this is the first book to examine in depth the crucial role of the speed of information processing in the brain in determining reading fluency in both normal and dyslexic readers part i explains fluency in reading from both traditional and modern perspectives fluency has historically been viewed as the outcome of other reading related factors and has often been seen as a convenient measure of reading skills this book however argues that fluency has a strong impact on other aspects of reading and plays a central role in the entire reading process part ii deals with the determinants of reading fluency chief among these is the speed of information processing in the brain using both behavioral and electrophysiological evidence the book systematically examines the features of processing speed in the various brain systems involved in reading visual orthographic auditory phonological and semantic and shows how speed of processing affects fluency in reading part iii deals with the complex issues of cross modal integration and specifically with the need for effective synchronization of the brain processes involved in reading it puts forward the synchronization hypothesis and discusses the role of the asynchrony phenomenon as a major factor in dyslexia finally it summarizes research on manipulating reading rate by means of the acceleration method providing evidence for a possible intervention aimed at reducing asynchrony key features of this outstanding new book include expanded view of fluency reading fluency is seen as both a dependent and an independent variable currently available books focus on reading rate solely as the outcome of other factors whereas this volume stresses that it is both an outcome and a cause information processing focus fluency itself is determined to a large extent by a more general factor namely speed of processing in the brain the book presents wide ranging evidence for individual differences in speed of processing across many subpopulations brain synchronization focus the book posits a new theory arguing that effective reading requires synchronization of the different brain systems visual orthographic auditory phonological and semantic research based interventions interventions to enhance fluency and thereby reading skills in general are presented in detail author expertise zvia vocabulary based upon the lessons the student has completed about the author author vera clark developed ready set read based on her extensive experience teaching children and adults to read english having taught in both public and private schools vera currently teaches reading to special education students in southern california she holds a bachelor s degree in psychology and a master s in education with an emphasis in special education ms clark loved home schooling her own children and taught each of her four children to read when they were just toddlers she is passionate about early reading and is pleased that this book is helping parents and teachers introduce another generation of children to the joys of reading well this book chronicles the journey of seven schools serving students of poverty english language learners ell s and students of color which were able to sustain school improvement for a decade on either state and or national criteria that measure student performance outcomes the book shares stories of these seven schools and demonstrates that it takes an entire school working together with their communities adding to the social and cultural capital of their students and families to create and nurture what we call a learning partnership for sustainable school improvement the answers for how these schools sustained school improvement and are effective schools is evident from their school student metrics that validate the school s ability to meet and sustain external mandates of high performance over time the seven individual case stories illustrate that what matters most is what happens in the school itself it is the internal culture of caring and respecting each other and working from an additive perspective of valuing students for their unique gifts and abilities rather than exclusively focusing on increasing test scores that makes these school stories unique this is not about heroic leadership but leadership spread out and shared among professionals working together to achieve common goals around shared values and beliefs this book is about using resources in ways that value human capital as the greatest asset in the school to ensure that educators feel a sense of commitment connection and passion for their work together with students their families and their communities that enable them to excel together we offer readers seven cases that demonstrate there is no cookie cutter approach to having an effective school rather there is a theory in practice that grounds the learning partnership depicted as a tree within a sustainable school improvement culture this sustainable culture connects shared leadership and accountability resourcefulness a humanistic philosophy additive schooling and results in an organization synergy that sustains organizational and collective efficacy for achieving results in these schools that other educators in schools with similar demographics are often unable to sustain or attain the monograph describes the application of flexible pacing as a means of meeting the educational needs of gifted students in schools throughout the country flexible pacing is defined as placing students at an appropriate instructional level and allowing them to move forward in the curriculum as they master content and skills flexible pacing is achieved by such methods as continuous progress compacted course advanced level courses grade skipping early entrance concurrent or dual enrollment and credit by examination an introductory chapter looks at the historical and theoretical context of flexible pacing and gives a brief explanation of the canvassing and survey methods used to obtain data the next two chapters describe flexible pacing programs in 8 elementary and 11 secondary schools chapter 5 looks at district wide programs for all students or all gifted students and finds six such school systems the next chapter examines cooperative programs between schools colleges or other educational institutions the seventh chapter discusses selected features of flexible pacing including school policy strategies of implementation staff selection development and record keeping a staff development program to prepare teachers for flexible pacing in mathematics is described in the eighth chapter contributed by kathleen martin the concluding chapter identifies principles of implementation including capitalizing on what is available initiating a program gradually and winning support the survey form and a sample program description are appended db be in Short Cycle Assessment 2014-04-01 this book chronicles the journey of seven schools serving students of poverty english language learners ells and students of color which were able to sustain school improvement for a decade on either state and or national criteria that measure student performance outcomes the book shares stories of these seven schools and demonstrates that it takes an entire school working together with their communities adding to the social and cultural capital of their students and families to create and nurture what we call a learning partnership for sustainable school improvement the answers for how these schools sustained school improvement and are effective schools is evident from their school student metrics that validate the school s ability to meet and sustain external mandates of high performance over time the seven individual case stories illustrate that what matters most is what happens in the school itself it is the internal culture of caring and respecting each other and working from an additive perspective of valuing students for their unique gifts and abilities rather than exclusively focusing on increasing test scores that makes these school stories unique this is not about heroic leadership but leadership spread out and shared among professionals working together to achieve common goals around shared values and beliefs this book is about using resources in ways that value human capital as the greatest asset in the school to ensure that educators feel a sense of commitment connection and passion for their work together with students their families and their communities that enable them to excel together we offer readers seven cases that demonstrate there is no cookie cutter approach to having an effective school rather there is a theory in practice that grounds the learning partnership depicted as a tree within a sustainable school improvement culture this sustainable culture connects shared
