded as integrated in the software development process of an organization when these methods are practiced and accepted by development teams so far no frameworks for examining the acceptance of methods by project teams and for exploiting such data for guiding project teams in method deployment are available to address this problem this book presents an approach which consists of a process meta model for guiding project teams in the deployment of usability engineering methods and a measurement framework for measuring the acceptance of the deployed methods the approach is called adoption centric usability engineering

Adoption-centric Usability Engineering

2008-10-08

this volume provides a single collection some of the best articles on social experimentation and program evaluation that have appeared in the journal of policy analysis and management jpm provides exposure to a variety of well executed social experiments and evaluations for evidence based public policy examines the theory and conduct of evaluations and social experiments as they relate to their practical implementation in evidence based policy making provides exposure to the fundamental issues surrounding the conduct of evaluations as well as to the relative merits of social experiments and the ethics and use of evaluations

Social Experimentation, Program Evaluation, and Public Policy

2009-04-27

the systems thinking philosophy has become popular in human factors and ergonomics and safety science these methods are being used to understand and resolve complex societal problems in areas such as transport safety workplace safety medication error disaster management child abuse financial crises terrorism climate change and public health and wellbeing this handbook presents practical step by step guidance for practitioners and researchers wishing to use these methods to tackle complex problems each method includes an example case study which demonstrates how the method can be applied and how the results can be interpreted and translated into practical recommendations the book presents practical guidance on state of the art systems thinking methods and offers case study applications describing systems thinking methods in novel areas it explains how to translate the outputs of systems thinking methods in practice and introduces systems thinking with an overview of human factors and ergonomics applications this book will serve as a great reference for students and engineers in the field of systems engineering complex systems and the design and development of systems including ergonomics human factors and systems engineers designers architects industrial engineers project management engineers reliability engineers risk engineers software engineers and computer engineers

Handbook of Systems Thinking Methods

2022-08-19

this textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists it begins by defining what is meant by assessment outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment methods of data collection e g observation interview standardised testing and sources e g self report proxy for collecting information about clients are then reviewed and the main purposes of assessment e g descriptive evaluative predictive discriminative presented the book then addresses the topics of standardisation levels of measurement reliability validity and clinical utility there is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement the concept of clinical reasoning and reflective practice is then explored application of principles is supported through detailed case studies and worksheets and

the criteria for test critique and guidelines for choosing a particular assessment approach are discussed

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists

2013-03-15

certification systems for buildings aim to make sustainability transparent for the general public and economically feasible for investors several hundred systems have been developed since around 1990

2017-03-16

how to adapt existing building stock is a problem being addressed by local and state governments worldwide in most developed countries we now spend more on building adaptation than on new construction and there is an urgent need for greater knowledge and awareness of what happens to commercial buildings over time sustainable building adaptation innovations in decision making is a significant contribution to understanding best practice in sustainable adaptations to existing commercial buildings by offering new knowledge based theoretical and practical insights models used are grounded in results of case studies conducted within three collaborative construction project team settings in australia and the netherlands and exemplars are drawn from the americas asia japan korea and europe to demonstrate the application of the knowledge more broadly results clearly demonstrate that the new models can assist with informed decision making in adaptation that challenges some of the prevailing solutions based on empirical approaches and which do not accommodate the sustainability dimension the emphasis is on demonstrating how the new knowledge can be applied by practitioners to deliver professionally relevant outcomes the book offers guidance towards a balanced approach that incorporates sustainable and optimal approaches for effective management of sustainable adaptation of existing commercial buildings

Transport Infrastructure and Systems

2007-03-30

in one volume the leading researchers in industrial organizational assessment interpret the range of issues related to industrial organizational tests including test development and psychometrics clinical applications ethical and legal concerns use with diverse populations computerization and the latest research clinicians and researchers who use these instruments will find this volume invaluable as it contains the most comprehensive and up to date information available on this important aspect of practice

Marketing Communications Management

enterprises and organizations of any kind embedded in today s economic environment are deeply dependent on their ability to take part in collaborations consequently it is strongly required for them to get actively involved for their own benefit in emerging potentially opportunistic collaborative enterprise networks the concept of interoperability has been defined by interop vlab as the ability of an enterprise system or application to interact with others at a low cost in a flexible approach consequently interoperability of organizations appears as a major issue to succeed in building on the fly emerging enterprise networks the international conference on interoperability for enterprise systems and applications i esa 2014 was held under the motto interoperability for agility resilience and plasticity of collaborations on march 26 28 2014 and organized by the ecole des mines d albi carmaux france on behalf of the european laboratory for enterprise interoperability interop vlab on march 24 25 co located with the conference eight workshops and one doctoral symposium were held in four tracks complementing the program of the i esa 14 conference the workshops and the doctoral symposium address areas of greatest current activity focusing on active discussions among the leading researchers in the area of enterprise interoperability this part of the conference helps the community to operate effectively building co operative and supportive international links as well as providing new knowledge of on going research to practitioners the workshops and doctoral symposium aimed at exploiting new issues challenges and solutions for enterprise interoperability ei and associated domains of innovation such as smart industry internet of things factories of the future ei applications and standardisation these proceedings include the short papers from the i esa 14 workshops and the doctoral symposium the book is split up into 9 sections one for each workshop and one for the doctoral symposium all sections were organized following four tracks 1 ei and future internet factory of the future 2 ei application domains and it 3 ei standards 4 ei doctoral symposium for each section a workshop report is provided summarizing the content and the issues discussed during the sessions the goal of the first track was to offer a discussion opportunity on interoperability issues regarding the use of internet of things on manufacturing

environment workshops 1 and 3 on one hand and regarding the potential of innovation derived from the use of digital methods architectures and services such as smart networks workshops 2 and 4 on the other hand the second track focused on particular application domains that are looking for innovative solutions to support their strong collaborative needs thus the track developed one workshop on the use of ei solution for future city logistics workshop 5 and one on the use of ei solutions for crisis disaster management workshop 6 the third track studied the recent developments in ei standardization two workshops were dedicated to this issue the first one has proposed to focus on the management of standardization workshop 8 and the second one has chosen to work on the new knowledge on standardization developments in the manufacturing service domain workshop 9 the last track the doctoral symposium presented research results from selected dissertations the session discussed ei knowledge issues notably in terms of gathering through social networks or internet of things and of exploitation through innovative decision support systems
