set of invited papers based on analyses of legal discourse drawn from a number of international contexts where often the english language and legal culture has had to adjust to legal concepts very different from those of the english law system many of the papers were inspired by two major projects on legal language and inter multiculturalism generic integrity in legislative discourse in multilingual and multicultural contexts based in hong kong and carried out by an international team and interculturality in domain specific english a national project supported by the italian ministry for education and research involving research units from five italian universities reprint of the original first published in 1875 this international history of the origins of cold war in postwar europe examines the complex relationship between the united states and italy v 1 5 v 7 10 include bulletin bibliographique this book investigates the relationship between the ideas of nation and race among the nationalist intelligentsia of the italian risorgimento and argues that ideas of race played a considerable role in defining italian national identity the author argues that the racialization of the italians dates back to the early napoleonic age and that naturalistic racialism or race thinking based on the taxonomies of the natural history of man emerged well before the traditionally presumed date of the late 1860s and the advent of positivist anthropology the book draws upon a wide number of sources including the work of vincenzo cuoco giuseppe micali adriano balbi alessandro manzoni giandomenico romagnosi cesare balbo vincenzo gioberti and carlo cattaneo themes explored include links to antiquity on the italian peninsula archaeology and race thinking edition commentée de ce poème latin de 549 vers sur l art de la peinture qui connut un succès considérable aux xviiie et xviiiè siècles nelson fausto the greek myth of prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration it is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and prometheus by a patient laying on a properly prepared operating table the outcome of the procedure would not differ significantly from that described by greek poets yet few of us who work in the field have stopped long enough to ask where this myth originated did the poet observe a case of liver regeneration in a human being was it brilliant intuition or perhaps literally just a gut feeling of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed this book does not attempt to solve these historical issues it does instead cover in detail some of the major modern themes of research on liver regeneration injury and repair as indicated in dr n bucher s chapter the modern phase of experimental studies on liver regeneration started in 1931 with the publication by higgins and anderson of a method to perform a two thirds resection of the liver of a rat the technique described has 3 remarkable features 1 it is highly reproducible resulting in the removal of 68 of the liver 2 it has minimal if any mortality and 3 it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue introducing italian
