reconciliation the book is recommended to those with interests in contemporary germany central and eastern europe and european integration the 1968 1969 czechoslovak crisis was first and foremost a major crisis of european detente while the prague spring was made possible by the immediate and unchecked consequences of early detente in europe its crushing sharply brought out the contradictions of detente as understood by the global cold war protagonists in a similar way as the czecho slovak crisis reflected the ambivalence at the heart of detente the west european

communist parties responses to it revealed the ambivalence of detente as a context for radical social change either in the east or the west the scholarly literature on the pci and pcf has often in an unproblematic way understood the shift from cold war to detente on the european continent in the mid 1960s as a development essentially positive to these parties the present study argues against this and demonstrates how the shift from the cold war of the 1950s to detente in europe reformulated the impasse of revolution or radical change in the west rather than putting an end to it book jacket in whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies mncs in the middle east particularly saudi arabia two sets of questionnaires were distributed in major cities of saudi arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers this represents a total response rate of 62 percent which is adequate for this study the empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses the study found that joint ventures are the dominant form of multinational business in saudi arabia both in manufacturing and service industries the core roles of mncs in the saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking likewise mncs provide licensing franchising financing services and various auxiliary roles in the kingdom therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories the respondents generally perceived the competitiveness of mncs operating in saudi arabia as a function of a number of economic management marketing technological and other variables they also perceived the contributions of mncs to the kingdom s socio economic developments as significant and positive the study also found that understanding islamic values and ethics is important for mncs in this regard the researcher looked at some objective indicators of business success and related them to selected measures of mncs local cultural awareness and responsiveness the results indicate that the business success of multinationals operating in saudi arabia is positively related to their local cultural awareness and responsiveness along this line this study covers some vital elements of islamic culture which will help mncs understand further the cultural needs values and sensitivities of the saudi people and muslims in general the code of federal regulations title 23 contains the
