The Structure of Local Governments Throughout the World

1961-01-01

1 the purpose the purpose of this study is to gain an insight into and make an introductory comparison of the structure of local government in many countries throughout the world more specifically the aim

is to define and describe in a comparative fashion the various organs of local government and their relationships the need for as well as the obstacles encountered in such a survey are perhaps equally obvious it is said that he who understands only his own language knows none it may just as easily be contended that he who understands only his own governmental institutions knows none governmental comparisons are useful not only to find out how others are governed but also to more fully comprehend the role which one's own governmental institutions play 1 from a pragmatic point of view there is a still further value in making comparisons of local governments local government institutions are constantly undergoing changes the changes are both formal and informal they may be evolutionary and revolutionary a comparative study of local government can help many countries to take advantage of the experiments and experiences of others from the beginning of recorded history there are indications of man borrowing heavily from the institutions of his neighbour in organizing his own institutions in local government there are several examples of countries which have set up their local government systems by wholesale copying the model of another

after slovenia s independence in 1991 from yugoslavia the introduction of local government was one of the most challenging tasks in the new country as it meant a radical change from the socialist municipal system to the classical european type of local government simona kukovič and miro haček offer a comprehensive analysis of the functioning of local government from historical normative systemic and dynamic perspectives the authors analyze the historical normative foundations of the existence of local government and building on this examine the functional dynamics of the central organs of local government in particular they analyze the position of local mayors in terms of role and the powers assigned to the mayor by law leadership characteristics the evolution of eligibility and relations

with other local actors this is followed by an analysis of the municipal council in which Kukovič and Haček outline the function and responsibilities and highlight some features of the inner workings of this collective decision making body the authors devote special attention and a wealth of empirical data to local democracy which is particularly vibrant somewhat peculiar and undoubtedly one of the strongest elements of Slovenia's still relatively fragile democracy the book thus provides a holistic and thorough overview of local government which in three decades has become an important part of the political system and in practice an important vehicle of local development within Slovenia
